Course Objectives: A moot court usually involves drafting briefs (or memorials) and participating in oral argument. It is focused solely on the application of the law to a common set of evidentiary assumptions to which the competitors must be introduced. The case and sides are selected beforehand, and students are given a set amount of time to prepare for the eventual trial. Moot court members research their respective sides, write appellate briefs, and present oral arguments in front of the judges. Judges are free to ask questions at any time during the presentation, and students must respond accordingly.

Course Outcomes

CO1	Identify the legal issues arising from a hypothetical set of facts
CO2	Research the law relevant to these legal issues;
CO3	Formulate legal argument based on this research;
CO4	Apply the law accurately and persuasively;
CO5	Distinguish any case law which runs contrary to the argument being made;
CO6	Formulate an interpretation of the law which is favourable to a particular side of the argument;
CO7	Present the argument articulately and clearly in an oral format;
CO8	Respond to questioning by judges based on the student's presentation observing the etiquette of the courtroom

Course Objectives: The course on specific contracts is closely related to the basic course on the law of contracts, which has been taught during the first semester. It would provide students understanding about the basic principles of contract law as well as give them a practical and wider approach towards the course. Obviously, a course on special contracts should initiate the students to different kinds of contracts with emphasis on the intricacies therein. This course also should provide an insight into the justification for special statutory provisions for certain kinds of contracts. This course which covers Indemnity and Guarantee, Bailment and Pledge, Agency, Partnership and Sale of Goods Act is surely not an exhaustive course covering all the forms and issues related to special contracts but would definitely help the students to understand the nature of jurisprudence involved in such cases, the technique of interpreting such law etc.

Course Outcomes

CO1	Discussing the fundamental principles underlying with special forms of contract.
CO2	Developing a clear interpretation of the law related to special contracts.
CO3	Explaining the rights, duties, remedies of the various parties in such contract which shall ultimately help them in advising their clients.
CO4	Judging the skills of legal analysis and argument.

Course Objectives: Crime is committed against the society though victim may be individual, group or community. The Criminal Procedure code facilitates the seeker of remedy to be assisted by the instrumentalities of the state. The criminal justice system includes one of the most important statutes called the Criminal Procedure Code which in common law system in general and India in particular has adopted the adversarial system based on accusatorial method. In this system prosecutor representing the state brings out the accusation and has to prove the case beyond reasonable doubt and accused get the opportunity for the fair trial. The essence of fair trial under criminal justice system emerges from the premise of presumption of innocence of accused undergoing trial, right of the accused to know accusation against him right from initiation of investigation till filling of challan/charge sheet, taking of cognizance, and framing of charge under judicial Process. Subjecting him to defend the charges during trial wherein trial process and evidence adduced are taken in his presence and understanding. The entire process is conducted in open court with right to appeal and approach the highest court of this land. Thus trilogy of the investigation, inquiry and trial under the Criminal procedure Code is directed towards fair and equitable remedy to the victim and the adequate protection to accused to prove his innocence.

Course Code	BALB3022			
Prerequisite	Legal Methods			
Corequisite	Understanding of Statutes			
Anti-requisite				
	L	T	P	C
	3	1	0	4

Course Objectives:

Interpretation of Statutes is the way to understand the laws which we study and practice whole of our lives. To understand the contents of a statute is one thing and to interpret, apply and decide or counsel on the basis of same is another. This is a common law based paper, where we are dealing with a statute throughout but there is no statute to study it. It mainstreams the purpose, general guidelines, rules and principles which govern interpretation of written law i.e. legislation. It is also an area of vibrant intellectual debate, as scholars, Supreme Court and High Courts of India, and others debate the methods and aims of statutory interpretation. This course will stress up on both the practical and theoretical dimensions of interpretation. Students will learn and apply the methods of statutory interpretation. We will also spend considerable time on contemporary controversies, such as debates about literal, liberal, purposive and mischief rules of interpretation; about the use of legislative history and canons of construction; about the special interpretive problems that arise in the context of federal democracy; about the constitutional basis and other purposes of statutes and their interpretation. Readings will draw from Indian Legal System as well as law. The inter-disciplinary and policy based approach would be key. Elements used in grading would be class participation, internal assessment, assignments and final exam.

Course Outcomes

CO1	Explain the role of interpretation in context of statutes and the rules required to carry out such an interpretation (K2)
CO2	Apply and analyse various rules of interpretation in context of existing judicial decisions or hypothetical situations (K4)
CO3	Develop an understanding of the use of various aids required in carrying out a proper interpretation (K5)
CO4	Understand the application of the principles of interpretation in context of various types of statutes (K3)
CO5	Analyse the notable principles of constitutional interpretation that have evolved due to judicial decision making (K4)

Course Objectives:

International trade is a complicated area of law because there are numerous levels of trade organizations and interactions. There are bilateral trade agreements, regional trade agreements and multilateral trade agreements. Each of these agreements has its own history, policies and dispute settlement procedures. This course will deal with the law relating to WTO, regional trade agreements on international trade, dispute settlement mechanisms, and international sales. Apart from the relevant Indian laws, the focus will be mainly upon the international legal conventions and Indian legal system in these areas. As this sect of Law consists of a mix of public international law and domestic/national law, applicable to commercial transactions, other related enactments will also be discussed in detail.

Course Outcomes

CO1	Understand the basic understanding of the normative, institutional framework and robust mechanism for the regulation of international trade.
CO2	Understand the importance of Law of International Trade in an increasingly globalized world of complex international economic relations.
CO3	Explaining the role of International bodies which regulates International Trade
CO4	Analyze the practices and approach of India on various issues attached to International trade, particularly as an emerging global economic power.
