School of Law (SOL)

Centre for International Law (CIL)

“Conflict in Outer Space: A threat to International Peace and Security”

About Galgotias University

The Galgotias University, Uttar Pradesh, sponsored by Smt. Shakuntala Educational and Welfare Society, has been established by state of Uttar Pradesh under section 2(f) of the UGC Act, 1956 vide The Galgotias University Uttar Pradesh Act, 14 of 2011. The University commenced its operation from the academic session 2011-12 with approximately 1,700 undergraduate and post-graduate students in July of 2011. Now in year 2021, the university has grown to more than 13000 students. We have 13 schools with 49 UG programs 40 PG programs and 21 PhD programs approvals from various Councils

The 'students-first' philosophy is a big reason why Galgotias University is consistently ranked among India's top universities. The focus of Galgotias University is on low student-to-faculty ratio that promotes plenty of personal attention and mentoring opportunities. The record-breaking placement at Galgotias this year is an apt testimony to its focus on upholding the highest academic standards right from selecting top faculty, introducing world-class pedagogical practices to personality development of the students.

School of Law

Galgotias University initiated School of Law (recognized by the Bar Council of India) as a part of this mission of providing quality legal education. The school is focused on producing litigation

specialists, corporate lawyers, mediation & arbitration experts, and professionals to draft legal instruments, policy makers, researchers and academic, diplomats, comparative law experts for burgeoning LPO industry and others skilled to meet the diverse requirement of legal human resource.

Galgotias School of Law offers world-class infrastructure including Library that's well-stocked with thousands of Books, academic and reporting Journals and other reference materials. It also has access to numerous online Legal databases. Wi-Fi enabled campus enables the students to access the online legal database and stay updated. Classrooms are well equipped with LCD projectors and other IT tools for education. The school also has a Moot Court Hall to help students get practical court-room lessons.

About the Organizer: Centre for International Law

International law, with its set of rules established through treaty or custom, is the key to stable international relations, collective security, and sustainable development. When international law is not respected, insecurity and inequalities, become the norm.

The Centre for International Law as a research centre at School of Law, Galgotias University responds to some of the most pressing regional and global challenges, by conducting research and bringing to the fore the role of international law in addressing the current needs of society. The Centre for International Law convenes expert discussions and training to further advance the development of international law.

About the Webinar

As our philosophy is "Student-first" we also realize that along with studies it is important for students to see and learn from a living inspiration as well. Interactions of students with esteemed personalities during such programs motivate them and make them realize the importance of hard work in their professional life.

For this purpose, the "Centre for International Law", at School of Law, of Galgotias University, is planning to organize a webinar on the topic "Conflict in Outer Space: A threat to International Peace and Security" which would give the students an opportunity to learn from some of the eminent professionals/academician/experts related to subject.

To understand the renewed focus on outer space, it is important to understand the ways in which space-based technologies matter. While we may not be aware of it on a day-to-day basis, our 21st century interactions and movements are highly dependent upon outer space. Satellite technologies are an inherent part of our use of Internet and e-mail; telecommunications; weather forecasting; disaster management; GPS for navigation, traffic regulation, and civil aviation; precision timing for financial transactions, and satellite remote sensing for geographical or topographical mapping. The invisibility of the space technology required for these activities means that most of us are disconnected from the importance of space in today's commercial, military, and political arenas.

It is important to understand that space has been militarized since humans first accessed outer space and that military activities on Earth will continue to be dependent on space-based technologies.

Considering the importance of the subject the webinar is organized on the below mentioned topic.

Details for the Webinar

7th October - Timing: 4:00 P.M. – Onward's

Welcome Address by: Prof (Dr.) Namita Singh Malik

Vote of Thanks by: Dr. Shweta Thakur

Moderator: Dr. Aruna Kammila (Associate Professor & In-Charge, (CIL))
