Value Added/Enrichment Programs

In recent times, the mushrooming of numerous career opportunities has made it difficult for the students to make an informed choice. Value added and enrichment programs help students focus on enriching themselves to have holistic development and thereby aid in decision making regarding their career choices.

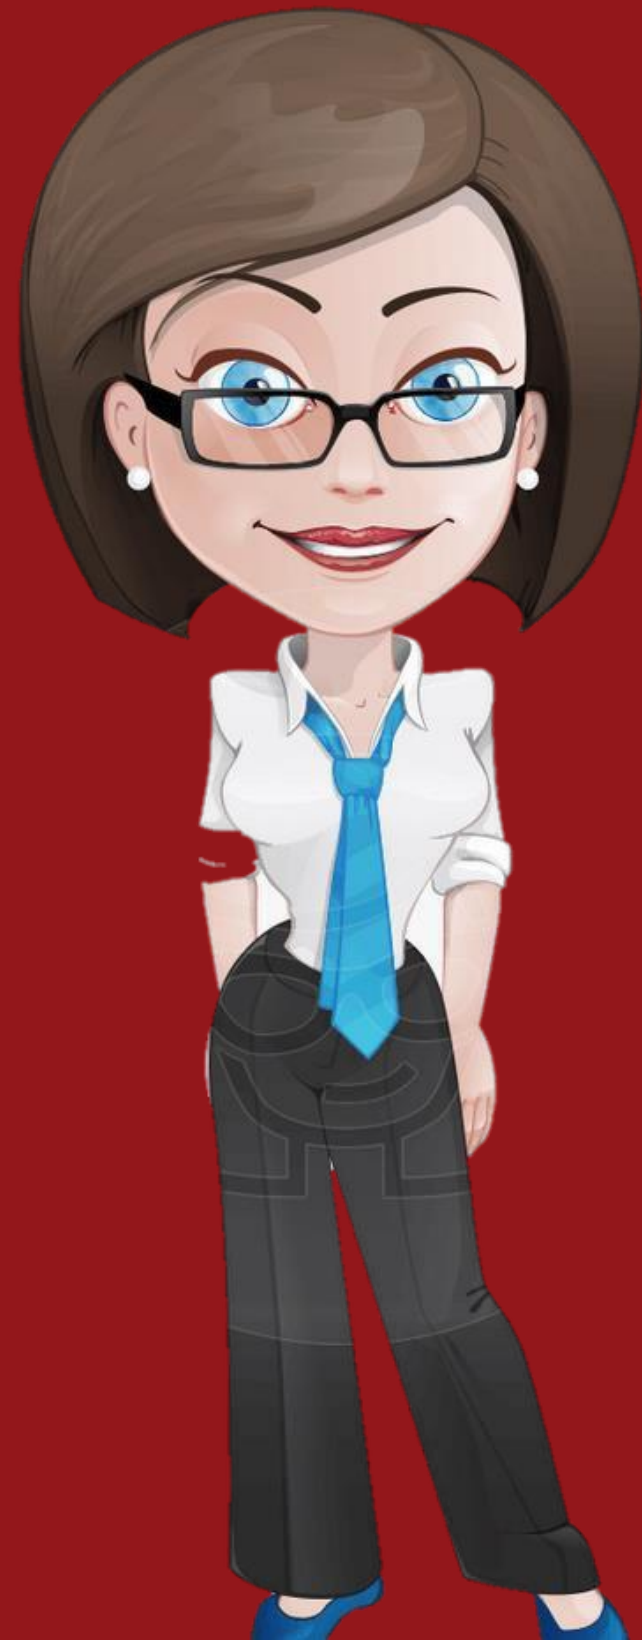

Value-added programs are market-oriented skill-enhancing training courses to help students in learning and gaining exposure to the ever-changing world and combating the cutthroat competition with dynamic technological environment. It helps in developing inter-disciplinary skills to bridge the prevailing gaps between academic and industry standards.

Enrichment programs are organized to deliver special training to the students for developing some critical skills like better communication skills, presentation skills, group discussions, interview skills, writing skills, etc.

SFC has been consistently working towards making its students industry-ready professionals and meeting the global standards by training them through highly intensive training programs. These courses are floated by SFC through out the year.
