

# GALGOTIAS UNIVERSITY

## Syllabus of Bachelor of Optometry

---

**Name of School:** School of Medical & Allied Sciences

**Department:** Paramedical and Allied Health Sciences

**Year:** 2016-2020

## **School of Medical and Allied Sciences**

(Established under Galgotias University Uttar Pradesh Act No. 14 of 2011)

## **Program: B. Optometry**

**Scheme: 2016 – 2020**

## Course Curriculum

### Year I (Semester I)

S. No	Course Code	Subject	L	T	P	C	Evaluation Scheme		
							Internal	External	Total
1.	OPT101	Anatomy -I	3	0	0	3	30	70	100
2.	OPT102	Physiology - I	3	0	0	3	30	70	100
3.	OPT103	Basic Biochemistry	3	0	0	3	30	70	100
4.	EVS102	Energy and Environmental Sciences	3	0	0	3	30	70	100
5.	OPT151	Anatomy- I (P)	0	0	2	1	30	70	100
6.	OPT152	Physiology- I (P)	0	0	2	1	30	70	100
7.	OPT153	Basic Biochemistry-I (P)	0	0	2	1	30	70	100
		<b>Total credits</b>				<b>15</b>			
<b><u>Semester- II</u></b>									
1.	OPT104	Ocular Anatomy	3	0	0	3	30	70	100
2	OPT105	Ocular Microbiology	3	0	0	3	30	70	100
3	OPT106	Computer Fundamentals	3	0	0	3	30	70	100
4	OPT 107	Physical Optics	3	0	0	3	30	70	100
5	OPT 108	Nutrition	3	0	0	3	30	70	100
6	OPT154	Ocular Microbiology (P)	0	0	2	1	30	70	100
7	OPT155	Physical Optics (P)	0	0	2	1	30	70	100
8	OPT156	Computer Fundamentals (P)	0	0	2	1	30	70	100
		<b>Total credits</b>				<b>18</b>			

## Year II (Semester III)

S. No	Course Code	Subject	L	T	P	C	Evaluation Scheme		
							Internal	External	Total
1.	OPT201	Ocular Pharmacy and Pharmacology	3	0	0	3	30	70	100
2.	OPT202	Refraction	3	0	0	3	30	70	100
3.	OPT203	Ocular disease(Anterior Segment)	3	0	0	3	30	70	100
4.	ENG131	Communicative English-1	2	0	0	2	30	70	100
5.	OPT251	Ocular pharmacy and pharmacology (Lab)	0	0	2	1	30	70	100
6.	OPT252	Refraction (Lab)	0	0	2	1	30	70	100
7.	OPT253	Ocular disease (Anterior Segment ) (Lab)	0	0	2	1	30	70	100
8.	ENG181	Communicative English-1(P)	0	0	2	1	30	70	10
		<b>Total credits</b>				<b>15</b>			

## Semester IV

1.	OPT204	Ophthalmic instruments and appliances	3	0	0	3	30	70	100
2.	OPT205	Visual Optics & Lighting of the Eye	3	0	0	3	30	70	100
3.	OPT206	Ophthalmic Lens & Dispensing Optics	3	0	0	3	30	70	100
4.	OPT207	Binocular Vision -I	3	0	0	3	30	70	100
5.	ENG231	Communicative English-II	2	0	0	2	30	70	100
6.	OPT254	Ophthalmic instruments and appliances (Lab)	0	0	2	1	30	70	100
7.	OPT255	Visual Optics & Lighting of the Eye (Lab)	0	0	2	1	30	70	100
8.	OPT256	Ophthalmic Lens & Dispensing Optics ( Lab )	0	0	2	1	30	70	100
9.	ENG281	Communicative English-II (P)	0	0	2	1	30	70	100
		<b>Total credits</b>				<b>18</b>			

### Year III (Semester V)

S. No	Course Code	Subject	L	T	P	C	Evaluation Scheme			
							Internal	External	Total	
1.	OPT301	Binocular Vision- II	3	0	0	3	30	70	100	
2.	OPT302	Contact lens-I	3	0	0	3	30	70	100	
3.	OPT303	Low Vision Aids & Visual Rehabilitation	3	0	0	3	30	70	100	
4.	OPT304	Pathology	3	0	0	3	30	70	100	
5.	OVT305	Vision Technician-I	3	0	0	3	30	70	100	
6.	OPT351	Binocular Vision- II (Lab)	0	0	2	1	30	70	100	
7.	OPT352	Contact lens-I (Lab)	0	0	2	1	30	70	100	
8.	OPT353	Low Vision Aids & Rehabilitation(Lab)	0	0	2	1	30	70	100	
9.	OVT354	Vision Technician-I(Lab)	0	0	2	1	30	70	100	
		<b>Total credits</b>					<b>19</b>			

### Semester- VI

1.	OPT305	Systemic Condition & the Eye (Posterior Segment Disease )	3	0	0	3	30	70	100	
2.	OPT306	Geriatric & Pediatric Optometry	3	0	0	3	30	70	100	
3.	OPT307	Contact lens-II	3	0	0	3	30	70	100	
4.	OPT308	Dispensing Optometry	3	0	0	3	30	70	100	
5.	OVT309	Vision Technician-II	3	0	0	3	30	70	100	
6.	OPT354	Systemic Condition & the Eye (Posterior Segment Disease ) (Lab)	0	0	2	1	30	70	100	
7.	OPT355	Contact lens-II(Lab)	3	0	2	1	30	70	100	
8.	OPT356	Dispensing Optometry(Lab)	0	0	2	1	30	70	100	
9.	OVT357	Vision Technician-II(Lab)	0	0	4	2	30	70	100	
		<b>Total credits</b>					<b>20</b>			

## Year IV Semester VII

S.No	Course Code	Subject	L	T	P	C	Evaluation Scheme			
							Internal	External	Total	
1.	OPT401	Clinical Internship Including Project Work	0	0	40	20	30	70	100	
		TOTAL	20							

## Semester VIII

S.No	Course Code	Subject	L	T	P	C	Evaluation Scheme				
							Internal	External	Total		
1.	OPT402	Clinical Internship Including Project Work	0	0	40	20	30	70	100		
		TOTAL	20								
		Total Credits							150		

### NOTE:

L – Lecture    T- Tutorial    P- Practical    C-Credits    J- Project Work

CBL-Credit Based Learning

PBL-Project Based Learning

HSS-Healthcare Sector Skill Council

# School of Medical and Allied Sciences

<b>Name of The Course</b>	<b>Anatomy-I</b>			
<b>Course Code</b>	<b>OPT101</b>			
<b>Prerequisite</b>				
<b>Corequisite</b>				
<b>Antirequisite</b>				
	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	3	0	0	3

## Course Objective:

1. Describe the gross structure of human body
2. Describe , specifically musculo-skeletal, Cardio-respiratory and nervous system.
3. Apply the anatomical principles in the practice of Optometry.

## Course Outcomes:

<b>CO1</b>	To identify and describe the structure of various systems of the Human Body- especially Musculo-skeletal system, Cardio-vascular system.
<b>CO2</b>	To identify and palpate the various joints, muscles, nerves and other soft tissues of the upper and lower extremities and the organs in the thoracic cavity.
<b>CO3</b>	To be able to apply the knowledge for the assessment of pathological conditions (orthopedic conditions,) and differentiation of normal anatomical structure from the pathological conditions.
<b>CO4</b>	To be able to apply the knowledge for the assessment of pathological conditions (Neurological conditions, cardio-vascular conditions) and differentiation of normal anatomical structure from the pathological conditions.
<b>CO5</b>	To be able to apply the knowledge for the assessment of pathological conditions ( cardio-vascular conditions) and differentiation of normal anatomical structure from the pathological conditions.

## Text Books

1. BD Chaurasia: Handbook of general Anatomy, Third edition, CBS Publishers, New Delhi, 1996
2. GJ Tortora, B Derrickson: Principles of Anatomy and Physiology, 11th edition, John Wiley & Sons Inc, 2007

## Reference Books

1. H.McMinn, John Pegington, Peter H. Abrahams. A Color Atlas of Human Anatomy 3<sup>rd</sup> edition, M, Mosby, 1996, ISBN: 978-0815158585
2. Richard S. Snell. Clinical Anatomy for Medical Students 6<sup>th</sup> edition, Lippincott Williams & Wilkins, 2000, ISBN: 9780781715744
3. Derek Field. Field's Anatomy, Palpation and Surface Marking 4<sup>th</sup> edition, Butterworth-Heinemann Ltd, 2006, ISBN : 978-0750688482

## Course Content

<b>Unit I</b>	8 Hrs
❖ Introduction and concepts	
❖ Terminologies	
❖ Muscle classification, structure and functional aspect.	
❖ Nerve-structure, classification with examples.	
❖ Neurons-classification with examples, simple reflex arc. Parts of typical spinal curve/Dermatomes.	
❖ Joints-classification, structures of joint, movements, range limiting factors, stability, blood supply, nerve supply, dislocations and applied anatomy.	

## School of Medical and Allied Sciences

<b>Unit II</b> <ul style="list-style-type: none"> <li>❖ Circulatory system-Parts of heart, blood supply, major arteries and veins of the body, structure of blood vessels.</li> <li>❖ Lymphoid system-circulation &amp; function, lymphoid organs and their structure and functions.</li> <li>❖ Integumentary system, Skin &amp; its appendages, flexion creases, Langer's lines, Superficial and Deep Fascia, Tendons, Ligaments, aponeuroses, bursae</li> </ul>	8 Hrs
<b>Unit III</b> <b>UPPER EXTRIMITY</b> <ul style="list-style-type: none"> <li>❖ Bony architecture</li> <li>❖ Joints – structure, range of movement</li> <li>❖ Muscles – origin, insertion, actions, nerve supply</li> <li>❖ Major nerves – course, branches and implications of nerve injuries</li> <li>❖ Surface Anatomy</li> </ul>	8 Hrs
<b>Unit IV</b> <b>UPPER EXTRIMITY</b> <ul style="list-style-type: none"> <li>❖ Bony architecture</li> <li>❖ Joints – structure, range of movement</li> <li>❖ Muscles – origin, insertion, actions, nerve supply</li> <li>❖ Major nerves – course, branches and implications of nerve injuries</li> <li>❖ Surface Anatomy</li> </ul>	8 Hrs
<b>Unit V</b> <b>THORAX</b> <ul style="list-style-type: none"> <li>❖ Thoracic cage</li> <li>❖ Pleural cavities &amp; Pleura</li> <li>❖ Lungs and Respiratory tree</li> <li>❖ Mediastinum &amp; Pericardium</li> <li>❖ Heart and great vessels</li> <li>❖ Diaphragm &amp; Surface Anatomy</li> </ul>	8 Hrs

### Continuous Assessment Pattern

Internal Assessment (IA)	Mid Term Test (MTE)	End Term Test (ETE)	Total Marks
	<b>30</b>	<b>70</b>	<b>100</b>

# School of Medical and Allied Sciences

<b>Name of The Course</b>	<b>Physiology-I</b>			
<b>Course Code</b>	<b>OPT102</b>			
<b>Prerequisite</b>				
<b>Corequisite</b>				
<b>Antirequisite</b>				
	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

## Course Objective:

The basic objective of this course is to get familiar with human physiology

## Course Outcomes:

At the end of the course, students will be able to:

<b>CO1</b>	On completion of this course, the students will be able to understand-scope and importance of cell,
<b>CO2</b>	On completion of this course, the students will be able to understand-scope and importance of cell physiological laws
<b>CO3</b>	On completion of this course, the students will be able to understand-scope and importance of blood groups.
<b>CO4</b>	On completion of this course, the students will be able to understand-scope and importance of blood transfusion.
<b>CO5</b>	On completion of this course, the students will be able to understand-scope and importance of fundamentals of different organ systems.

## Text Books

1. . A.K Jain, Human Physiology
2. Chatterjee, C C, Human Physiology, Medical Allied Agency

## Reference Books

1. Guyton, Arthur, Text Book of Physiology, Prism Publishers
2. Chatterjee, C C, Human Physiology, Medical Allied Agency

## Course Content:

<b>Unit I</b> <b>Cell</b> Definition, Structure and function of Cytoplasmic Organelles, Reproduction-Meosis, Mitosis.	8 Hrs
<b>Unit II</b> <b>The important physico-chemical laws applied to physiology</b> Diffusion, Osmosis, Bonding, Filtration, Dialysis, Surface Tension, Adsorption, Colloid.	8 Hrs
<b>Unit III</b> <b>Introduction- composition and function of blood</b> Red blood cells- Erythropoiesis, stages of differentiation function, counts physiological Variation. Haemoglobin -Structure, function, concentration physiological variation. Methods of Estimation of Hb, White blood cell- Production, function, life span, count, differential count. Platelets- Origin, normal count, morphology functions. Plasma Proteins- Production, concentration, types, albumin, globulin, fibrinogen, Prothrombin functions. Haemostasis & Blood coagulation. Haemostasis – Definition, normal haemostasis, clotting factors, mechanism of clotting disorders of clotting factors. Blood Bank, Blood groups- A, B, O system, Rh system,	8 Hrs

## School of Medical and Allied Sciences

### Unit IV

8 Hrs

Circulation: General principles Heart: myocardium – innervation – transmission of cardiac impulse Events during cardiac cycle – cardiac output. Peripheral circulation: peripheral resistances – arterial blood pressure – measurements – factors regulation variations – capillary circulation – venous circulation. Special circulation: coronary cerebral – miscellaneous.

### Unit V

8 Hrs

Respiration: Mechanics of respiration – pulmonary function tests – transport of respiratory gases- neural and chemical regulation of respiration – hypoxia, cyanosis, dyspnoea – asphyxia.  
Excretion: Body fluids – distribution, measurement & exchange, Kidney – structure of nephron – mechanism of urine formation – composition of the urine and abnormal constituents – urinary bladder & micturition

### Continuous Assessment Pattern

Internal Assessment (IA)	Mid Term Test (MTE)	End Term Test (ETE)	Total Marks
	30	70	100

# School of Medical and Allied Sciences

<b>Name of The Course</b>	<b>Basic Biochemistry</b>			
<b>Course Code</b>	<b>OPT103</b>			
<b>Prerequisite</b>				
<b>Corequisite</b>				
<b>Antirequisite</b>				
	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

## Course Objectives

1. To understand the basic biochemistry.

### Course Outcomes

At the end of the course, students will be able to:

<b>CO1</b>	On completion of this course, the students will be able to understand Structure, function and interrelationship of biomolecules
<b>CO2</b>	On completion of this course, the students will be able to understand consequences of deviation from normal
<b>CO3</b>	On completion of this course, the students will be able to understand. Integration of the various aspects of metabolism, and their regulatory pathways
<b>CO4</b>	On completion of this course, the students will be able to understand Principles of various conventional and specialized laboratory investigations
<b>CO5</b>	On completion of this course, the students will be able to understand analysis and interpretation of a given data.

### Text Books

1. S. Ramakrishnan, K G Prasanna and R Rajan: Text book of Medical Biochemistry, Orient Longman, Madras, 1990
2. D.R. Whikehart: Biochemistry of the Eye, 2nd edition, Butterworth Heinemann, Pennsylvania, 2003

### Reference Books:-

1. S. Ramakrishnan, K G Prasanna and R Rajan: Text book of Medical Biochemistry, Orient Longman, Madras, 1990
2. D.R. Whikehart: Biochemistry of the Eye, 2nd edition, Butterworth Heinemann, Pennsylvania, 2003

## Course Content

<b>Unit I</b> Carbohydrates: Glucose; fructose; galactose; lactose; sucrose; starch and glycogen (properties and tests, Structure and function)	8 Hrs
<b>Unit II</b> Proteins: Amino acids, peptides, and proteins (general properties & tests with a few examples like glycine, tryptophan, glutathione, albumin, hemoglobin, collagen)	8 Hrs
<b>Unit III</b> Lipids: Fatty acids, saturated and unsaturated, cholesterol and triacylglycerol, phospholipids and plasma membrane	8 Hrs
<b>Unit IV</b> Vitamins: General with emphasis on A,B2, C, E and inositol (requirements, assimilation and properties)	8 Hrs

## School of Medical and Allied Sciences

**Unit V**

8 Hrs

Minerals: Na, K, Ca, P, Fe, Cu and Se(requirements, availability and properties)

Mode of Evaluation: The theory and lab performance of students are evaluated separately

### Continuous Assessment Pattern

Internal Assessment (IA)	Mid Term Test (MTE)	End Term Test (ETE)	Total Marks
	30	70	100

# School of Medical and Allied Sciences

<b>Name of The Course</b>	<b>Energy and Environmental Sciences</b>			
<b>Course Code</b>	EVS102			
<b>Prerequisite</b>				
<b>Corequisite</b>				
<b>Antirequisite</b>				
	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

## Course Objectives

1. To develop awareness about our environment.

To develop a concern about sustainable development

## Course Outcomes

At the end of the course, students will be able to:

<b>CO1</b>	Understand About environment and its components and Problems associated with natural resources and their sustainable use
<b>CO2</b>	Chemical Toxicity of the chemicals in the environment and Sources of pollution in air , water and soil and Solid waste management and natural Disaster management
<b>CO3</b>	Understanding about social issues
<b>CO4</b>	Understanding of role of information technology to address environmental issues.
<b>CO5</b>	Application of sustained Chemistry

## Text Books

1. Environmental Studies, Anubha Kaushik, C P Kaushik, New Age International Publishers, 2008, ISBN:978-81-224-2159-0.
2. Environmental Studies, Suresh K. Dhameja, S.K. Kataria and Sons , 2008, ISBN: 81-88458-77-5
3. Text Book of Environmental Studies, Erach Bharucha, University Press (India) Private Limited, 2005,ISBN: 978 81 7371 540 2
4. Environmental Studies ( From Crisis to Cure) Second Edition. , R. Rajagopalan, Oxford University Press, 2012, ISBN 0-19-807208-2.
5. Environmental Studies, Ranu Gadi, Sunitta Rattan, Sushmita Mohapatra, S.K. Kataria and Sons , 2008, ISBN: 81-89757-98-9.

## Reference Books

1. Environmental Studies , Benny Joseph , Tata McGraw Hill Education Private Limited, 2009, ISBN: 987-0-07-064813-5.
2. Environmental Studies, Anindita Basak, Pearson Education, 2009, ISBN: 978-81-317-2118-6.
3. Principles of Environmental Science (Inquiry and Applications), William P. Cunningham & Mary Ann Cunningham, Tata McGraw Hill Education Private Limited,2007, ISBN: 987-0-07-064772-0.

## Course Content

<p><b>Unit I: Environment &amp; Natural Resources</b> <span style="float: right;"><b>8 hours</b></span></p> <p>Definition, scope, importance, need for public awareness, Environmental Management Systems its objectives, components, EIA, Natural Resources – forest resources – use, exploitation, deforestation, construction of multipurpose dams – effect on forests, Water resources – use of surface and subsurface water; effect of floods, drought, water conflicts, Mineral resources – Use and exploitation, environmental effects of extracting and using mineral resources, Food resources – food problems, advantage and disadvantage of fertilizers &amp; pesticides, effect on environment, Energy resources – need to develop renewable energy, land resources – Land degradation, landslides, soil erosion, desertification &amp; case studies.</p>
---

## School of Medical and Allied Sciences

<b>Unit II: Chemical Toxicology</b> <span style="float: right;"><b>8 hours</b></span> Toxic chemicals in the environment, Impact of toxic chemicals on enzymes, biochemical effects of arsenic, cadmium, lead, chromium, mercury, biochemical effects of pesticides
<b>Unit III: Environmental Pollution</b> <span style="float: right;"><b>8 hours</b></span> Definition – Causes, pollution effects and control measures of Air, Water, Soil, Marine, Noise, Thermal, Nuclear hazards. Solid waste management: causes, effects and control measures of urban and industrial wastes, pollution measures, case studies, Disaster management: floods, earthquake, cyclone and landslides.
<b>Unit IV : Social Issues, Human Population and the Environment</b> <span style="float: right;"><b>8 hours</b></span> Urban problems related to energy & sustainable development, water conservation, problems related to rehabilitation – case studies, Consumerism and waste products - Environment Protection Act, Air, Water, Wildlife, Forest Conservation Act, Environmental legislation and public awareness. Population growth, variation among nations, Population explosion, Environment and human health, Value Education, Women and Child Welfare, Role of Information Technology – Visit to local polluted site /Case Studies.
<b>Unit V: Green Chemistry</b> <span style="float: right;"><b>9 hours</b></span> Introduction, Basic principles of green technology, concept of Atom economy, Tools of Green technology, zero waste technology.

### Course Objectives

At the end of the course, the student should be able to: demonstrate his knowledge and understanding on:

1. Structure, function and interrelationship of biomolecules and consequences of deviation from normal.
2. Integration of the various aspects of metabolism, and their regulatory pathways.
3. Principles of various conventional and specialized laboratory investigations and instrumentation, analysis and interpretation of a given data.

**TEXT BOOK:** S. Ramakrishnan: Essentials of biochemistry and ocular biochemistry, Annamalai University Publications, Chidambaram, India, 1992

### REFERENCE BOOKS:

1. S. Ramakrishnan, K G Prasannan and R Rajan: Text book of Medical Biochemistry, Orient Longman, Madras, 1990
2. D.R. Whitehart: Biochemistry of the Eye, 2nd edition, Butterworth Heinemann, Pennsylvania, 2003

### Course Outcome

<b>CO-I</b>	Students should be able to understand structure, function, interrelationship of biomolecules, principles of various aspects of metabolism and their regulatory pathways
-------------	---

### LIST OF EXPERIMENTS:

1. Qualitative analysis of abnormal constituents of urine
2. Demonstration of blood gas and electrolytes
3. Demonstration of glucometer
4. Qualitative analysis of unknown carbohydrates
5. Demonstration of osazone reaction
6. Estimation of photometry- standard graphs for estimation of serum- blood glucose and proteins

### Continuous Assessment Pattern

<b>Internal Assessment (IA)</b>	<b>End Term Test (ETE)</b>	<b>Total Marks</b>
<b>30</b>	<b>70</b>	<b>100</b>

# School of Medical and Allied Sciences

<b>Course Code</b>	<b>OPT104</b>			
<b>Prerequisite</b>				
<b>Corequisite</b>				
<b>Antirequisite</b>				
	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

## Course Objective:

The objective of the course is to:

1. . Comprehend the normal disposition, inter-relationships, gross, functional and applied anatomy of various structures in the eye and adnexa.
2. Identify the microscopic structures of various tissues in the eye and correlate the structure with the functions.
3. Comprehend the basic structure and connections between the various parts of the central nervous system and the eye so as to understand the neural connections and distribution.
4. To understand the basic principles of ocular embryology.

## Course Outcomes

At the end of the course, students will be able to:

<b>CO1</b>	Relate the normal disposition, inter-relationships, gross, functional and applied anatomy of various structures in the eye and adnexa.
<b>CO2</b>	Generalise the microscopic structures of various tissues in the eye and correlate the structure with the functions.
<b>CO3</b>	Generalise the basic structure and connections between the various parts of the central nervous system and the eye so as Understand the neural connections and distribution.
<b>CO4</b>	Generalise the basic principles of ocular embryology
<b>CO5</b>	Generalise the basic principles of ocular embryology

## Text Books

1 L A Remington: Clinical Anatomy of the Visual System, Second edition, Elsevier Butterworth Heinemann, Missouri, USA, 2005.

## Reference Books

1 AK Khurana, Indu Khurana: Anatomy and Physiology of Eye, Second edition, CBS Publishers, New Delhi, 2006

## Course Content

<b>Unit I: Central nervous system</b>	<b>8 hours</b>
1.1 Spinal cord and brain stem 1.2 Cerebellum 1.3 Cerebrum.	
<b>Unit II: Orbit</b>	<b>8 hours</b>
Orbit 2.1 Eye 2.2 Sclera 2.3 Cornea 2.4 Choroid 2.5 Ciliary body 2.6 Iris 2.7 Retina	
<b>Unit III: Refractory media-</b>	<b>8 hours</b>
3.1 Aqueous humor	

## School of Medical and Allied Sciences

3.2 Anterior chamber 3.3 Posterior chamber 3.4 Lens 3.5 Vitreous body	
<b>Unit IV : Eyelids</b> Eyelids	<b>8 hours</b>
<b>Unit V: Conjunctiva</b> Conjunctiva, Embryology	<b>8 hours</b>

### Continuous Assessment Pattern

OPT 105	OCULAR MICROBIOLOGY	L	T	P	C
Version	Date of Approval:	3	0	0	3
Pre-requisites//Exposure					
Co-requisites					

### Course Objectives

To understand the ocular microbiology

### Course Outcomes

On completion of this course, the students will be able to understand microorganisms infecting eye.

### Catalog Description

This subject involves study of various microorganisms affecting eye, orbit and its immediate relations, conjunctiva, cornea and sclera. This subject enables in understanding various microorganisms causing eye infection.

### Text Books

1. BURTON G.R.W: Microbiology for the Health Sciences, third edition, J.P.Lippincott Co., St. Louis, 1988.
2. M J Pelczar (Jr), ECS Chan, NR Krieg : Microbiology ,fifth edition, TATA McGRAW-HILL Publisher, New Delhi,1993

### Reference Books

1. KJ Ryan, CG Ray: Sherris Medical Microbiology- An Introduction to infectious Diseases, fourth edition, McGRAW HiLL Publisher, NewDelhi, 1994 MACKIE & McCartney Practical Medical Microbiology
2. Sydney m. Finegold & ellen jo baron: Diagnostic Microbiology (DM)

### Course Content

#### MODULE I

1. Introduction to Microbiology
- 2 Types of Microorganisms
- 3 Physiology of Microorganisms – Nutrition, Enzymes, Metabolism and energy, Microbial Growth

#### MODULE II

1. Control of Microbial Growth – Antimicrobial methods and Chemotherapy
2. Microbes versus Humans- The development of Infection, the disease process, pathogenicity and virulence

#### MODULE III

1. Ocular Bacteriology - Gram positive,(Staphylococcus aureus, Staphlococcus epidermidis, Streptococcus, propionibacterium, actinomyces, Nocardia) Bacteria including acid fast bacilli (Mycobacterium tuberculosis, Mycobacterium leprae)
2. Ocular Bacteriology - Gram negative Bacteria (pseudomonas, haemophiilus, Brucella, Neisseria, Moraxella)

**MODULE IV**

1. Spirochetes (Treponema, Leptospiraceae) 1
2. Virology: Classification of Viruses in Ocular Disease, Rubella,
3. Adenovirus, Oncogenic Viruses (HPV, HBV, EBV, Retroviruses), HIV
4. Fungi : Yeasts, Filamentous, Dimorphic

**MODULE V**

1. Intracellular parasites - Chlamydia, Protozoa (Taxoplasmosis, Acanthamoeba,)
2. Helminths ( Toxocariasis, Filariasis, Onchocerciasis, Trematodes)

Mode of Evaluation: The theory and lab performance of students are evaluated separately.

## Course Objectives

The basic objective of this course is to get familiar with computers and programming Language.

## Course Outcomes

Students will learn about basics of computer, programming.

## Catalog Description

### Text Books

1. William E. Fassett, Computer Application in Pharmacy.
2. Computer Fundamentals by balaguruswami
3. Beckett, A.H., and Stenlake, J.B., Practical Pharmaceutical Chemistry, Vol. I&II. The Atherden Press of the University of London.
4. Alexeyev V. "Quantitative Analysis". CBS Publishers & Distributors.

### Reference Books

1. William E. Fassett, Computer Application in Pharmacy.
2. Computer Fundamentals by balaguruswami

## Course Content

### MODULE I

08

Definition and Overview of Computer, Computer classification, Computer Organization, Computer code, computer classification of Boolean algebra. Input Devices Output devices, Storage devices. Computer Software, Types of software. Overview of Computer Networks, LAN, MAN, WAN, Internet, Intranet, network topology. Internetworking: Bridges, Repeaters and Routers

### MODULE II

08

Introduction: Operating system and function, Evolution of operating system, Batch, Interactive, Time sharing and Real Time System. Single User Operating System and Multi-user Operating system, Compare MS-DOS vs. UNIX, Various window features. Internal and External commands in MS-DOS

### MODULE III

08

Introduction to MS-OFFICE-2003, word 2003 Document creation, Editing, formatting table handling, mail merge, Excel-2003, Editing, working Retrieval, Important functions, short cut keys used in EXCEL

### MODULE IV

08

MS-Power point 2003-Job Profile, Elements of Power point , ways of delivering Presentation, concept of Four P's (Planning , Preparation, Practice and Presentation) ways of handling presentations e.g. creating, saving slides show controls, Adding formatting, animation and multimedia effects. Database system concepts, Data models schema and instance. Database language, Introduction to MS-Access 2003, main components of Access tables, Queries, Reports, Forms table handling, working on Query and use of database

**MODULE V**

**08**

Computer applications in Optometry and clinical studies, uses of Internet.

**Mode of Evaluation: The theory and lab performance of students are evaluated separately.**

## Course Objective:

The objective of the course is to:

1. to equip the students with a thorough knowledge of properties of light. At the end of this course, students will be able to predict the distribution of light under various conditions

## Course Outcomes

At the end of the course, students will be able to:

<b>CO1</b>	A thorough demonstrative knowledge of properties of light
<b>CO2</b>	To interpret the distribution of light under various conditions
<b>CO3</b>	Demonstrate and explain the various refractive conditions based on the different phenomenon of light
<b>CO4</b>	Explain and demonstrate the knowledge in correcting the refractive errors
<b>CO5</b>	To demonstrate the prediction of light through different types of lenses and mirrors

## Text Books

- 1 Subrahmanyam N, BrijLal, A text book of Optics, S. Chand Co Ltd, New Delhi, India, 2003.

## Reference Books

2. Keating NM. P, Geometric, Physical and Visual Optics, Butterworth- Heinemann, Massachusetts, USA, 2002.

## Course Content

<b>Unit I: Nature of Light</b>	<b>8 hours</b>
Nature of light –light as electromagnetic oscillation –wave equation; ideas of sinusoidal oscillations –simple harmonic oscillation; transverse nature of oscillation; concepts of frequency, wavelength, amplitude and phase.	
2. Sources of light; Electromagnetic Spectrum.	
3. Polarized light; linearly polarized light; and circularly polarized light.	
<b>Unit II: Polarised light</b>	<b>8 hours</b>
6 Intensity of polarized light; Malus' Law; polarizers and analyzers; Methods of producing polarized light; Brewster's angle.	
5. Birefringence; ordinary and extraordinary rays.	
6. Relationship between amplitude and intensity.	
7. Coherence; interference; constructive interference, destructive interference; fringes; fringe width.	
<b>Unit III: Interference</b>	<b>8 hours</b>
12 Double slits, multiple slits, gratings.	
9. Diffraction; diffraction by a circular aperture; Airy's disc	
10. Resolution of an instrument (telescope, for example); Raleigh's criterion	
<b>Unit IV LASER</b>	<b>8 hours</b>
Scattering; Raleigh's scattering; Tyndall effect.	
12. Fluorescence and Phosphorescence 2	
13. Basics of Lasers –coherence; population inversion; spontaneous emission; Einstein's theory of lasers.	
<b>Unit V Radiometry</b>	<b>8 hours</b>
. Radiometry; solid angle; radiometric units; photopic and scotopic luminous efficiency and efficacy curves; photometric units	

## School of Medical and Allied Sciences

- |   |
|---|
| 15. Inverse square law of photometry; Lambert's law.<br>16. Other units of light measurement; retinal illumination; |
|---|

OPT 108	NUTRITION	L	T	P	C
Version	Date of Approval:	3	0	0	3
Pre-requisites//Exposure					
Co-requisites					

### Course Objectives

At the end of the course student would have gained the knowledge of the following:

- **Balanced diet.**
- **Protein, carbohydrates, vitamins, Minerals, carotenoids and eye.**
- **Nutrition and Ocular aging**
- **Adverse effects of ocular nutritional supplements.**

### Course Outcomes

The student will be able to understand nutrients and nutrient derivatives relevant to ocular health, nutrition deficiency and ocular disease, Nutrition and ocular aging, and contraindications, adverse reactions and ocular nutritional supplements

### Catalog Description

This course covers the basic aspects of Nutrition for good health. It also includes nutrients and nutrient derivatives relevant to ocular health, nutrition deficiency and ocular disease, Nutrition and ocular aging, and contraindications, adverse reactions and ocular nutritional supplements

### Text Books

1. **M Swaminathan: Hand book of Food and Nutrition, fifth edition, Bangalore printing & publishing Co.Ltd, Bangalore,2004**
2. **C Gopalan, BV Rama Sastri, SC Balasubramanian: Nutritive Value of Indian Foods , National Institute of Nutrition, ICMR, Hyderabad,2004**
3. **Frank Eperjesi & Stephen Beatty: Nutrition and the Eye A practical Approach,**
4. **Elsevier Butterworth – Heinemann, USA, 2006**

### Course Content

#### MODULE I

1. **Introduction to Nutrition and Food Science, Food Groups and Food Pyramid**
2. **Balanced diet for different age groups,**
3. **Assessment of Nutritional Status.**

#### MODULE II

1. **Energy – Units, Metabolisms, Energy expenditure, and Energy imbalance..**
2. **Digestion, absorption and transport of Food**

### 3. Proteins and eye

### 4. Lipids and eye

## MODULE III

1. Carbohydrates and eye.
2. Vitamins and eye
3. Minerals and trace elements and eye

## MODULE IV

1. Carotenoids and eye
2. Oxidative stress and the eye

## MODULE V

1. Vitamin A, C and E deficiency
2. Nutrition and ocular aging
3. Contraindications, Adverse reactions and ocular nutritional supplements

OPT 154	OCULAR MICROBIOLOGY PRACTICAL	L	T	P	C
Version	Date of Approval:	0	0	2	1
Pre-requisites//Exposure					
Co-requisites					

### Course Objectives

To understand the ocular microbiology

### Course Outcomes

On completion of this course, the students will be able to understand practical aspects of microorganisms infecting eye.

### Catalog Description

This subject involves study of various microorganisms affecting eye, orbit and its immediate relations, conjunctiva, cornea and sclera. This subject enables in understanding various microorganisms causing eye infection.

### Text Books

1. Burton g.r.w: Microbiology for the Health Sciences, third edition, J.P. Lippincott Co., St. Louis, 1988.
2. M J Pelczar (Jr), ECS Chan, NR Krieg : Microbiology ,fifth edition, TATA McGRAW-HILL Publisher, New Delhi,1993

2. SYDNEY M. FINEGOLD & ELLEN JO BARON: Diagnostic Microbiology (DM)

### Course Content

Experiments devised to prepare various types of culture media, sub-culturing of common aerobic and anaerobic bacteria, fungus and yeast, various staining methods, various methods of isolation and identification of microbes, sterilization techniques and their validation, validation of sterilization techniques, evaluation of antiseptics and disinfectants, testing the sterility of pharmaceutical products as per I.P. requirements, microbial assay of antibiotics and vitamins.

### SUGGESTED PRACTICALS

1. Study of sterilization methods & equipments
  - Dry heat
  - Moist heat
2. Preparation of various types of culture media.
3. Isolation of bacteria.
4. Sub-culturing of common bacteria, fungi, yeast.
5. Identification and staining of bacteria.
  - Simple staining, Gram staining, Acid fast staining, Hanging drop preparation
6. Evaluation of disinfectants and antiseptics

- Phenol coefficient test, minimum inhibitory concentration.
7. Test for sterility of pharmaceutical products as per IP.  
 8. Microbial assay of antibiotics as per IP.

**Mode of Evaluation:** The theory and lab performance of students are evaluated separately.

**COURSE DESCRIPTION:** This course deals with essential functional English aspects and nuances of the communication skills essential for the health care professionals.

**COURSE OBJECTIVES:**

This course trains the students in oral presentations, expository writing, logical organization and structural support.  
By acquiring skills in the use of communication techniques the students will be able to express better, grow personally and professionally, develop poise and confidence and achieve success.

**TEXT BOOK:**

Graham Lock, **Functional English Grammar: Introduction to second Language Teachers.** Cambridge University Press, New York, 1996.

Gwen Van Servellen. **Communication for Health care professionals: Concepts, practice and evidence,** Jones & Bartlett Publications , USA, 2009

**REFERENCE BOOKS:** Faculty may decide.

**PREREQUISITES:** Basic English equivalent to 10<sup>th</sup> standard of the study.

**COURSE CONTENT**

**MODULE I**

Basics of Grammar

Vocabulary

Synonyms, Antonyms, Prefix and Suffix, Homonyms Analogies and Portmanteau words

**MODULE II**

Active, Passive, Direct and Indirect speech, Prepositions, Conjunctions and Euphemisms

**MODULE III**

Letter Writing, Email, Essay, Articles, Memos, one word substitutes, note making and Comprehension

**MODULE IV**

Summary writing, Creative writing, newspaper reading

**MODULE V**

**Formal speech, Phonetics, semantics and pronunciation**

**Mode of Evaluation:** The theory performance of students is evaluated as:

**REFERENCE BOOKS:** Faculty may decide.

**PREREQUISITES:** Basic English equivalent to 10<sup>th</sup> standard of the study.

### **COURSE CONTENT**

#### **PRACTICAL (Total: 15 hours)**

- Communication process.
- Elements of communication
- Barriers of communication and how to overcome them.
- Nuances for communicating with patients and their attenders in hospitals

- Importance of speaking efficiently
- Voice culture.
- Preparation of speech. Secrets of good delivery
- Audience psychology, handling
- Presentation skills.
- Individual feedback for each student
- Conference/Interview technique
  
- Importance of listening
- Self-assessment
- Action plan execution.
- Barriers in listening.
- Good and persuasive listening
  
- What is efficient and fast reading
- Awareness of existing reading habits
- Tested techniques for improving speed
- Improving concentration and comprehension through systematic study.
  
- Basics of non-verbal communication
- Rapport building skills using neuro-linguistic programming (NLP)

### Course Objectives

The basic objective of this course is to get familiar with the ocular pharmacology, different drugs used in ocular treatment and their mechanism of action.

### Course Outcomes

On completion of this course, the students will be able to understand- Scope and importance of different ocular problems and drugs used to treat them. They will be able analyse ocular diseases and mode of action drug used to treat them.

### Catalog Description

This is an important subject of optometry. It deals with importance of routes of drug administration as well as has detailed knowledge about different drugs such as Miotics, Mydriatics, Cycloplegics drugs, Antibacterial drugs & therapy and Antifungal drugs & therapy etc.

### Text Books

1. Text book of pharmacology by Seth II edition
2. Basic and clinical pharmacology by Katzung IX edition
3. Ocular Pharmacology- Dr. Ashok Garg

### Reference Books

1. S P Rang, M M Dale, Ritter- Pharmacology Edition III, Churchill 1995
2. K D Tripathi: Essentials of Medical Pharmacology, IV Edition., 1999
3. Goodman & Gilman's the pharmacological basis of therapeutics, XI edition

### Course Content

#### Module I

Ocular Pharmacology – An introduction, Autonomic nervous system, Routes of drug administration

#### Module II

Miotics, Mydriatics & Cycloplegics drugs, Antibacterial drugs & therapy, Antifungal drugs & therapy, Anti-Viral drugs & therapy

#### Module III

Anti-inflammatory drugs & therapy, Anti-glaucoma drugs & therapy, Ophthalmic dyes, Local Anaesthetics

#### Module IV

Ophthalmic preservatives, Ocular lubricants, Ocular irrigating solutions, Ocular antiseptics & disinfectants

#### Module V

Anti-cataract agents, Contact lens solution, Chelating agents, Immunosuppressive agents

**Mode of Evaluation:** The theory performance of students is evaluated as:

	Theory	
Components	Internal	SEE
Marks	30	70

<b>Total Marks</b>	<b>100</b>

<b>Co-requisites</b>					

### Course Objectives

The basic objective of this course is to get familiar with the process of refraction including Aphakia/Pseudo-phakia, Presbiopia, Keratoconus and Post-Op. Refractive errors etc.

### Course Outcomes

On completion of this course, the students will be able to understand- Scope and importance of Retinoscopy -Principle & Method, its Objective of Refraction and Subjective of Refraction

### Catalog Description

This is an important subject of optometry as it helps to learn about different eye problems due to refraction, clinical visual optics as well as about clinical refraction.

### Text Books

1. Ocular Refraction- Dr. AK Khurana
2. Clinical refraction- Borish

### Reference Books

1. Bennett & Rabbetts: Clinical visual Optics
2. David O Michaels: Visual Optics & Refraction (DOM)
3. Abrams D: Duke elders Practice of Refraction, Edition 9, 1998
4. Ocular Refraction- Dr. AK Khurana
5. Clinical refraction- Borish

### Course Content

#### Module I

Emmetropia & Ammetropia -Aetiology, Population, Distribution, Growth of eye, Visual Acuity, Myopia

#### Module II

Hypermetropia, Astigmatism, Aphakia/Pseudo-phakia, Presbiopia, Keratoconus

#### Module III

A. Post-Op. Refractive errors

B. Refraction of irregular reflex

#### Module IV

Accommodation & Convergence –1. Far point, near point, ranges. Amplitude of accommodation

Accommodation & Convergence – 2. Methods of measurements, NPA. AC/A ratio.

#### Module V

Retinoscopy -Principle & Method, Objective Refraction, Subjective Refraction

**Mode of Evaluation:** The theory performance of students is evaluated as:

### Course Objectives

The basic objective of this course is to get familiar with the diseases of lid, cornea, sclera, Lachrymal Apparatus, conjunctiva, iris and lens. It will help to learn about symptomatology, clinical signs, diagnosis, pathogenesis, pathophysiology, systemic disease relationships and treatment of degenerative, infections and inflammatory conditions affecting these structures

### Course Outcomes

On completion of this course, the students will be able to understand- Scope and importance of symptomatology, clinical signs, diagnosis, pathogenesis, pathophysiology of lid, cornea, sclera, Lachrymal Apparatus, conjunctiva, iris and lens.

### Catalog Description

This is an important subject of optometry. It deals with the pathophysiology and pathogenesis of lid, cornea, sclera, Lachrymal Apparatus, conjunctiva, iris and lens. It helps to learn about symptomatology, clinical signs and diagnosis of ocular diseases.

### Text Books

1. Ocular Disease- Kanski

### Reference Books

1. Essential of Ophthalmology- Dr. Samar K Basak.
2. Ocular Disease- Dr. AK Khurana

### Course Content

#### Module I

Anterior segment ocular diseases involving orbit, eyelids, adnexa, conjunctiva, cornea, urea, sclera, anterior chamber, iris and lens. Symptomatology, clinical signs, diagnosis, pathogenesis, pathophysiology, systemic disease relationships and treatment of degenerative, infections and inflammatory conditions affecting these structures.

#### Module II

Disease of the Lids – Congenital Deformities of the Lids. Oedema of the Lids. Inflammatory Conditions of the Lids. Deformities of the Lid Margins. Deranged Movement of the Eyelids. Neoplasm's of the Lids. Injuries of the Lids.

#### Module III

Diseases of the Lachrymal Apparatus-. Dry Eye. Disease of the Lachrymal Gland. Disease of the Lachrymal Passages. Operations for Chronic Dacryocystitis

Disease of the Conjunctiva- Subconjunctival Haemorrhage Infective Conjunctivitis. Follicular Conjunctivitis. Granulomatous Conjunctivitis. Allergic Conjunctivitis. Conjunctivitis Associated with

**Skin conditions. Degenerative conditions of the Conjunctiva. Vitamin-A Deficiency. Cysts and Tumours of the Conjunctiva. Conjunctival Pigmentation . Injuries of the Conjunctiva.**

**Module IV**

**Disease of the Cornea –Congenital Anomalies. Inflammation of the Cornea (Keratitis). Superficial Keratitis. Deep Keratitis. Vascularisation of Cornea. Opacities of the Cornea. Keratoplasty. Corneal Degenerations. Corneal Dystrophy’s. Corneal Pigmentation. Corneal Injuries. Refractive Corneal Surgery. Corneal Ulcer ( Bacterial , Viral , Fungal)**

**Module V**

**Disease of the Sclera- Episcleritis. Scleritis. Staphyloma of the Sclera. Blue Sclerotic Scleromalacia Performs. Nanophthalmos. Injuries of the Sclera.**

**Disease of the Iris.-. Congenital Anomalies. Inflammations (Anterior Uveitis) . Specific Types of Iridocyclitis . Degenerations of the Iris. Cysts and Tumours of the Iris. Injuries of the Iris.**

**Module VI**

**Disease of the Ciliry Body- Inflammations of the Ciliry Body. Purulent Iridocyclitis (Panophthalmitis). Evisceration. Sympathetic Ophthalmia. Vogt- Koyanagi – Harada Syndrome. Tumours of the Ciliry body. Injuries of the Ciliry body.**

**Module VII**

**Glaucoma- .Formation of Aqueous Humor. Drainage ofAqueous. Intraocular Pressure(IOP). Ocular Rigidity. Tonography. .Developmental Glaucoma (Buphthalmos) . Primary Narrow Angle Glaucoma. Primary Open Angle Glaucoma. Normotensive Glaucoma. OcularHypertension. Secondary Glaucoma. Surgical Procedures for Glaucoma(Steps Only) , YOGPI, trabeculectomy.Laser Procedure in Glaucoma . Artificial Drainage Devices in Glaucoma Surgery(Molteno).**

**Module VIII**

**Disease of the Lens- Congenital Malformations. Cataract . Congenital and Developmental Cataract . Senile Cataract. Traumatic Cataract. Complicated Cataract. Secondary Cataract. After Cataract. Dislocation of the Lens. SurgicalProcedures for Removal of the Lens(Operative Steps Only). Phacoemulsification (ICCE,ECCE,IOL) . Small IncisionCataract Surgery (Manual Phaco).Intraocular Lens Implantation-AC+PC, IOL**

**Mode of Evaluation:** The theory performance of students is evaluated as:

### Course Objectives

The basic objective of this course is to get familiar with the experiments of Ocular Pharmacy and pharmacology

### Course Outcomes

On completion of this course, the students will be able to prepare different kind of eye drops and have knowledge about their uses

### Catalog Description

It deals with Quality Control, Sterilization, pH measurement, Osmolarity, Spectrophotometry for concentration and to prepare different eye drops.

### Text Books

### Reference Book

### Course Content

1. Quality Control :
2. Sterilization
3. PH measurement
4. Osmolarity
5. Spectrophotometry for concentration
6. How to prepare following eye drops:
7. Pilocarpin eye drops
8. Artificial eye drops
9. Glycerin eye drops
10. Homatropine eye drops
11. EDTA eye drops
12. Sulphacetamide eye drops
13. Dexamethasone eye drops
14. Methylecellulose eye drops
15. Saline eye drops
16. Sodium citrate eye drops
17. MK Media preparation
18. Fluorescein Strip, Rose Bengal Strips preparation
19. Autologous serum eye drops preparation
20. Dilution of drug in different concentration

### Course Objectives

To familiarize with the experiments of Refraction.

### Course Outcomes

On completion of this course, the students will be able to Record VA, Practice of Streak Retinoscopy, and Direct Ophthalmoscopy-Normal Fundus etc.

### Catalog Description

It deals with Recording of VA, Practice of Streak Retinoscopy, and Direct Ophthalmoscopy-Normal Fundus etc.

### Text Books

1. Subrahmanyam N, Brij Lal, A text book of Optics, S. Chand Co Ltd, New Delhi, India, 2003.

### Reference Books

1. Pedrotti L. S, Pedrotti Sr. F. L, Optics and Vision, Prentice Hall, New Jersey, USA, 1998.

2. Keating NM. P, Geometric, Physical and Visual Optics, Butterworth-Heinemann, Massachusetts, USA, 2002.

### Course Content

1. History writing
2. Recording VA
3. Practice of Streak Retinoscopy
4. Direct Ophthalmoscopy-Normal Fundus
5. Subjective refraction – fogging, clockdial, fan, JCC, prism balance, TIB, duochrome, cyclodemia, Slit refraction.
6. Measurement of amplitude of accommodation.
7. Presbyopic add
8. Writing prescription.

<b>ENG 231</b>	<b>Communicative English -II</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>Version1.01</b>	<b>Date of Approval: Jun 15, 2013</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>
<b>Pre-requisites</b>	<b>Communicative English -I</b>				

### Course Description

Though, we take students of undergraduate courses to be proficient in English language, we have been proved wrong time and again. The course presented here, is a skill based programme, where we would try to improve all the four skills of the students i.e. LSRW (Listening, Speaking, Reading and Writing). The quest is to improve their understanding and expression so that they are able to do much better in their studies and life as a resultant.

### Course Objectives

- 1 To help the students understand and communicate in English as used in day to day activities.
2. To help the students enhance their competence in the English language.

**Course Pre-requisite Basic understanding of English language/ Diagnostic Test**

### Course Outcomes

**The students will get the required training in LSRW through the prescribed texts and would be:**

1. Able to write simple and meaningful sentences with proper punctuation.
2. Able to understand words, in isolation and in context
3. Able to understand instructions, requests and class lectures.
4. Able to pronounce words correctly in everyday use

### Prescribed Texts

1. Murphy Raymond, Essential English Grammar, Cambridge Uni. Press.
2. Intermediate English Grammar. Raymond Murphy ISBN NO 978-81-7596-676-5
3. Essential English Grammar. Raymond Murphy ISBN: 9788175960299
4. **Wallace, Michael J: Study Skills in English, Cambridge University Press, Cambridge, 1980.**

### Additional References

1. Bhatnagar, R.P. & R. Bhargava, Law and language, New Delhi: Macmillan.
2. Cross, Ian et al. Skills for lawyers, Jordan Publishing Company., 1997 Bristol.
3. Madabhushi Sridhar, Legal Language, Asia Law House, Hyderabad.
4. Legal Language and Legal Writing – P.K. Mishra

### Pedagogy

The course will aim at the facilitation of acquisition of the four basic language skills (listening, speaking, reading and writing) in English language among the heterogeneous set of student base through their active participation in various language skills development related activities.

Components	Theory		Laboratory		Theory and laboratory
	Internal	SEE	Internal	SEE

<b>Version</b>	<b>Date of Approval:</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>
<b>Pre-requisites//Exposure</b>					
<b>Co-requisites</b>					

**Course Objectives**

The basic objective of this course is to get familiar with Ophthalmic instruments such as Retinoscope, Indirect Ophthalmoscope, Direct Ophthalmoscope, and Slit Lamp: Haag-Streit., Photo-slit lamp, Lensometer, Tonometer, Fundus Camera etc. It provide detailed knowledge which helps to examine corneal disease.

**Course Outcome**

On completion of this course, the students will be able to understand- Scope and importance of different ophthalmic instruments and appliances, their complete functioning and applications in different diseases.

**Catalog Description**

This is an important subject of optometry. It deals with the different instruments and their functioning used in the diagnosis and treatment of ocular diseases.

**Text Books**

1. Michelle Pet Harrin: Instrumentation for Eye care Para professionals,1999.
2. Geoge Smith, David A Atchison: Visual Optical Instruments, 1997.

**Reference Books**

1. David B Henson: Optometric Instrumentation. (DBH)
2. J. Boyd Eskridge, John F. Amos, Jimmy D. Bartlett: Clinical Procedures in Optometry,1991

**Course Content**

**Module I**

Retinoscope, Indirect Ophthalmoscope, Direct Ophthalmoscope, Slit Lamp: Haag-Streit., Photo-slit lamp, Lensometer. Lens gauge

**Module II**

Tonometer, Fundus Camera, External eye photography, Auto-refractometer

**Module III**

Corneal Examination- 1.Placido disc 2. Keratometer 3. V KG 4. Specular Microscopy 5. Aesthesiometer

**Module IV**

Exophthalmometer, Perimeter–Manual & automated, Orthoptics Instruments -Haploscope/Home devices, Heidelberg Retino-tomography HRT -II. Perimeter – Manual & automated, Nerve fiber analyzer, Frequency doubling perimeter, Non Contact Tonometer

**Module V**

Heidelberg Analmascope, Pachometers, Contrast sensitivity tests, Glare acuity tests, Colour vision tests, Dark adaptometer

**Mode of Evaluation:** The theory performance of students is evaluated as:

<b>Pre-requisites//Exposure</b>					
<b>Co-requisites</b>					

### Course Objectives

The basic objective of this course is to get familiar with the Visual Optics & Lightening of The Eye. It helps to understand Optical Defects of the Eye, Light sources, Lighting Installation and Recommended level of illuminance etc

### Course Outcomes

On completion of this course, the students will be able to understand- Scope and importance of optical defects of eye, light sources, and Calculations related to Application of inverse square law and Cosine law- Matt surfaces- Lumen method of lighting design – utilization factor and light loss factors.

### Catalog Description

This is an important subject of pharmacy. It deals with importance of natural resources- renewable and non renewable, water resources, mineral resources etc. It also deals with different elements ecosystem which is important for sustaining life. This subject also raises the issues like air, water, soil, marine pollution, their causes and measures.

### Text Books

1. Borish -Clinical Refraction.
2. Illumination Engineering, J. B. Murdoch

### Reference Books

1. Principles & Practice of Refraction, Duke Elder
2. Ophthalmic Optics & Refraction ( System of Ophthalmology-Vol. 5), Duke Elder
3. Visual Optics & Refraction- A clinical approach, David D. Michaels

### Course Content

#### Module I

Review of Geometrical Optics, Schematic and reduced eyes and their properties, Optical constants of the eye and their measurement. Purkinje images. Corneal curvature and thickness. Keratometry and pachometry. Indices of aqueous and vitreous, Optical Defects of the Eye- Shape of Cornea, Shape & RI of the lens, Optical axis, Visual axis (angle alpha, Fixation axis (angle gamma), Aberration of the Optical system of eye, Depth of focus, Diffraction & resolving power.

#### Module II

Emmetropia and ametropia, Axial versus spherical ametropia, Myopia Hypermetropia (Hyperopia) Astigmatism. Accommodation- possible mechanism of accommodation-Schiener disc experiment-theories of accommodation- modern theory- changes in the lens during accommodation- the amplitude of accommodation- the measurement of the amplitude n of accommodation- depth of field, luminance and blur tolerance- amplitude of accommodation versus age. Presbyopia-near vision addition- estimate of addition-unequal near vision addition- effect of changing the spectacle distance – hypermetropia and accommodation.

#### Module III

Eye and Vision: Spectroradiometric curve-  $V_{\lambda}$ - $\lambda$  curve- photopic and scotopic vision CIE standard observes. Photometric quantities and units- Luminous Flux, Lumen- Illuminance, lux Luminous intensity, Candela –Luminance, Candela/m<sup>2</sup>. Inverse square law and Cosine law of illumination

(Illuminance) Photometry- Lumer Brodhum photometer, Guild Flickerphotometer- Photocells photo multipliers – photodiodes-noise in physical photometers. Determination lighting of Polar curve of lamps.

**Module IV**

Light sources- Special energy distribution- luminous efficacy- color rendering properties- Flicker contracts- Daylight, its properties- color lamp – Incandescent.lamps - low pressure Hg-lamps- High pressure Hg-lamps- Low-pressure NA- lamp- High pressure NA-lamps- Typical applications. Lighting Installation- Luminaries their design function up lighting – down lighting mounting position-Choice of lighting equipment- lighting system management.

**Module V**

Recommended level of illuminance for various including those in optometry and ophthalmology driving etc. VDU- Design of work station – Flicker color contrast- Regulations regarding the use of VDU. Eye Protectors- their constructions standard relating to eye protection, Calculation- Application of inverse square law and Cosine law- Matt surfaces- Lumen method of lighting design – utilization factor, light loss factor, Glare and glare index- disability glarediscomfort glare- control of glare- contrast.

**Mode of Evaluation:** The theory performance of students is evaluated as:

### Course Objectives

The basic objective of this course is to get familiar with the Ophthalmic Lens & Dispensing Optics. It help to understand Characteristics of lenses, Power of lenses, Spectacle lenses, Lens types: Single vision lens. Bi-focal lenses. Tri-focal lenses. Vocational & occupational multifocal progressive lenses as well as Lens for special uses.

### Course Outcomes

On completion of this course, the students will be able to understand- Scope and importance of different kind of lenses their characteristics and uses. It will also help to enhance the knowlege about power of lenses and their special uses. It also deals with Dispensing Optics, Spectacle frame, Frame types, Frame measurements, Frame Selection, Lens Selection.

### Catalog Description

This is an important subject of optometry. It deals with importance lenses their types and special uses of these lenses. It also deals with Dispensing Optics, Spectacle frame, Frame types, Frame measurements, Frame Selection, Lens Selection.

### Text Books

1. Dispensing Optics-Borish

### Reference Books

1. Dispensing Optics-Borish
2. Ocular Disease- Kanski
3. Essential of Ophthalmology- Dr. Samar K Basak.
4. .Ocular Disease- Dr. AK Khurana

### Course Content

#### Module I

Ophthalmic lens: Characteristics of lenses: Introduction. Spherical lenses. Plano-cylindrical lenses. Sphero-cylindrical lenses. Designation of lens power. Power of lenses. Transposition. Write the prescription. Base curve of spherical lens. Base curve of cylindrical single vision lens. Aberration of lens. Prism prescription. Prism effects in a lens. Neutralization. Spectacle lenses: Characteristics of lens materials. Specific gravity (weight ). Refractive index. Abbe number. Impact resistance. Scratch resistance. Curve variation factor.

#### Module II

Current materials: Crown glass. CR-39. High -index glass. High -index plastic. Poly carbonate. Photochromatic materials. Lens types: Single vision lens. Bi-focal lenses. Tri-focal lenses. Vocational & occupational multifocal progressive lenses. Introduction of bi-focal lenses: History of bi-focal lenses. Modern bi-focal designs. Types of bifocal designs. Glass tri-focal lenses. Invisible multi-focal Double segment lens. Plastic bi-focals.

#### Module III

Ophthalmic lens coating: Anti-reflecting coatings. Special notes concerning anti-reflecting coatings. Protective coating, color coating. Absorptive lenses: Classification of lens tints. Chemical that produces

color & assist in absorptive characteristics of glass lenses. Effect in prescription on lens color. Availability of tinted lenses. Impact resistant lenses: Types of impact resistant lenses. Plastic lenses. Impact resistant Dress-Eye wear lenses. Tempered glass lenses. Types of impact resistant lenses most beneficial of specific patients.

**Module IV**

Lens for special uses: Fresnel lenses Thinlite lenses Lenses for the Aphakic patient. Aspheric lenses. Lens surfacing & quality. Principles of lens surface generation. Glass assessment. Faults in lens materials & lens surface. Inspection of lens quality.

**Module V**

Dispensing Optics: Spectacle frame: Current frame materials- a) Plastics b) Metals, Frame types: Combination of frames-Half-eye frames, Mounts, Nylon-cord frame, Special purpose frames, Frame measurements: The boxing system, The datum system, Comparison of the two systems, Lens position, Segment specification, Frame Selection: Fashion, Function, Feel, Conflicting needs, Price, Standard alignment. Lens Selection: Ground rule for selection, Selection criteria, Facial Measurement, The PD, Visual axes, Measuring inter papillary distance using PD ruler, Common difficulties in measuring PDs, Measuring monocular PD, Measuring near PD

**Module VI**

Measuring heights: Single vision, Multi focal, bi-focal, Progressive, Pediatric Dispensing: The changing image of spectacle, Age differences. Frame Selection Technical Criteria, Fashion criteria, some tips on selection. Lens Selection Technical criteria-Communicating with kids, kids corner, Facial measurement of the kids-PDs, Centers, Bi-focals, Dealing with problems: Dealing with clients, Common client problems, dealing with professional colleagues, Dealing with the laboratories. Special needs dispensing: Occupational dispensing, Hazards in the work place, Occupational health safety legislation, Common hazards. Eye protection: Industrial eye protection, Sport, Standards covering eye protection, Lens materials & impact resistance, Frame & eye protection.

**Mode of Evaluation:** The theory performance of students is evaluated as:

### Course Objectives

On successful completion of this module, a student will be expected to be able to:-

- Demonstrate an in-depth knowledge of the gross anatomy and physiology relating to the extrocular muscles.
- Provide a detailed explanation of, and differentiate between the aetiology, investigation and management of binocular vision anomalies.
- Adapt skills and interpret clinical results following investigation of binocular vision anomalies appropriately and safely.

### Course Outcomes

On completion of this course, the students will be able to understand- Scope and importance of binocular vision; it helps to enhance the knowlegde and capabilty to serve society regarding eye problems.

### Catalog Description

This course provides theoretical aspects of Binocular Vision and its clinical application. It deals with basis of normal binocular vision and space perception, Gross anatomy and physiology of extrocular muscles, various binocular vision anomalies, its diagnostic approaches and management.

### Text Books

1. Pradeep Sharma: Strabismus simplified, New Delhi, First edition, 1999, Modern publishers.
2. Fiona J. Rowe: Clinical Orthoptics, second edition, 2004, Blackwell Science Ltd
3. Gunter K. Von Noorden: BURIAN- VON NOORDEN'S Binocular vision and ocular motility theory and management of strabismus, Missouri, Second edition, 1980, C. V. Mosby Company

### Reference Books

1. Mitchell Scheiman; Bruce Wick: Clinical Management of Binocular Vision Heterophoric, Accommodative, and Eye Movement Disorders, 2008, Lippincot Williams & Wilkins publishers

### Course Content

#### Module I

**Binocular Vision and Space perception,  $\frac{3}{4}$  Relative subjective visual direction.  $\frac{3}{4}$  Retino motor value,  $\frac{3}{4}$  Grades of BSV,  $\frac{3}{4}$  SMP and Cyclopean Eye,  $\frac{3}{4}$  Correspondence,  $\frac{3}{4}$  Fusion, Diplopia, Retinal rivalry,  $\frac{3}{4}$  Horopter,  $\frac{3}{4}$  Physiological Diplopia and Suppression,  $\frac{3}{4}$  Stereopsis, Panum's area, BSV.  $\frac{3}{4}$  Stereopsis and monocular clues - significance.  $\frac{3}{4}$  Egocentric location, clinical applications.  $\frac{3}{4}$  Theories of Binocular vision.**

#### Module II

**Anatomy of Extra Ocular Muscles.  $\frac{3}{4}$  Rectii and Obliques, LPS.  $\frac{3}{4}$  Innervation & Blood Supply. Physiology of Ocular movements.  $\frac{3}{4}$  Center of rotation, Axes of Fick.  $\frac{3}{4}$  Action of individual muscle. Laws of ocular motility,  $\frac{3}{4}$  Donders and Listing's law,  $\frac{3}{4}$  Sherrington's law,  $\frac{3}{4}$  Hering's law, Uniocular & Binocular movements - fixation, saccadic & pursuits.  $\frac{3}{4}$  Version & Vergence.  $\frac{3}{4}$  Fixation & field of fixation.**

#### Module III

**Near Vision Complex, Accommodation,  $\frac{3}{4}$  Definition and mechanism (process).  $\frac{3}{4}$  Methods of measurement.  $\frac{3}{4}$  Stimulus and innervation.  $\frac{3}{4}$  Types of accommodation.  $\frac{3}{4}$  Anomalies of accommodation – aetiology and management. Convergence,  $\frac{3}{4}$  Definition and mechanism.  $\frac{3}{4}$  Methods of measurement.  $\frac{3}{4}$**

Types and components of convergence - Tonic, accommodative, fusional, proximal. <sup>3</sup>/<sub>4</sub> Anomalies of Convergence – aetiology and management.

**Module IV**

Sensory adaptations Confusion, Suppression Investigations, Management Blind spot syndrome

**Module V**

Abnormal Retinal Correspondence, Investigation and management, Blind spot syndrome, Eccentric Fixation, Investigation and management, Amblyopia Classification, Aetiology Investigation Management

**Mode of Evaluation:** The theory performance of students is evaluated as:

### Course Objectives

The basic objective of this course is to get familiar with Visual Optics & Lighting of the Eye (Lab).

### Course Outcomes

On completion of this course, the students will be able to understand- Visual Optics & Lighting of the Eye (Lab)

### Catalog Description

This is an important subject of optometry. It deals with physical photometer, Correction of myopia-spectacle refraction.

### Text Books

1. Borish -Clinical Refraction.
2. Illumination Engineering, J. B. Murdoch

### Reference Books

1. Principles & Practice of Refraction, Duke Elder
2. Ophthalmic Optics & Refraction ( System of Ophthalmology-Vol. 5), Duke Elder
3. Visual Optics & Refraction- A clinical approach, David D. Michaels

### Course Content

Visual optics helps in Diagnoses & treatment methodology of all ocular disease and lightening of eye.

**Mode of Evaluation:** The theory performance of students is evaluated as:

### Course Objectives

The basic objective of this course is to get familiar with the ophthalmic lens and dispensing optics.

### Course Outcomes

On completion of this course, the students will be able to understand- meridian & optical center of ophthalmic lens, Neutralization – manual & help of lensometer, Identification of lens-spherical, cylindrical & sphero-cylindrical lenses.

### Catalog Description

This is an important subject of optometry. It deals with Lens-surfacing & edging, cutting & marking of single vision bifocal progressive, Frame measurement: The boxing system, the datum system. Comparison of the two systems, Lens position, segment specification, Frame selection: Fashion, function & standard alignment, Lens selection: Ground rule for selection, selection criteria, Facial measurements: The PD, Visual axes, & measuring inter-pupillary distance using P.D ruler.

### Text Books

1. Dispensing Optics-Borish

### Reference Books

1. Dispensing Optics-Borish
2. Ocular Disease- Kanski
3. Essential of Ophthalmology- Dr. Samar K Basak.
4. .Ocular Disease- Dr. AK Khurana

### Course Content

1. Find out the meridian & optical center of ophthalmic lens
2. Neutralization – manual & help of lensometer
3. Identification of lens-spherical, cylindrical & sphero-cylindrical lenses
4. Lens-surfacing & edging, cutting & marking of single vision bifocal progressive
5. Frame measurement: The boxing system, the datum system. Comparison of the two systems, Lens position, segment specification
6. Frame selection: Fashion, function & standard alignment
7. Lens selection: Ground rule for selection, selection criteria.
8. Facial measurements: The PD, Visual axes, & measuring inter-pupillary distance using P.D ruler.
9. Common difficulties in measuring P.D, Measuring monocular P.D, measuring near C.D.
10. Measuring heights :- single vision , bifocal, multifocal, progressive
11. Pediatric dispensing

<b>Version</b>	<b>Date of Approval:</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>
<b>Pre-requisites//Exposure</b>					
<b>Co-requisites</b>					

### Course Objectives

To understand the binocular vision and ocular motility.

### Course Outcomes

On completion of this course, the students will be able to understand Grades of binocular vision, Depth perception, Binocular Vision Test.

### Catalog Description

This subject involves study of binocular vision, Binocular fusion, Dihoptic stimulation, Binocular optical defects, Binocular muscular anomalies. It also deals with the test for simultaneous macular perception, test for fusion, test for stereopsis, and diagnosis & clinical aspects of ocular anomalies & disorders.

### Text Books

1. *Anatomy & Physiology- Dr. AK Kurana*
2. *Handbook of Pediatric Strabismus Amblyopia- Dr. Kenneth right*

### Reference Books

1. *Anatomy & Physiology- Dr. AK Kurana*
2. *Handbook of Pediatric Strabismus Amblyopia- Dr. Kenneth right*

### Course Content

**MODULE I:** Grades of binocular vision-simultaneous perception (first grade of binocular vision), fusion, stereopsis (third grade of binocular single vision). Advantages of binocular vision. Visual direction and the horopter visual direction, corresponding point and normal retinal correspondence, horopter, physiologic diplopia. Binocular fusion-panum's area, fixation disparity, theories of binocular fusion, synergy hypothesis of panum, local sign hypothesis of hering, eye movement hypothesis of helmholts, suppression hypothesis of du tour and verhoeff, physiologic basis of fusion. Dihoptic stimulation-depth with fusion and depth with diplopia, diplopiawithout depth, retinal rivalry and suppression, binocular lussure. Stereopsis-physiological basis of stereopsis, local and global stereopsis and fusion, stereopsis acuity neurophysiology of stereopsis.

**MODULE II:** Depth perception-steropsis, nonstereoscopic clues to the perception of depth under binocular condition, monocular clues (non stereoscopic clues to spatial orientation)-parallax movements, linear perspective over view of contours, size distance from horizon, distribution of highlights, shadow, shades and light, aerial perspective influence of accommodation and convergence on depth perception, conclusion, Integration of the motor and sensory system into binocular vision. Binocular defects: Binocular optical defects-anisometropia-vision in anisometropia, treatment, Binocular optical defects-aniseikonia- symptoms, clinical investigation, treatment. Binocular muscular coordination-orthophoria-binocular vision.

**MODULE-III:** Binocular muscular anomalies-heterophoria-the causes of imbalance, exophoria, esophoria, hyperphoria, cyclophoria, symptoms of heterophoria, treatment. Binocular muscular anomalies-heterotropia- the vision in concomitant strabismus, treatment, Binocular muscular coordination-convergence-voluntary and reflex convergence, reflex convergence, the measurement of

convergence, the relation between accommodation and convergence, binocular accommodation, fatigue of convergence. Binocular muscular anomalies-anomalies of convergence and other reading difficulties—insufficiency of convergence, convergence excess, the ophthalmologist and the reading ability of children.

**MODULE-IV: Binocular Vision Test Test for simultaneous macular perception, test for fusion, test for stereopsis- synoptophore or stereoscope test, vectograph test, titmus stereo test, random dot stereogram test, simple motor task test based on stereopsis. Diagnosis & clinical aspects of ocular anomalies & disorders, Converge through a spectacle lens, prismatic effects in spectacle lenses.**

**Mode of Evaluation: The theory and lab performance of students are evaluated separately.**

<b>Version</b>	<b>Date of Approval:</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>
<b>Pre-requisites//Exposure</b>					
<b>Co-requisites</b>					

## Course Objectives

To understand the preliminary investigations, optics, instrumentation and characteristics of contact lens.

## Course Outcomes

On completion of this course, the students will be able to understand history of Contact Lens, Corneal Anatomy and Physiology, Corneal Physiology and Contact Lens, Preliminary Measurements and Investigations, Slit Lamp Biomicroscopy, Contact Lens materials.

## Catalog Description

This subject deals with Glossary of Terms: Contact Lenses, Indications and Contra Indications Contact Lens, Rigid gas permeable contact lens design, Fitting philosophies, Fitting of Spherical SCL and effect of parameter changes, Astigmatism correction options, Fitting Spherical RGP contact Lenses, Low OK, High OK, Effects of RGP contact Lens parameter changes on lens fitting Fitting in Astigmatism (Sph RGP), Instrumentation in contact lens practice, Checking finished lenses parameters, Recent developments in Contact lenses and review of lenses available in India .

## Text Books

1. *Robber B Mandell: Contact lens Practice, hard and flexible lenses, Charles C. Thomas, 3<sup>rd</sup> Edition, 1981, Illinois, USA*
2. *Ruben M Guillon: Contact lens practice, 994, I ,Edition*

## Reference Books

1. *IACLE for Contact Lens*
2. *Ruben M Guillon: Contact lens practice, 994, I ,Edition*

## Course Content

1. History of Contact Lens
2. Corneal Anatomy and Physiology
3. Corneal Physiology and Contact Lens
4. Preliminary Measurements and Investigations
5. Slit Lamp Biomicroscopy
6. Contact Lens materials
7. Optics of the Contact Lens
8. Glossary of Terms: Contact Lenses
9. Indications and Contra Indications Contact Lens
10. Rigid gas permeable contact lens design
11. Soft Contact lens design & manufacture
12. Kertometry, Placido's disc, Tonography
13. Fitting philosophies
14. Fitting of Spherical SCL and effect of parameter changes
15. Astigmatism correction options
16. Fitting Spherical RGP contact Lenses, Low OK, High OK
17. Effects of RGP contact Lens parameter changes on lens fitting
18. Fitting in Astigmatism (Sph RGP)
19. Follow-up post fitting examination

20. Follow-up Slit Lamp examination
21. Fitting in Keratoconus
22. Fitting in Aphakia, Pseudophakia
23. Cosmetic Contact Lenses
24. Fitting Contact Lens in children
25. Toric Contact Lenses
26. Bifocal Contact Lenses
27. Continuous wear and extended wear lenses
28. Therapeutic Lenses/Bandage lenses
29. Contact lens following ocular surgeries
30. Disposable contact lenses, frequent replacement and Lenses
31. Use of Specular Microscopy and Pachymetry in Contact Lenses
32. Care & maintenance of Contact Lenses
33. Contact Lens modification of finished lenses
34. Instrumentation in contact lens practise
35. Checking finished lenses parameters
36. Recent developments in Contact lenses
37. Scleral Contact lenses
38. Corneal Topography
39. Contact lens in Sports Vision
40. Review of lenses available in India

<b>Version</b>	<b>Date of Approval:</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>
<b>Pre-requisites//Exposure</b>					
<b>Co-requisites</b>					

### Course Objectives

To understand the basics of low vision aids and visual rehabilitation.

### Course Outcomes

On completion of this course, the students will be able to understand definition, grades, statistics of low Vision, Low vision optics, examination and refraction.

### Catalog Description

This subject deals with magnification-relative distance/ relative size/ approach/angular Optics of Galilian & Keplarian telescope, Assessment & prescription of low vision devices-optical/ non-optical/ rehabilitation services,Non- optical devices-pen/umbrella/ boldline note book/ illumination/ letter writer/environmental modification/ signature guide/ needlethreader/ eccentric viewing strategies. It also deals with overview of systematic / retinal diseases in relation to low vision, Acromatopsia, and counseling of low vision patient.

### Text Books

1. *The Art & Practice of Low Vision*, By Freeman & Jose, Butterwort Pub.
2. *Understanding Low Vision* , AFB Publication
3. *Essential of Low Vision Practise*- Richard Brilliant

### Reference Books

1. *The Art & Practice of Low Vision*, By Freeman & Jose, Butterwort Pub.
2. *Understanding Low Vision* , AFB Publication
3. *Essential of Low Vision Practise*- Richard Brilliant

### Course Content

**MODULE I: Low Vision: Definition, Grades of low vision, Statistics/ Epidemiology, Relation between disorder, impairment & handicapped,**

**MODULE II: Low vision optics: Magnification-relative distance/ relative size/ approach/angular Optics of Galilian & Keplarian telescope- advantage/disadvantage, significance of exit & entrance pupil,Optics of spectacle magnifier/ determination/ calculation/ disadvantage/advantage. Optics of stand magnifier, significance of equivalent viewing distance & calculations, Telescope- distance/ near/ telemicroscope/ monocular/ binocular/ bioptic, Determination of decentration of lenses /prism/calculation/ Lebenson's formula/simple diotric, formula. Hand held magnifier-illuminated/ non-illuminated, Spectacle magnifier / half eye/ prism correction/ bar magnifier/ CCTV/ magni-cam/ low vision imaging system or V-max / contact lens & IOL telescope.**

**MODULE III: Low vision examination: Task/ Goal oriented history-medical/ visual/ psychological history/ task analysis/ mobility/ distance vision/ near vision / daily living/ illumination/ work & school. Visual acuity measurement-distance/ near/ use of log MAR chart ( distance & near)/ light house, picture chart/ visual field/ Amsler chart/ contrast sensitivity/ overview of glare testing.**

**MODULE IV: Low vision refraction, Assessment & prescription of low vision devices-optical/ non-optical/ rehabilitation services,Non- optical devices-pen/umbrella/ boldline note book/ illumination/ letter writer/environmental modification/ signature guide/ needlethreader/ eccentric viewing strategies, Overview of Rehabilitation Services:- definition/ implementation/ vocational guidance/educational guidance/ mobility & orientation training / special teacher/ special school/ Braille system/ integrated system/referral center- activity/ support/ loan. Overview of systematic / retinal diseases in relation to low vision ,Acromatopsia/ LMBB: syndrome/ labers congenital anomaly/ down syndrome/retinitis pigmentosa/ diabetic retinopathy/ optic atrophy/ albinism/ aniridia. Counseling of low vision patient/ parents/ guardians/relatives.**

**Mode of Evaluation:** The theory and lab performance of students are evaluated separately.

### Course Objectives

At the end of the course students will acquire knowledge in the following aspects :

- Inflammation and repair aspects.
- Pathology of various eye parts and adnexa

### Course Outcomes

On completion of this course, the students will be able to understand Ocular pathology.

### Catalog Description

This course describes basic aspects of disease processes with reference to specific entities relevant in optometry/ophthalmology.

### Text Books

1. *K S Ratnagar: Pathology of the eye & orbit, Jaypee brothers Medical Publishers, 1997*

### Reference Books

1. *CORTON KUMAR AND ROBINS: Pathological Basis of the Disease, 7<sup>th</sup> Edition, Elsevier, newDelhi, 2004.*
2. *S R Lakhani Susan AD & Caroline JF: Basic Pathology: An introduction to the mechanism of disease, 1993.*

### Course Content

- 1 General Pathology : Principles
- 2 Pathophysiology of Ocular Angiogenesis
- 3 Ocular Infections
- 4 Pathology of cornea and Conjunctiva
- 4 Pathology of Uvea
- 5 Pathology of Glaucoma
- 6 Pathology of Retina
- 7 Pathology of retina in systemic disease/disorders
- 8 Pathology of eyelids and adnexa
- 9 Pathology of orbital space occupying lesions
- 10 Pathology of the optic nerve
- 11 Retinoblastoma
- 12 Pathology of Lens

**Mode of Evaluation:** The theory and lab performance of students are evaluated separately.

### Course Objectives

To understand the basic of clinical and advanced orthoptics.

### Course Outcomes

On completion of this course, the students will be able to understand manifest squint work-up  
And Paralytic squint work-up.

### Catalog Description

This subject deals with squint work-up, pleoptics and orthoptic exercises.

### Text Books

1. Jerome Rosner: *Pediatric Optometry*, Butterworths, London, 1982
2. Hirsch M J & Wick R E: *Vision of the Aging Patient, An Optometric Symposium*, 1960

Version 1.0	Date of Approval: 11 – 01 – 2016	3	0	0	3
Pre-requisites//Exposure					
Co-requisites					

### Course Objectives

**This program is aimed at training candidates for the job of a “Vision Technician”, in the “Healthcare” Sector/Industry and aims at building the following key competencies amongst the learner**

### Course Outcomes

- **Demonstrate knowledge and understanding about the role of Vision technician in the healthcare settings.**
- **Demonstrate the ability to perform clinical skills essential in performing administrative and certain clinical duties i.e. scheduling appointments, maintaining medical records, recording vital signs and medical histories, preparing patients for examination, and dispensing ophthalmic prescription.**
- **Demonstrate safe handling of devices and positioning of patient for measurement of visual acuity.**
- **Demonstrate ability to guide & educate patient on relevant information under the guidance or supervision of ophthalmologist.**
- **Demonstrate bio medical waste management.**
- **Practice infection control measures.**
- **Demonstrate safe practices to use equipment's required in their role.**
- **Demonstrate safe handling and storing of documents, record maintenance etc.**
- **Demonstrate techniques to maintain the personal hygiene needs**
- **Demonstrate professional behavior, personal qualities and characteristics of a Vision Technician**
- **Demonstrate good communication and team worker ability in the role of Vision Technician**

### Reference Books

10. A K Khurana: Comprehensive Ophthalmology, 4th edition, New age international (p) Ltd. Publishers, New Delhi, 2007

## COURSE CONTENT

Module I

**Introduction:**

**To Healthcare Systems & Ophthalmology Services: Basic Understanding of Healthcare Service Providers (primary, secondary & tertiary) Hospital Functions , Ophthalmology Department &it's facilities & services to patients**

**Role Of VisionTechnician:**

- **To develop broad understanding of the functions to be performed by Vision Technician**
- **Develop understanding to perform test for visual acuity, patient position and rightly assessing refractive status**
- **To determine the patient's visual needs**
- **To maintain, manage, calibration of instruments used in ophthalmology department or eye care facility**
- **To assist the physician/Ophthalmologist during eye examination and procedure/ treatment**
- **To Identify any cultural and special needs that may influence performance of test**
- **To develop Understanding of Patient Comfort and Safety**
- **To exhibit ethical behavior and understanding of administrative functions**

**Ocular Anatomy & Physiology:**

**Understanding different parts of eye and their functions**

- **To develop an understanding regarding physiology of the eye, visual system, control of eye movements, streaming of visual information**
- **To understand the functions of different part of eye**

Module 2

**Introduction To Ophthalmology Related Medical Terminology:**

**Understand appropriate use of Ophthalmology related medical terminology in daily activities with colleagues, patients and family**

**Common Eye Disease:**

**To gain broad understanding regarding common eye**

**Personnel Hygiene Of Vision Technician:**

**To develop understanding of the concept of Healthy Living**

- **To develop understanding & procedures of Hand Hygiene**
- **To develop techniques of Grooming**
- **To be equipped with Techniques of Use of PPE**
- **To be vaccinated against common infectious diseases of eye diseases**

## Module 3

### Sanitation ,Safety & First Aid:

**To develop understanding and precautions to maintain hygiene and safety**

- **Describe common emergency conditions and what to do in medical emergencies**
- **Describe basics of first aid**
- **To be able to identify ophthalmic emergencies**
- **To be able to clean, disinfect, and sterilize contact lenses.**
- **To develop understanding and precautions to ensure self-safety**

### Bio Medical Waste Management:

**To gain understanding of importance of proper and safe disposal of bio-medical waste & treatment**

**To gain understanding of categories of bio-medical waste**

- **To learn about disposal of bio-medical waste – colour coding, types of containers, transportation of waste,etc.**
- **To gain broad understanding of standards for biomedical waste disposal**
- **To gain broad understanding of means of bio-medical waste treatment**

#### Module 4

##### Soft Skills & Communication– I:

**Understand art of effective communication and be able to respond to queries and information needed**

- **Able to handle effective Communication with Patients & Family**
- **Able to handle effective Communication with Peers/colleagues using medical terminology in communication**
- **Able to maintain confidentiality and respecting need for privacy**

##### Measurement of Vitals:

**To be able to measure vital parameters like Pulse, BP, Temperature, Respiration, Height and Weight of patient**

- **To be able to raise alarm in case of deviation of vital parameters from normaldiseases**

#### Module 5

##### History Taking:

**To be well acquainted with clinical notes writing , assessment forms and formats as per HCO policies**

- **To develop broad understanding regarding obtaining and recording the history of patient**

##### Patient Positioning For Procedure:

**To develop understanding of providing comfortable position for a patient**

- **To develop broad understanding of position and alignment of patient at the correct distance from the test chart**

Mode of Evaluation: The theory performance of students is evaluated as

## Course

### Objectives

To understand the basic of systemic condition and eye.

### Course Outcomes

On completion of this course, the students will be able to understand Pathophysiology, classification, clinical examination, diagnosis of diseases like Arterial Hypertension, Diabetes mellitus, Tropical Disease and the Eye: Leprosy, Syphilis, Malaria, Neurological disease and the eye.

### Catalog Description

This subject deals with the pathophysiology of hypertension, diabetes, Acquired Heart Disease, Connective Tissue Disease, Thyroid Disease, Tuberculosis, Vitamin deficiency and the eye, Visual pathway lesions, Papilloedema, Genetic disorders and the eye, Phacomatoses & the eye.

### Text Books

1. *Clinical Ophthalmology – Jack J. Kanski*

### Reference Books

1. *Clinical Ophthalmology – Jack J. Kanski*

### Course Content

1. Arterial Hypertension: Pathophysiology, classification, clinical examination, diagnosis, complications, management, Hypertension and the eye.
2. Diabetes mellitus: Pathophysiology, classification, clinical features, diagnosis, complications, management, Diabetes mellitus and the eye.
3. Acquired Heart Disease – Embolism, Rheumatic heart disease, Sub acute bacterial endocarditic. Heart disease & the eye.
4. Malignancy: Definitions, nomenclature, characteristics of benign & malignant neoplasms. Grading and staging of cancer, diagnosis, principles of treatment. Neoplasia and the eye.
5. Connective Tissue Disease: Anatomy and path physiology: Arthritis.
6. Thyroid Disease: Anatomy and physiology of the thyroid gland, Classification of thyroid disease, Diagnosis, complications, clinical features, management of thyroid disease involving eye.
7. Tuberculosis: Etiology, pathology, clinical features, pulmonary TB, diagnosis, complications, treatment of tuberculosis involving the eye.
8. Tropical Disease and the Eye: Leprosy, Syphilis. Malaria.
9. Vitamin deficiency and the eye
10. Neurological disease and the eye: Classification of neurological diseases, Demyelinating diseases
11. Visual pathway lesions
12. Papilloedema.
13. Genetic disorders and the eye.
14. Phacomatoses & the eye.

### Course Objectives

To understand the basics of geriatric and pediatric optometry.

### Course Outcomes

On completion of this course, the students will be able to understand Vision & Paediatric evaluation, diagnosis & management.

### Catalog Description

This subject deals with Strabismus & Amblyopia, Non- Strabismus Binocular Disorders, Neuro- Optometric Rehabilitation, Evaluation, Diagnosis & Optometric management of children with mental retardation C.P. Dyslexia, . Refraction in special cases (pseudophakia , aphakia, irregular corneal astigmatism , coloboma of iris. It also deals with choroids, Retina, Nystagmus, Post R.K., PRK, LASIK), Congenital cataract, glaucoma, Patient with low vision, Patient with anisometropia (Anisokonia), Monocular & binocular subjective refraction.

### Text Books

1. *Paediatric Optometry*, By Jerome Rosner
2. *Vision development*, By ILG & Bullis
3. *Management of Special Population*, By Dominiquee Maino

### Reference Books

### Course Objectives

To understand the basic of occupational optometry.

### Course Outcomes

On completion of this course, the students will be able to understand Occupational health, hygiene and safety, International bodies- International Labor Organization( ILO), World Health Organization(WHO), National bodies , Occupational diseases.

### Catalog Description

This subject involves study of Occupational health, Acts and Rules - Factories Act, Workman's Compensation Act, Employee State Insurance Act Effect of physical, Chemical & other hazards on Eye & Vision, Occupational diseases - caused by physical agents, chemical agents and Visual Display Units – Visual Display Unit & Visual Display Terminal, Sports terminologies & Sports Vision Examination Personal protective equipments - General, eye - selection, use and testing for Standards.

### Text Books

1. *Eye Essentials- Environmental and Occupational Optometry*, by Gordon Carson

### Reference Books

1. *Eye Essentials- Environmental and Occupational Optometry*, by Gordon Carson

### Course Content

**MODULE 1:** Introduction to Occupational health, hygiene and safety, International bodies- International Labor Organization( ILO), World Health Organization(WHO), National bodies

**MODULE- 2:** Acts and Rules - Factories Act, Workman's Compensation Act , Employee State Insurance Act Effect of physical, Chemical & other hazards on Eye & Vision

**MODULE 3:** Occupational diseases - caused by physical agents, chemical agents and Visual Display Units – Visual Display Unit & Visual Display Terminal

**MODULE 4:** Sports terminologies & Sports Vision Examination Personal protective equipments - General, eye - selection, use and testing for Standards

**MODULE 5:** Eye Safety Workplace Assessment, Visual Requirement of Jobs

**Mode of Evaluation:** The theory and lab performance of students are evaluated separately.

Course

## Objectives

**Skills to be acquired at the end of this course**

- Reading of spectacle prescription
- Counseling the patient
- Lens edge thickness calculation
- Frame & lens measurements and selection
- Writing spectacle lens order
- Facial measurements - Interpupillary distance measurement and measuring heights (single vision, multifocal, progressives)
- Lens verification and axis marking and fitting of all lens types
- Final checking of finished spectacle with frame adjustments
- Delivery and follow-up
- Troubleshooting complaints and handling patient's questions.

## Course Outcomes

On completion of this course, the students will be able to Counsel the patient, Lens edge thickness calculation, Frame & lens measurements and selection and Writing spectacle lens order

## Catalog Description

This course will deal with the dispensing aspects of spectacle lenses and frames needed to manage the customer in an Optical set up, from counseling to delivering the spectacles.

## Text Books

1. David Wilson: Practical Optical Dispensing, OTEN- DE, NSW TAFE Commission, 1999
2. C V Brooks, IM Borish: System for Ophthalmic Dispensing, Second edition, Butterworth-Heinemann, USA, 1996

## Reference Books

1. David Wilson, Steve stenersen: Practical optical workshop, OTEN- DE, NSW TAFE Commission, 2002.
2. Margaret Dowaliby: Practical Aspects of Ophthalmic optics, Fourth edition, Butterworth Heinemann, USA, 2001

## Course Content

**MODULE 1:** Components of spectacle prescription & interpretation, transposition, Add and near power relation. Frame selection – based on spectacle prescription, professional requirements, age group, face shape. Measuring Inter-pupillary distance (IPD) for distance & near, bifocal height.

**MODULE 2:** Lens & Frame markings, Pupillary centers, bifocal heights, Progressive markings & adjustments – facial wrap, pantoscopic tilt. Recording and ordering of lenses (power, add, diameter, base, material, type, lens enhancements).

**MODULE 3:** Neutralization – Hand & lensometer, axis marking, prism marking, Faults in spectacles (lens fitting, frame fitting, patients complaints, description, detection and correction)

**MODULE 4:** Final checking & dispensing of spectacles to customers, counseling on wearing & maintaining of spectacles, Accessories – Bands, chains, boxes, slevets, cleaners, screwdriver kit. Spectacle repairs – tools, methods, soldering, riveting, frame adjustments.

**MODULE 5:** Special types of spectacle frames,  $\frac{3}{4}$ Monocles,  $\frac{3}{4}$ Ptosis crutches,  $\frac{3}{4}$ Industrial safety glasses,  $\frac{3}{4}$ Welding glasses, Frame availability in Indian market

**Mode of Evaluation:** The theory and lab performance of students are evaluated separately.

Course

### Objectives

To understand the basic of systemic condition and eye.

### Course Outcomes

On completion of this course, the students will be able to understand Pathophysiology, classification, clinical examination, diagnosis of diseases like Arterial Hypertension, Diabetes mellitus, Tropical Disease and the Eye: Leprosy, Syphilis, Malaria, Neurological disease and the eye.

### Catalog Description

This subject deals with the pathophysiology of hypertension, diabetes, Acquired Heart Disease, Connective Tissue Disease, Thyroid Disease, Tuberculosis, Vitamin deficiency and the eye, Visual pathway lesions, Papilloedema, Genetic disorders and the eye, Phacomatoses & the eye.

### Text Books

1. *Clinical Ophthalmology – Jack J. Kanski*

### Reference Books

1. *Clinical Ophthalmology – Jack J. Kanski*

### Course Content

1. Arterial Hypertension: Pathophysiology, classification, clinical examination, diagnosis, complications, management, Hypertension and the eye.
2. Diabetes mellitus: Pathophysiology, classification, clinical features, diagnosis, complications, management, Diabetes mellitus and the eye.
3. Acquired Heart Disease – Embolism, Rheumatic heart disease, Sub acute bacterial endocarditic. Heart disease & the eye.
4. Malignancy: Definitions, nomenclature, characteristics of benign & malignant neoplasms. Grading and staging of cancer, diagnosis, principles of treatment. Neoplasia and the eye.
5. Connective Tissue Disease: Anatomy and path physiology: Arthritis.
6. Thyroid Disease: Anatomy and physiology of the thyroid gland, Classification of thyroid disease, Diagnosis, complications, clinical features, management of thyroid disease involving eye.
7. Tuberculosis: Etiology, pathology, clinical features, pulmonary TB, diagnosis, complications, treatment of tuberculosis involving the eye.
8. Tropical Disease and the Eye: Leprosy, Syphilis. Malaria.
9. Vitamin deficiency and the eye
10. Neurological disease and the eye: Classification of neurological diseases, Demyelinating diseases
11. Visual pathway lesions
12. Papilloedema.
13. Genetic disorders and the eye.

Version 1.0	Date of Approval: 11 – 01 – 2016	3	0	0	3
Pre-requisites//Exposure					
Co-requisites					

### Course Objectives

This program is aimed at training candidates for the job of a “Vision Technician”, in the “Healthcare” Sector/Industry and aims at building the following key competencies amongst the learner

### Course Outcomes

- Demonstrate knowledge and understanding about the role of Vision technician in the healthcare settings.
- Demonstrate the ability to perform clinical skills essential in performing administrative and certain clinical duties i.e. scheduling appointments, maintaining medical records, recording vital signs and medical histories, preparing patients for examination, and dispensing ophthalmic prescription.
- Demonstrate safe handling of devices and positioning of patient for measurement of visual acuity.
- Demonstrate ability to guide & educate patient on relevant information under the guidance or supervision of ophthalmologist.
- Demonstrate bio medical waste management.
- Practice infection control measures.
- Demonstrate safe practices to use equipment's required in their role.
- Demonstrate safe handling and storing of documents, record maintenance etc.
- Demonstrate techniques to maintain the personal hygiene needs
- Demonstrate professional behavior, personal qualities and characteristics of a Vision Technician
- Demonstrate good communication and team worker ability in the role of Vision Technician

### Reference Books

10. A K Khurana: Comprehensive Ophthalmology, 4th edition, New age international (p) Ltd. Publishers, New Delhi, 2007

## COURSE CONTENT

### Module 1

#### Basic Optics:

**To understand the principles, concepts of light and vision • Understanding Eye as refractive apparatus**  
**• To develop an understanding for prescription of Glasses & lenses**

#### Ophthalmic Lens, Refraction Errors & Correction Of Errors:

**To gain understanding regarding ophthalmic glasses, Astigmatic lenses, Prisms, contact lens, measurement and unit of power etc**

- **To understand the principles, concepts, instruments, and methods in optics**
- **Understanding of geometric optics**
- **To develop an understanding of clinical optics**

#### Vision Assessment:

**To know different ways to check visual acuity**

- **To be able to conduct torch examination of different parts of eye**
- **To be able to select appropriate visual acuity test and correct illumination in a testing room**
- **Understanding of using Snellen chart according to patient preferences**
  - **To be able to use occulder and pinhole**
  - **To be able to instill mydriatic or cycloplegic drops or ointments as indicated**

### Module 2

#### Spectacles ; Preparation & Dispensing:

**To be able to confirm patient's existing use of optical correction**

- **To develop broad understanding for evaluating optical prescription of spectacles prescribed by specialist**
- **To distinguish between different types of lenses**
- **To be able to identify the optical centre of a lens and lens decentration**
- **To understand regarding principles of focimetry and different types of focimeters**
- **To obtain various facial frame measurements using standard measuring devices**
- **To be able to differentiate between frame & lens**
- **To develop broad understanding for filling laboratory order forms**
- **To be able to utilize lens focimeters, gauges, and clocks to ascertain power, axis, major (prism) reference positions, center and edge thicknesses, and prism for single-vision and multi-focal lenses**

#### Ophthalmic Equipment:

**To understand regarding equipment used in ophthalmology department and their storage process**

- **To gain understanding regarding cleaning & sterilization of instrument, fumigation, Swab, pads, drums, autoclaving.**
- **To be able to verbalize the role of VT before any surgical procedure or operation or any procedure**
- **To be able to understand requirements and protocols for maintenance and calibration of equipment**

### Module 3

Soft Skills And Communication II:

**Learn basic reading and writing skills**

- **Learn sentence formation • Learn grammar and composition**
- **Learn how to enhance vocabulary**
- **Learn Goal setting, team building, team work, time management, thinking and reasoning & communicating with others**

Common Ophthalmic Emergencies:

**Understand the common ophthalmic emergencies**

- **To understand what to do in ophthalmic emergencies**
- **To gain understanding regarding organization's emergency procedures and responsibilities for handling emergencies situations**

Sensitization Towards Organization Policies & Procedure:

- **Understand the need to follow organization policies and procedures • Understand techniques to remove spills in accordance with policies and procedures of the organizatio**

## Module 4

### Observing And Reporting:

**Understand the importance of observing and reporting before, during & after procedure**

- **Understanding the importance of timely information to the appropriate authority in case of routine and emergency situations.**

### Infection Control Measures - Policies and Procedures:

- **To understand the importance of hand washing and its steps**
- **To understand ; Needle Stick Injuries (NSI)**
- **To gain understanding regarding transmission based precautions and & its types**
- **To understand the meaning of ventilation and state it's clinical significance**
- **To understand the principles of linen management**
- **To understand the process of cleaning, sterilization and disinfection of equipment and work area along with it's significance**
- **To understand various occupational hazards for a health worker**

### Confidentiality, Documentation & Records:

- **Understand guidelines for documentation**
- **Learn various types of records of importance for vision technician**
- **Understand use and importance of records.**
- **To be able to maintain the confidentiality of the medical records**
- **Understand abbreviations and symbols**
- **Enter, transcribe, record, store, or maintain information in written or electronic/magnetic form**

## Module 5

### Professional Behaviour In Healthcare Setting:

- **How to maintain restful environment**
- **Learn general and specific etiquettes to be observed on duty**
  - **Understand need for compliance of organizational hierarchy and reporting**
  - **Understand the legal and ethical issues**
- **Understand importance of conservation of resources**

### Basic Computer Knowledge:

- **To gain broad understanding about Application of computers in • Practice • Give Introduction to Computers: • Block diagram • Input and Output devices • Storage devices • Give Introduction to operating systems • Need of Operating systems (OS) • Function of OS • Windows 2000 – Utilities and basic operations**

Mode of Evaluation: The theory performance of students is evaluated as

- **To be able to differentiate between frame & lens**
- **To develop broad understanding for filling laboratory order forms**
- **To be able to utilize lens focimeters, gauges, and clocks to ascertain power, axis, major (prism) reference positions, center and edge thicknesses, and prism for single-vision and multi-focal lenses**

#### Ophthalmic Equipment:

**To understand regarding equipment used in ophthalmology department and their storage process**

- **To gain understanding regarding cleaning & sterilization of instrument, fumigation, Swab, pads, drums, autoclaving.**
- **To be able to verbalize the role of VT before any surgical procedure or operation or any procedure**
- **To be able to understand requirements and protocols for maintenance and calibration of equipment**

### Module 3

Soft Skills And Communication II:

**Learn basic reading and writing skills**

- **Learn sentence formation • Learn grammar and composition**
- **Learn how to enhance vocabulary**
- **Learn Goal setting, team building, team work, time management, thinking and reasoning & communicating with others**

Common Ophthalmic Emergencies:

**Understand the common ophthalmic emergencies**

- **To understand what to do in ophthalmic emergencies**
- **To gain understanding regarding organization's emergency procedures and responsibilities for handling emergencies situations**

Sensitization Towards Organization Policies & Procedure:

- **Understand the need to follow organization policies and procedures • Understand techniques to remove spills in accordance with policies and procedures of the organization**

## Module 4

### Observing And Reporting:

**Understand the importance of observing and reporting before, during & after procedure**

- Understanding the importance of timely information to the appropriate authority in case of routine and emergency situations.

### Infection Control Measures - Policies and Procedures:

- To understand the importance of hand washing and its steps
- To understand ; Needle Stick Injuries (NSI)
- To gain understanding regarding transmission based precautions and & its types
- To understand the meaning of ventilation and state it's clinical significance
- To understand the principles of linen management
- To understand the process of cleaning, sterilization and disinfection of equipment and work area along with it's significance
- To understand various occupational hazards for a health worker

### Confidentiality, Documentation & Records:

- Understand guidelines for documentation
- Learn various types of records of importance for vision technician
- Understand use and importance of records.
- To be able to maintain the confidentiality of the medical records
- Understand abbreviations and symbols
- Enter, transcribe, record, store, or maintain information in written or electronic/magnetic form

## Module 5

### Professional Behaviour In Healthcare Setting:

- How to maintain restful environment
- Learn general and specific etiquettes to be observed on duty
  - Understand need for compliance of organizational hierarchy and reporting
  - Understand the legal and ethical issues
- Understand importance of conservation of resources

### Basic Computer Knowledge:

- To gain broad understanding about Application of computers in • Practice • Give Introduction to Computers: • Block diagram • Input and Output devices • Storage devices • Give Introduction to operating systems • Need of Operating systems (OS) • Function of OS • Windows 2000 – Utilities and basic operations

Mode of Evaluation: The theory performance of students is evaluated as

	Theory	
Components	Internal	SEE
Marks	30	70
Total Marks	100	

### Relationship between the Course Outcomes (COs) and Program Outcomes (POs)

Mapping between Cos and Pos		
Sl. No.	Course Outcomes (COs)	Mapped Programme Outcomes

1.	<ul style="list-style-type: none"> <li>• <b>Demonstrate bio medical waste management.</b></li> <li>• <b>Practice infection control measures.</b></li> <li>• <b>Demonstrate safe practices to use equipment's required in their role.</b></li> <li>• <b>Demonstrate safe handling and storing of documents, record maintenance etc.</b></li> <li>• <b>Demonstrate techniques to maintain the personal hygiene needs</b></li> <li>• <b>Demonstrate professional behavior, personal qualities and characteristics of a Vision Technician</b></li> <li>• <b>Demonstrate good communication and team worker ability in the role of Vision Technician</b></li> </ul>	1,2,3,4,5,6,7,8,9,10

<b>Antirequisite</b>				
	<b>L</b>	<b>T</b>	<b>P J</b>	<b>C</b>
	<b>0</b>	<b>0</b>	<b>040</b>	<b>20</b>

### Course Objectives:

### Course Outcomes

<b>CO1</b>	<b>To understand about the basic optometric set up in a clinic</b>
<b>CO2</b>	<b>To get acquainted with the procedures carried out in a patient care</b>
<b>CO3</b>	<b>To apply theoretical knowledge in diagnosis and detection of an ocular ailment</b>
<b>CO4</b>	<b>To understand the role of research in inculcating an evidence based practice</b>
<b>CO5</b>	<b>To understand the need of ethical approval prior to starting a research project</b>

### Text Book (s)

### Reference Book (s)

1. J Boyd Eskridge, John F Amos, ' Clinical procedures in Optometry'
2. C R Kothari, 'Research Methodology'

<b>Unit-1</b>	<b>8 hours</b>
<b>Introduction and Orientation-</b>	
<ol style="list-style-type: none"> <li>1. An orientation programme to introduce hospital based patient care</li> <li>2. Vision, mission of the organisation with accreditation body guidelines to be followed(if any)</li> </ol>	
<b>Unit-2</b>	<b>8 hours</b>
<b>Clinical procedures in Optometry</b>	
<ol style="list-style-type: none"> <li>1. Hands on training to be conducted keeping the students on observation prior to handling patients</li> <li>2. Materials, eyedrops to be required for carrying out tests in a daily basis</li> <li>3. Proper introduction of waste management system</li> </ol>	
<b>Unit-3</b>	<b>8 hours</b>
<b>Clinical Research</b>	
<ol style="list-style-type: none"> <li>1. Introducing the need of clinical research in carrying out an evidence based patient care</li> <li>2. Formulating a research proposal</li> <li>3. Availability of resources to be required for carrying out the experiments</li> </ol>	
<b>Unit-4</b>	<b>8 hours</b>
<b>Research Methodology and Ethical approval</b>	
<ol style="list-style-type: none"> <li>1. Ethical board review of the study proposed</li> </ol>	

2. Post approval, sampling and collection of data
3. Running statistical analysis to agree or disagree the hypothesis
4. Discussion based on literature

<b>Unit-5 hours</b>	<b>8</b>
-------------------------	----------

**Publication and outcome**

1. Writing the dissertation with all the annexure
2. Writing a scientific paper in a good indexed journal

**Continuous Assessment Pattern**

<b>Internal Assessment (IA)</b>		<b>End Term Test (ETE)</b>	<b>Total Marks</b>
<b>30</b>		<b>70</b>	<b>100</b>
