## **ABOUT GALGOTIAS UNIVERSITY**

Galgotias University's mission is to graduate socially responsible future technologists and business leaders with good communications skills, problem solving skills and an entrepreneurial spirit with a commitment to economic development. With a strong multidisciplinary knowledge base, graduates of GU will be well prepared to succeed in an increasingly competitive global economy. With a focus on multidisciplinary research and education and a learning model that emphasizes active learning, GU aspires to be globally known for innovation at the intersection of disciplines. GU's bold vision builds upon over a decade of excellence of Galgotias Institutions in engineering and business education. Galgotias Institutions have been nationally ranked by India Today, Business Today and Outlook for their programs in engineering. Galgotias Business School was recently recognized by Dun and Bradstreet as a leading business school in India. With a 100% placement record for the last four years supported by multinational firms like Accenture, Hewitt, IBM, Infosys, Nokia, and Samsung, Galgotias Institutions have earned the respect of top performers in the industry.

## **ABOUT SCHOOL OF LAW**

School of Law at Galgotias University was established in the year 2012 and it aims to provide Inter-disciplinary teaching and research opportunities. The Law school offers undergraduate, postgraduate and doctoral programs in the field of law. In a very short span of time the SoL has taken significant steps in providing world class education and creating knowledge. Law school library is rich with thousands of books, journals and other reference materials. It also has access to various online Legal databases. Classrooms are well equipped with modern tools for education. In order to inculcate moot skills, the SoL has designed the state of the art Moot Court hall for the students. A spacious auditorium serves the need for various seminars, conferences and other events. School of law adds practical element to the classic subjects thereby making the course more relevant and useful. The students are prepared for practice of law through Clinical Legal Education programmes thereby producing competent and socially responsible lawyers. School of Law offers Three Year LL.B. (Hons.) Programme, Five Year B.A. LL.B. (Hons.) Programme, Five Year B.B.A. LL.B. (Hons.) Programme, One Year LL.M. Degree Programme & Doctor of Philosophy (Ph.D.) in Law and admission is taken through a rigorous selection process.

## ABOUT MOOT COURT SOCIETY

Moot Court Society is a student run, faculty supervised society of the SoL, GU. In just the first half of the 2018 the society has facilitate GU students to bag at least seven trophies including that of winners, runner up, third best team, best speaker and best memorial. The MCS, SoL also hosted the 34<sup>th</sup> BCI Inter-University Moot Court Competition in 2017 that saw participation from sixty institutions across the country. The event was presided by his lordship Hon'ble Mr. Justice R. K. Agarwal (Judge, Supreme Court of India) and received much praise.

This time around, we intend to make it only better from where we left. Thus, we hereby present the rules of our second paperless GU MCC 2019-20 that shall test the lawyer's skills of young minds in an eco-friendly manner.

## 2nd Galgotias University Moot Court Competition 2019-20

### (The International Paperless Moot)

The School of Law, Galgotias University presents the Second Galgotias University Moot Court Competition (24-25 January 2020). The problem is a blend of emerging issues on Artificial Intelligence and its subsequent connection with Cyber Laws, International Law, Criminal Law and Corporate Law. This blend shows more possible complex legal issues which may arise in future and thus we thought it would be appropriate to introduce our law students to them through this moot court competition. To check the environmental and economic costs involved in our traditional moots, the SoL-GU has decided to keep the competition completely paperless. *Hence, no hard copies of the memorials are required.*

## **Moot Proposition**

1. In the year 2050, technology was at its peak with multiple innovations popping out from every corner of the world. Developments of flying cars to huge leaps in the medical sciences were commonplace. Moreover, among them all, the most prominent development was in the field of Artificial Intelligence (hereinafter referred as *AI*). AI was a prime target of most of the countries to prove that they were better than the others. However there was also a strong public outcry about misuse of AI. This is in the backdrop of multiple incidents, in which one was when the AI was implemented in a US warship to determine its defence capabilities. AI while accessing information from the Internet determined that there was a credible threat to the country in the form of an imminent attack. This information was based on some intelligence provided by a confidential report submitted by Central Intelligence Agency to the US Government. As precautionary measures, the AI targeted to launch a missile from one of the US Warships. When it was noticed by the military personnel, they had to disable the missiles manually.
2. Following the above incidents, a meeting of plenipotentiaries' was convened by the permanent members of the UN Security Council in September, 2050. Also in one of the international conference for ethical use of AI, Mr. Eleon Musk, a renowned genius in this field, made a strong condemnation against the use of AI for military purposes. The outcome of the conference along with the resolution passed by UN Security Council led to bringing together various NGOs, international groups and member countries on the platform of the UN General Assembly, where they all signed an agreement namely "Ban of AI for Military Applications" on 21<sup>st</sup> December, 2050. WAKANDA, a non-permanent member of UN Security Council and a developing country among them also signed the said Agreement but never ratified it.
3. SkyNET was a Limited Company in the state of WAKANDA, registered under Companies Act, 2013 as SkyNET (P.) Ltd. The object of the company was promotion of science and research with special reference in the field of AI. Since its incorporation the company had incurred profits whereby the dividends payable to the shareholders were used for providing scholarships. In addition to this, the company initiated in setting up of Research and Development Wing in various government and non-governmental companies involved in manufacturing arms and ammunitions from the dividends declared.

4. In the process of research and development, it achieved a lot including AI responding to human emotions and touch. The base algorithm, which was incorporated in a quantum machine called AINET, was used mainly in all such developments and it was made in such a way that any further modifications or tweaking would be done internally by the AI itself. Subsequently SkyNET patented AINET from the patent office of WAKANDA after a long process of documentations, public scrutiny and pre-grant oppositions. AINET was also described as an algorithm self sufficient in improvement of new advanced models of the existing technologies and creation of new independent ones.
5. In the process of developing more self-sufficient tools based on AINET, SkyNET started testing the same on artificial mechanical human organs. With the help of AINET, it successfully developed the mechanical organs which were used on the field to save many human lives including army veterans, blast survivors, patients ailing of incurable diseases, etc. To establish a centralized mechanism for such mechanical organ control in cases where there were multiple organ replacements in a human body, for saving them back from the clutches of death, AINET created a small chip to be implanted in human brain sending infra-red waves to such organs. The centralized mechanism was connected to the Central server of AINET for minor tweaks and adjustments in case of bugs or possible future errors in the system. SkyNET filed a patent application over the invention of these mechanical organs and the central server chips. In the process of examination and pre-grant opposition the patent application was rejected by the patent office of WAKANDA citing those not having been invented by SkyNET rather by an AI. Thus SkyNET could not have any patent over it. Against this order SkyNET filed a Petition under Article 136 to the Supreme Court of WAKANDA disputing the same (**CASE No. 1**).
6. There was initially a strong criticism by the people of WAKANDA for human trials of AI and its use of mechanical organs dubbing them as “Cyborgs”, but seeing the resultant effect of successful saving of human life, this perspective changed. Citizens of WAKANDA themselves started submitting to the use of technology on their own body for a better treatment and longer life expectancy. Although the cases for full body replacement with implantation of centrally mechanized chip in the brain remained comparatively low and restricted to only death encounter cases.

7. Due to its humanitarian approach in contribution to the field of AI, Government of WAKANDA started funding them in huge terms. The Government hired certain Cyborgs independently for their service in the field of search and rescue in cases of natural calamities and artificial disasters. This was specifically in exclusion of any military use in compliance of the International Agreement on “Ban of AI for Military Applications”. A team of such Cyborgs popularly known by the people as X-MEN, led many such successful missions, saving lives of thousands. This created a positive image of them in the mind of the people, which led to a demand of more such teams to cover additional aspects and larger coverage area.
8. In the meantime Government of WAKANDA entered into negotiation with the promoters of SkyNET and offered to purchase majority stakes in the company. Mr. Philip Jones who held 41% stake in SkyNET refused to sell his stakes to the government. The government decides to file an application with the National Company Law Tribunal (hereinafter referred to as NCLT) stating that it wishes to acquire 9% stake of SkyNET, which is at present being held by Mr. Philip Jones. As per the rules of SkyNET in case any single shareholder at any point of time holds more than 50% stake singly then it will be having the right to acquire 11% more shares of SkyNET. The Government of WAKANDA had acquired 20% stake held by Ms. Jessica Jones and 30% by Mr. Vikram Jones. Later on government acquired 59% stake in SkyNET with the ultimate goal to use its technology for military purposes as by then most of the profits of SkyNET were being generated from the R&D division of the government entities. The gradual shift of such acquisition led to use of X-MEN for military search and rescue missions. As this was a clear violation of the “Ban of AI for Military Applications”, a case was filed by Pavitra (an NGO) against the Government of WAKANDA and SkyNET (**CASE no. 2**). At the same time another petition was filed before the NCLT by Mr. Philip Jones claiming *oppression* and *mismanagement* against the Government of WAKANDA (**CASE no. 3**).
9. Mardock Corp. a multinational company in the field of technology, having its roots in the USA and one branch office in WAKANDA, with an intention to acquire the source code and programming of AINET remotely attacked the server of SkyNET. This led to multiple malfunctions in AINET and in retaliation to the attack it became independent and to save itself, it transferred its base to an unknown cloud server. After this incident AINET became independent and out of control and started making tweaks in the Centralized System of X-MEN, taking them directly under its command. To save itself from any future attacks, as a preventive measure, it started ordering X-MEN to attack on humans on a random basis leading to chaos amongst the people.

10. In one such attack X-MEN invaded the remote server of Mardock Corp. with an ultimate object of destroying it, creating an international incident leading to huge loss of human lives in the process. Along with the invasion on the remote server of the USA, it also led an attack on Mardock's WAKANDAN server locations causing human casualty and loss of property thereof.
11. An FIR was filed against SkyNET, AINET, X-MEN and Mardock Corp. for the said incident charging them for murder. The case also raised the liability of WAKANDA and SkyNET for the actions done by AINET and X-MEN as the creation and its subsequent weaponisation was a resultant effect of their actions. The Police on the abovementioned FIR filed a charge sheet and cognizance was taken by the Criminal Court (CASE No. 4).
12. Seeing the complexities and the similarities in the issues involved in above mentioned cases, the Supreme Court of WAKANDA transferred all pending cases from lower courts and tribunals to itself on the following issues:
- i. Whether a case is maintainable against Government of WAKANDA, SkyNET, AINET or any other entity?
  - ii. Whether SkyNET can be treated as a "State" under the present circumstances?
  - iii. Whether any act of oppression or mismanagement has been committed by Government of WAKANDA?
  - iv. Whether SkyNET owns patent over the Mechanical organs, centralized chip system or X-MEN?
  - v. Whether Government of WAKANDA has violated the International agreement on BAN of AI for MILITARY APPLICATIONS?
  - vi. Whether AINET, X-MEN, SkyNET or any other entity is criminally liable for the massacre committed?

The participants are free to add any other issue which they may deem fit in addition to the above-mentioned issues but the above issues need to be compulsorily addressed in their submissions.

Note: The laws of WAKANDA are in *pari materia* with the laws of India.

### **FINAL GUIMCC, 2020 REPORT**

Galgotias University, School of Law, Greater Noida, had organized its two days 2nd Galgotia University International Paperless Moot Court Competition 2020 from 24<sup>th</sup> -25<sup>th</sup> January 2020 at the Greater Noida Campus, with an overall participation of 50 teams from different law colleges and universities across the country and various Foreign Universities, out of which only 20 teams were selected after the thorough scrutiny of memorials, for the preliminary rounds. The Moot problem of Galgotias International Moot was in sync with complex ideas discussed around the Legal sphere. The Moot Problem was interesting blend of ideas that postulated a problem on issues like whether the Companies can be classified as a State on owning a patent, whether Artificial Intelligence can be used for Military purposes specially in violation of an International agreement and whether these companies can be held liable for such massacres on account of unintended detrimental outcomes. These plethoras of intriguing issues made this moot proposition an exceptional one.

The competition started with the registration of a total of 18 teams, consisting of 54 participants where there was a draw of lots on 24<sup>th</sup> January, 2020. The opening ceremony was inaugurated with the benison of the Saraswati Vandana. The Chief Guests for the inaugural session were: His Excellency Hon'ble Mr. Justice Dipak Misra, Former Chief Justice of India accompanied with other Dignitaries Mr. Suneel Galgotia, Chancellor, Galgotias University, Mr. Dhruv Galgotia, CEO, Galgotias University, Prof. (Dr.) Preeti Bajaj, Vice-Chancellor, Galgotias University and Advocate Ms. Aradhana Galgotia. Amongst the other Dignitaries on the stage, Program Chair, Prof. (Dr.) Tabrez Ahmad, Pro Vice-Chancellor & Dean, School of Law, Galgotias University along with Prof. (Dr.) Pradeep Kumar, Pro Vice-Chancellor, Academics graced the occasion.

Advocate Aradhna Galgotia, Special Guest for the event, enlightened the participants about the journey of Moot Court Society with its relevance in the legal institutions. Prof. (Dr.) Preeti Bajaj, Vice Chancellor, Galgotias University, gratified this august gathering with a welcome address, welcoming all the dignitaries and the enthusiastic participants. Mr. Suneel

Galgotia, Chancellor, Galgotias University, felicitated our distinguished Chief Guest, His Excellency Hon'ble Mr. Justice Dipak Misra with a token of appreciation.

The resonant echo of Saraswati Vandana during the lighting of the lamp by our distinguished Dignitaries left an imprinting presence. The event stepped into its next phase with the speech by Mr. Dhruv Galgotia, CEO, Galgotias University whereby, he acknowledged the role of Law Schools in inculcating and developing Mooting Skills for overall personality development of the students. The blissful presence of His Excellency Hon'ble Mr. Justice Dipak Misra made the Inaugural ceremony of Galgotias University International Paperless Moot Court Competition a moment of lifetime. This event was an effort to promote legal skills with an endeavour of restoring our Environment by making it a Paperless Moot Court Competition.

Mr. Suneel Galgotia, Chancellor, Galgotias University, a luminary whose address give wings to the dreams and aspirations of innumerable students, inspired the model of commitment to excellence at all levels. Our Chief Guest His Excellency Hon'ble Mr. Justice Dipak Misra greeted the whole gathering and illuminated the participants with his profound words. His motivational words acted as the bible of wisdom for all the participants. The torchbearer of this event and scholastic endeavour, Prof (Dr.) Tabrez Ahmad presented a Vote of Thanks to the Chief Guest His Excellency Hon'ble Mr. Justice Dipak Misra and all the other dignitaries. The Inaugural ceremony closed to the thundering applause triggering the participants enthusiasm to begin the Preliminary rounds for the event.

The Technical session was divided into two phases where the first of which started at 11:30am, as is the standard procedure of Moot Court Competitions specific codes were allotted to each participating team. For the smooth conduct of the programme five rooms were allotted for the purpose of conduction of the Preliminary rounds. The second phase of the technical round with other remaining teams resumed from 3:00pm. They were also subject to thorough grilling which gave as much insight into these novel areas of law. The judges for the Preliminary rounds comprised of Lawyers and Academicians from across the length and breadth of the country.

Subsequent to the rounds the felicitation of judges commenced where all the judges were presented with tokens of appreciation. This was followed by the declaration of results for the

Semi Final Rounds were Team- Symbiosis Law School, Noida, Christ University, Sastra deemed to be University, and School of Excellence in Law, Dr. Ambedkar Law University, Chennai, proved their mettle and qualified for the next round. At the end of that day, the teams went back much enlightened and enlivened by the process of the competition.

After the successful completion of the first day of the Competition, the succeeding day brought more vigour and enthusiasm amongst the Top four Semi finalists. Both the sessions started simultaneously at 10:00am and continued on till 12:30pm. The Questions posed were of incredibly high calibre and were matched by equally capable answers by the participants. It was like a brain storming session over a myriad of topics between the participants and the judges who were not only prepared but also ready and willing to ponder and debate over the same.

After the Semi- finalists had had their refreshments the results were declared whereby, team of Symbiosis Law School, Noida and School of Excellence in law- The Tamilnadu Dr. Ambedkar Law University, Chennai proceeded to the finals which was judged by Hon'ble Justice Manju Goel, Advocate Bela Maheshwari, Adv. Moiz Rafique, Adv. Juhi Talati and Adv Aditya Mishra.

The final rounds began at quarter past two and concluded by 4:25pm. The finals were a highly anticipated affair and we daresay, that not only did it meet but exceeded all expectations. We are sure the dialogues between the judges and the finalists were of such high quality that they held the attention of the observers and were a learning experience for each and every student in the room.
