(Geotag) Photograph-2	

	
<p>Description (min 250 to max 800 words)*</p>	<p>HR metrics are measurements used to determine the effectiveness and efficiency of HR policies. Metrics help compare different data points. Nowadays, good Organizations are using this technique. HR metrics are measurements used to determine the effectiveness and efficiency of HR policies. Metrics help compare different data points. For example, if turnover was 5% last year and is now 7.5%, it has increased by 50%. The former are data points; the latter is the metric. HR analytics, also called people analytics, is the quantification of people drivers on business outcomes. Analytics measures why something is happening and what the impact is of what's happening. This webinar was to make our students aware of the HR metrics and HR analytics as this is the present and future of HR.</p>
<p>Attendance Sheet*</p>	<p>Attached at the end of Report</p>
<p>Report Submitted by <i>(write faculty coordinator name)</i></p>	<p>Indira P Pradhan.(Assistant Professor) Isha Srivastava. (Assistant Professor)</p>
