

## **School of Law organized a workshop on “Research Methodology”**

### **Text:**

A research problem is a specific issue, difficulty, contradiction, or gap in knowledge that you will aim to address in your research. You might look for practical problems aimed at contributing to change, or theoretical problems aimed at expanding knowledge.

Bear in mind that some research will do both of these things, but usually the research problem focuses on one or the other. The type of research problem you choose depends on your broad topic of interest and the type of research you want to do.

This Session of the Workshop on Research Methodology makes the PG students to identify and refine a research problem.

Students have learnt various forms of research problems and their identification., What are the dos and don'ts the researcher have to kept in mind to identify a good research problem

Formulation of Research Problem - Microsoft PowerPoint

**Introduction**

If one wants to solve a problem, one must generally know what the problem is. Like a doctor a researcher must examine all the symptoms observed by him. The formation of the topic into a research problem is the first step in a scientific inquiry. Problem is a question proposed for solution. It is -

- Identification & Selection
- Formulation
- Solution
