

GALGOTIAS UNIVERSITY

Syllabus of

B.Sc. Cardiovascular Technology

| Name of School: | School of Medical and Allied Sciences |
|-----------------|---------------------------------------|
| Department: | Cardiovascular Technology |
| Year: | 2015-18 |

School of Medical and Allied Sciences

Course: B.Sc Cardiovascular Technology

Scheme: 2015 – 2016

First Semester

| S.No | Course Code | Subject | L | T | P | С | Evalı | ation Sche | me | |
|------|----------------|------------------------------------|---|---|---|----|----------|------------|-------|-------------|
| | | | | | | | Internal | External | Total | CBL/P BL |
| 1. | CVT101 | General Anatomy-I | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 2. | CVT102 | General Physiology -I | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 3. | CVT103 | Biochemistry-I | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 4. | LLL101 | Universal Human Values & Ethics | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 5. | EVS102 | Energy & Environment Sciences | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 6. | CVT151 | General Anatomy-I (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| 7. | CVT152 | General Physiology-I (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| 8. | CVT153 | Biochemistry-I (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| | | Total | | | | 18 | 240 | 560 | 800 | |

Second semester

| S.No | Course Code | Subject | L | T | P | С | E | valuation Scl | heme | |
|------|----------------|--|---|---|---|----|----------|---------------|-------|---------|
| | | | | | | | Internal | External | Total | CBL/PBL |
| 1. | CVT104 | General Anatomy-II | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 2. | CVT105 | General Physiology-II | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 3. | CVT106 | Cardiac Pharmacology and Clinical Treatment | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 4. | CVT107 | Cardio Pathology | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 5. | CVT108 | Computer Fundamentals | 2 | 0 | 0 | 2 | 30 | 70 | 100 | CBL |
| 6. | CVT153 | Cardiac Pharmacology and Clinical Treatment (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| 7. | CVT154 | Computer Fundamentals and programming (P) | 0 | 0 | 2 | I | 30 | 70 | 100 | CBL |
| | | TOTAL | | | | 16 | 210 | 490 | 700 | |

Third semester

| S.No, | Course Code | Subject Name | L | Т | P | С | Evaluation Scheme | n | | |
|-------|----------------|---|---|---|---|----|-------------------|----------|-------|-------------|
| | 3040 | | | | | | Internal | External | Total | CBL/ PBL |
| 1. | CVT201 | Cardio Pathophysiology-II | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 2. | CVT202 | Microbiology | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 3. | CVT203 | Medical Electronics, biophysics and computer usage relevant to Cardiac Technology-I | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 4. | CVT204 | Basic Electrocardiography-I | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 5. | ENG131 | Communicative English-I | 2 | 0 | 0 | 2 | 30 | 70 | 100 | CBL |
| 6. | CVT251 | Microbiology (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| 7. | CVT252 | Medical Electronics, biophysics and computer usage relevant to Cardiac Technology-I (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| 8. | CVT253 | Basic Electrocardiography-I (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| 9. | ENG181 | Communicative English I (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| _ | | TOTAL | | | | 18 | 270 | 630 | 900 | |

Fourth semester

| S. | Course | Subject Name | L | T | P | C | Evaluatio | n Scheme | | |
|-----|--------|---|---|---|---|----|-----------|----------|-------|---------|
| No. | code | | | | | | Internal | External | Total | CBL/PBL |
| 1. | CVT205 | Medical Electronics, biophysics and computer usage relevant to Cardiac Technology-II | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 2. | CVT206 | Basic Electrocardiography- II | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 3. | CVT207 | Advanced Electro- Cardiography-I | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 4. | ENG231 | Communicative English - II | 2 | 0 | 0 | 2 | 30 | 70 | 100 | CBL |
| 5. | CVT254 | Medical Electronics, biophysics and computer usage relevant o cardiac technology – II (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| 6. | CVT255 | Basic Electrocardiography- II (P) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| 7. | ENG281 | Communicative English - II (Lab) | 0 | 0 | 2 | 1 | 30 | 70 | 100 | CBL |
| | | | | | | 14 | 210 | 490 | 700 | |

Fifth semester

| S. | Course | Subject Name | L | T | P | C | Evaluation Scheme | | | |
|-----|---------------|--|----------------|---|---|----------------|-------------------|----------|-------|---------|
| No, | Code | • | | | | | Internal | External | Total | CBL/PBL |
| 1. | | | <mark>3</mark> | 0 | 0 | <mark>3</mark> | 30 | 70 | 100 | CBL |
| | CVT301 | Treadmill exercise stress testing and 24 hour Ambulatory ECG recording | | | | | | | | |
| 2. | CVT302 | Echocardiography | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 3. | CVT303 | Advanced Electro Cardiography-II | 3 | 0 | 0 | 3 | 30 | 70 | 100 | CBL |
| 4. | CCT304 | Cardiac Care Technician-I | 10 | 0 | 0 | 10 | 30 | 70 | 100 | CBL |
| 5. | CVT351 (P) | Treadmill exercise stress testing and 24 hour Ambulatory ECG recording (P) | 0 | 0 | 4 | 2 | 30 | 70 | 100 | CBL |
| 6. | CVT352 (P) | Echocardiography (P) | 0 | 0 | 4 | 2 | 30 | 70 | 100 | CBL |
| 7. | CCT353 (P) | Cardiac Care Technician-I (P) | 0 | 0 | 6 | 3 | 30 | 70 | 100 | CBL |
| | | TOTAL | | | | 26 | 210 | 490 | 700 | |

Sixth semester

| S. | Course code | Subject Name | L | T | P | C | Evaluatio | n Scheme | | |
|-----|---------------|---|----------|---|----------------|----------------|-----------|----------|-------|---------|
| No, | | | | | | | Internal | External | Total | CBL/PBL |
| 1. | CVT304 | | 3 | 0 | 0 | <mark>3</mark> | 30 | 70 | 100 | CBL |
| | | Cardiac catheterization laboratory basics | | | | | | | | |
| 2. | CVT305 | Cardiac catheterization laboratory advanced | 3 | O | <mark>O</mark> | <mark>3</mark> | 30 | 70 | 100 | CBL |
| 3. | CVT306 | Research Methodology and Biostatistics | 3 | 0 | 0 | <mark>3</mark> | 30 | 70 | 100 | CBL |
| 4. | CCT307 | Cardiac Care Technician-II | 8 | 0 | 0 | 8 | 30 | 70 | 100 | CBL |
| 5. | CVT353 | Cardiac catheterization laboratory basics (P) | 0 | 0 | 4 | 2 | 30 | 70 | 100 | CBL |
| 6. | CVT354 | Cardiac catheterization laboratory advanced (P) | 0 | 0 | 4 | 2 | 30 | 70 | 100 | CBL |
| 7. | CCT355 | Cardiac Care Technician-II (P) | 0 | 0 | 12 | <mark>6</mark> | 30 | 70 | 100 | CBL |
| | | TOTAL | | | | 27 | 210 | 490 | 700 | |

Seventh semester

| S.No | Course Code | Subject | L | T | P | C | Eval | uation Sch | neme | |
|------|----------------|---|---|---|-----------------|----|----------|------------|-------|---------|
| | | | | | | | Internal | External | Total | CBL/PBL |

| | | Total | | | | 20 | | | 100 | |

Eighth semester

| S.N. | Course Code | Subject | L | T | P | С | Eval | luation Sc | heme | |
|------|----------------|---|---|---|----|----|----------|--------------|-------|---------|
| | | | | | | | Internal | Extern al | Total | CBL/PBL |
| 1. | CVT402 | Clinical Internship Including Project Work | 0 | 0 | 40 | 20 | 30 | 70 | 100 | PBL |
| | | Total | | | | 20 | | | 100 | |

Total 159

| | 3 0 0 | 3 |
|--------------------|-------------------|---|
| Antirequisite | | C |
| Corequisite | | |
| Prerequisite | | |
| Course Code | CVT101 | |
| Name of The Course | General anatomy-I | |

Course Objectives:

To understand the basic human anatomy and its functions.

Course Outcomes

| CO1 | To understand, analyze and illustrate the human body as a whole. |
|-----|---|
| CO2 | To understand, analyze the locomotor system and differentiate the various parts of the same. |
| CO3 | The student will be able to understand, analyze and illustrate the heart and the vascular system. |
| CO4 | The student will be able to analyze and illustrate the gastro-intestinal tract. |
| CO5 | The student will be able to analyze and illustrate the respiratory system in detail. |

Text Book (s)

- 1. B.D Chaursia's, A Text Book of Anatomy
- 2. William Davis, Understanding Human Anatomy and Physiology, McGraw Hill
- 3. Ranganathan, T.S., A Text Book of Human Anatomy
- 4. Snell's Clinical anatomy

Reference Book (s)

- 1. Gray's Anatomy for Students by Drake
- 2. Atlas der Anatomie des Menschen
- 3. Book by Frank H. Netter

| Unit-1 | Introduction: Human body as a whole | 8 hours |
|------------|--|--------------------------------|
| Definition | n of anatomy and its divisions, Terms of location, | positions and planes, Cell and |
| its organ | elles, Epithelium-definition, classification, desc | cribe with examples, function, |
| Glands c | lassification, describe serous & mucous glands v | with examples, Basic tissues - |

| classification with examples. | |
|--|--|
| Unit-2 Locomotion and Support | 8 hours |
| Cartilage – types with example & histology, parts of long bone, microscopy of compact be vertebral disc, fontanelles of fetal skull, Joint | one, names of bones, vertebral column, inter |
| Unit-3 Cardiovascular System | 8 hours |
| Heart-size, location, chambers, exterior & integrated pulmonary circulation, Branches of aorta, coaxillary artery, brachial, artery, superficial particular pulse, Inferior venacava, portal vena | mmon carotid artery, subclavian artery, almar arch, femoral artery, internal iliac artery, |
| Unit-4 Gastro-intestinal System | 8 hours |
| , , <u>, , , , , , , , , , , , , , , , , </u> | histology), tonsil, dentition, pharynx, salivary large intestine, liver, gall bladder, pancreas, |
| Unit-5 Respiratory System | 8 hours |
| Parts of RS, nose, nasal cavity, larynx, track Histology of trachea, lung and pleura, Names | |
| | |

Continuous Assessment Pattern

| Internal Assessment (IA) | External (ETE) | Total Marks |
|--------------------------|----------------|-------------|
| 30 | 70 | 100 |

| Name of The Course | General physiology-I |
|--------------------|----------------------|
| Course Code | CVT102 |
| Prerequisite | |
| Corequisite | |
| Antirequisite | |

| L | T | P | C |
|---|---|---|---|
| 3 | 0 | 0 | 3 |

Course Objectives:

The basic objective of this course is to get familiar with human physiology.

Course outcome:

On completion of this course, the students will be able to understand-scope and importance of cell, physiological laws, blood groups, blood transfusion and fundamentals of different organ systems.

| CO1 | To understand, illustrate the cell, its functions with mitosis and meiosis |
|-----|--|
| CO2 | To understand and illustrate the importance of physiochemical laws applied to physiology like osmosis, diffusion |
| CO3 | To understand, illustrate the composition of blood and its components and analyze the importance of each component of blood. |
| CO4 | To understand and analyze the physiology of heart and the circulation system |
| CO5 | To understand and analyze the functioning of the respiratory and excretory system |

Text Books

- 1. Essentials of Medical Physiology, Book by K. Sembulingam and Prema Sembulingam
- 2. Guyton & Hall Textbook of Medical Physiology, by John E. Hall (Author), Mario Vaz (Author), Anura Kurpad (Author), Tony Raj (Author)
- 3. Medical Physiology by Boron (Author), Walter (Author)

Reference Books

- 1. Ganong's Review of Medical Physiology
- 2. Berne & Levy Principles of Physiology
- 3. Medical Physiology, International Edition Paperback 18 May 2016by Boron (Author), Walter (Author)

| Unit-1 | 8 hours |
|--|----------------------|
| Cell Definition, Structure and function of Cytoplasmic Organelles, Reproduct | tion-Meosis, Mitosis |
| Unit-2 | 8 hours |
| The important physico-chemical laws applied to physiology | |
| Diffusion, Osmosis, Bonding, Filtration, Dialysis, Surface Tension, Adsorption | on, Colloid. |
| Unit-3 | 8 hours |
| Introduction- composition and function of blood Red blood cells- Eryth | ropoiesis, stages of |
| differentiation function, counts physiological Variation. Haemoglobin -Stru | acture, function, |
| concentration physiological variation. Methods ofEstimation of Hb, | White blood cell- |

Production, function, life span, count, differential count. Platelets- Origin, normal count, morphology functions. Plasma Proteins- Production, concentration, types, albumin, globulin, fibrinogen, Prothrombin functions. Haemostasis& Blood coagulation. Haemostasis – Definition, normal haemostasis, clotting factors, mechanism of clotting disorders of clotting factors. Blood Bank, Blood groups-A, B, O system, Rh system.

Unit-4 8 hours

Circulation: General principles Heart: myocardium – innervation – transmission of cardiac impulse Events during cardiac cycle – cardiac output. Peripheral circulation: peripheral resistances – arterial blood pressure – measurements – factors regulation variations – capillary circulation – venous circulation. Special circulation: coronary cerebral – miscellaneous

Unit-5 8 hours

Mechanics of respiration – pulmonary function tests – transport of respiratory gases- neural and chemical regulation of respiration – hypoxia, cyanosis, dyspnoea – asphyxia.: Body fluids – distribution, measurement & exchange, Kidney – structure of nephron – mechanism of urine formation – composition of the urine and abnormal constituents – urinary Bladder & micturition.

Assessment Pattern

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| 30 | 70 | 100 |

| Name of The Course | Biochemistry-I | | |
|--------------------|----------------|---|---|
| Course Code | CVT103 | | |
| Prerequisite | | | |
| Corequisite | | | |
| Antirequisite | | | |
| | L T | P | C |
| | 3 0 | 0 | 3 |

Course Objectives:

To understand the basic biochemistry

Course outcome

On completion of this course, the students will be able to understand-scope and importance of cell, physiological laws, blood groups, blood transfusion and fundamentals of different organ systems.

| CO1 | To analyze and interpret carbohydrate metabolism |
|-----|--|
| CO2 | To analyze and interpret protein metabolism |
| CO3 | To analyze and interpret lipid metabolism |

| CO4 | To analyze and interpret vitamins |
|-----|-----------------------------------|
| CO5 | To analyze and interpret minerals |

Text Books

- 1. Biochemistry U. Satyanarayana, U. Chakrapani
- 2. Lippincott's Illustrated Reviews: Biochemistry
- 3. Das, Debajyothi, Biochemistry, Academic, Publishers, Calcutta.
- 4. Kaplan, Clinical Chemistry

Reference Books

- 1. Harper's Illustrated Biochemistry by Robert K. Murray, Darryl K. Granner, Peter A. Mayes
- 2. Lippincott's Illustrated Reviews: Biochemistry
- 3. Varley, Clinical Chemistry.
- 4. Kaplan, Clinical Chemistry

| Unit-1 | 8 hours |
|--|-------------|
| Carbohydrates: Glucose; fructose; galactose; lactose; sucrose; starch and glycos | |
| (properties and tests, Structure and function) | |
| Unit-2 | 8 hours |
| Proteins: Amino acids, peptides, and proteins (general properties & tests with a | few |
| examples like glycine, trytophan, glutathione, albumin, hemoglobin, collagen) | |
| Unit-3 | 8 hours |
| Lipids: Cholesterol and triacyglycerol Phospholipids and plasma membrane Ca | tabolism of |
| lipids Digestion and absorption of lipids (properties, Structure and function). | |
| Unit-4 | 8 hours |
| Vitamins: General with emphasis on A,B2, C, E and inositol (requirements, ass | imilation |
| and properties) | |
| Unit-5 | 8 hours |
| Minerals: Na, K, Ca, P, Fe, Cu and Se (requirements, availability and properties | S. |

Continuous Assessment Pattern

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| 30 | 70 | 100 |

| Name of The Course | Communicative English |
|--------------------|-----------------------|
| Course Code | ENG131 |
| Prerequisite | |
| Corequisite | |
| Antirequisite | |

| L | T | P | С |
|---|---|---|---|
| 2 | 0 | 0 | 2 |

Course Objectives:

The objective of the course is to:

- 1. Understand simple texts and a range of high frequency vocabulary in context
- 2. Describe aspects of personal and everyday life in both oral and written form
- 3. Produce short and simple connected texts on familiar topics
- 4. Basic understanding into pronunciation of English sounds

Course outcome

On the successful completion of the course, the student would be able to:

| CO1 | Develop the understanding into the communication and language as its medium |
|-----|---|
| CO2 | Develop the basic understanding of spoken English |
| CO3 | Improve their reading fluency skills through extensive reading |
| CO4 | Use and assess information from academic sources, distinguishing between main ideas and details |
| CO5 | Compare and use a range official support through formal and informal writings |

Text Books & Reference Books

Communication Skills by Dr. T. Ravichandran, Department of Humanities and Social Sciences (NPTEL)

English Language for Competitive Examinations By Prof. Aysha Iqbal (NPTEL)

Better Spoken English by Prof. Shreesh Chaudhary, Department of Humanities and Social Sciences, IIT Madras. (NPTEL)

Understanding Creativity and Creative Writing by Prof. Neelima Talwar(NPTEL)

Unit-1

- Communication: Definition, Types (Verbal and Non-verbal), Models, Language as a tool of communication
- The flow of Communication, Communication Networks
- Barriers to Communication
- Professional Communication
- Features of professional communication

Importance of Business/Technical Communication

Unit-2

- Word Formation
- Basic sentence structure
- Common Errors: Subject- Verb agreement, prepositions, Articles, Place of adverb, Consistency of tenses,
- Paragraph Writing: Methods, unity and coherence

Reading Skills: Types, Strategies, Barriers,

Unit-3:

• Official Communication: Letter, Memo, Agenda and Minutes of meeting, notice and circular, and email

Job Application,

Continuous Assessment Pattern

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| 30 | 70 | 100 |

| Name of The Course | Energy and Environmental Sciences | | | | |
|--------------------|-----------------------------------|---|---|---|---|
| Course Code | EVS102 | | | | |
| Prerequisite | | | | | |
| Corequisite | | | | | |
| Antirequisite | | | | | |
| | | L | Т | P | С |
| | | 3 | 0 | 0 | 3 |

Course Objectives:

- 1. To develop awareness about our environment.
- 2. To develop a concern about sustainable development.

Course Outcomes

| CO1 | Understand About environment and its components and Problems associated with |
|-----|---|
| | natural resources and their sustainable use. |
| CO2 | Chemical Toxicity of the chemicals in the environment and Sources of pollution in |
| | air, water and soil and Solid waste management and natural Disaster management. |
| CO3 | Understanding about social issues. |
| CO4 | Understanding of role of information technology to address environmental issues. |
| CO5 | Application of sustained Chemistry. |

Text Book (s):

- 1. Environmental Studies, Anubha Kaushik, C P Kaushik, New Age International Publishers, 2008,
- 2. Environmental Studies, Suresh K. Dhameja, S.K. Kataria and Sons .
- 3. Text Book of Environmental Studies, Erach Bharucha, University Press (India) Private Limited, 2005 Reference Book (s):
 - 1. Environmental Studies, Anubha Kaushik, C P Kaushik, New Age International Publishers, 2008,
 - 2. Environmental Studies, Suresh K. Dhameja, S.K. Kataria and Sons .
 - 3. Text Book of Environmental Studies, Erach Bharucha, University Press (India) Private Limited, 2005

Unit-1 8 hours

Definition, scope, importance, need for public awareness, Environmental Management Systems its objectives, components, EIA, Natural Resources – forest resources – use, exploitation, deforestation, construction of multipurpose dams – effect on forests, Water resources – use of surface and subsurface water; effect of floods, drought, water conflicts, Mineral resources – Use and exploitation, environmental effects of extracting and using mineral resources, Food resources – food problems, advantage and disadvantage of fertilizers & pesticides, effect on environment, Energy resources – need to develop renewable energy, land resources – Land degradation, landslides, soil erosion, desertification & case studies.

Unit-2 8 Hours

Chemical Toxicology

Toxic chemicals in the environment, Impact of toxic chemicals on enzymes, biochemical effects of arsenic, cadmium, lead, chromium, mercury, biochemical effects of pesticides.

Unit-3 8 hours

Environmental Pollution

Definition – Causes, pollution effects and control measures of Air, Water, Soil, Marine, Noise, Thermal, Nuclear hazards. Solid waste management: causes, effects and control measures of urban and industrial wastes, pollution measures, case studies, Disaster management: floods, earthquake, cyclone and landslides.

Unit-4 8 hours

Social Issues, Human Population and the Environment

Urban problems related to energy & sustainable development, water conservation, problems related to rehabilitation – case studies, Consumerism and waste products - Environment Protection Act, Air, Water, Wildlife, Forest Conservation Act, Environmental legislation and public awareness. Population growth, variation among nations, Population explosion, Environment and human health, Value Education, Women and Child Welfare,

| Role of Information Technology – Visit to local polluted site /Case Studies. | |
|--|----------|
| Unit-5 | 8 hours |
| Green Chemistry Introduction, Basic principles of green technology, concept of Atom economy, | Tools of |
| Green technology, zero waste technology. | |

Continuous Assessment Pattern

| Internal | End Term Test (ETE) | Total Marks |

Course Objectives: To understand the basic human anatomy and its functions.

Course Outcomes

| CO1 | To understand the anatomy of different body systems. |
|-----|--|
| CO2 | To understand the functions exhibited by the systems in our body. |
| CO3 | To understand the interrelationships among molecular, cellular, tissue and organ functions in each system. |
| CO4 | To understand contributions of organs and systems to the human body. |
| CO5 | To understand about the modern technology and tools used to study anatomy and physiology. |

Text Book (s):

- 1. William Davis, Understanding Human Anatomy and Physiology, McGraw Hill.
- 2. Chaurasia's, Practical of Human Anatomy.

Reference Book (s):

1. Grey's Anatomy.

| Unit-1 Introduction |
|---|
| The anatomy of different body systems. |
| Unit-2 |
| The histology of different body systems. |
| Unit-3 |
| The skeletal system. |
| Unit-4 |
| The organ systems. |
| Unit-5 |
| Modern technology and tools used to study anatomy and physiology. |

Continuous Assessment Pattern

| Internal Assessment (IA) | End Term Test (ETE) | Total Marks |

Course Objectives: To understand the basic human physiology practicals.

Course Outcomes:

| CO1 | To analyze and estimate haemoglobin levels and total WBC. |
|-----|--|
| CO2 | To analyze and estimate red blood cell counts and identify blood groups. |
| CO3 | To analyze and interpret differential WBC counts and PCV |
| CO4 | To analyze ESR and blood indices. |
| CO5 | Estimating and analyzing bleeding count, clotting time and blood pressure. |

Text Book (s):

1. A.K Jain, Practical Handbook of Human Physiology. Reference Book (s):

1. Guyton and Hall Text Book of Physiology.

| Unit-1 Introduction |
|---|
| 8hours |
| Haemoglobinometry, White Blood Cell Count, Red Blood Count. |
| Unit-2 |
| Determination of Blood Groups, Leishman's staining and Differential WBC |
| count, Determination of packed cell Volume. Erythrocyte sedimentation rate [ESR]. |
| Unit-3 |
| Calculation of blood indices, Determination of Clotting Time, Bleeding Time. Blood |
| pressure Recording. |
| Unit-4 |
| Auscultation for Heart Sounds, Artificial Respiration, Determination of vital capacity. |
| Unit-5 |
| Spirometery to measure various lung capacities & volumes, Respiratory rate, tidal |
| volume, VC, timed VC, IRV, IC, ERV, EC on Spirometery (demonstration only), |
| auscultation and percussion. |

| | | 0 | 0 | 2 | 1 |

Course Objectives:

The objective of the course is to:

- 1. Understand simple texts and a range of high frequency vocabulary in context
- 2. Describe aspects of personal and everyday life in both oral and written form
- 3. Produce short and simple connected texts on familiar topics
- 4. Basic understanding into pronunciation of English sounds

Course outcome

On the successful completion of the course, the student would be able to:

| CO1 | Develop the understanding into the communication and language as its medium |
|-----|---|
| CO2 | Develop the basic understanding of spoken English |
| CO3 | Improve their reading fluency skills through extensive reading |
| CO4 | Use and assess information from academic sources, distinguishing between main ideas and details |
| CO5 | Compare and use a range official support through formal and informal writings |

Text Books & Reference Books

Communication Skills by Dr. T. Ravichandran, Department of Humanities and Social Sciences (NPTEL)

English Language for Competitive Examinations By Prof. Aysha Iqbal (NPTEL)

Better Spoken English by Prof. Shreesh Chaudhary, Department of Humanities and Social Sciences, IIT Madras. (NPTEL)

Understanding Creativity and Creative Writing by Prof. Neelima Talwar(NPTEL)

Course content:

The following activities will be conducted in lab classes:

Introduction

Extempore

Movie Review

Phonetics (Sounds)

Phonetics (Transcription)

Practice on Clear Pronunciation

Practice on Tense Buster

Role Play

Group Discussion

Group Presentation by Students

Continuous Assessment Pattern

| | | 3 | 0 | 0 | 3 |

Course Objectives: To understand the basic human anatomy and its functions.

Course Outcomes

| CO1 | Students will be able to interpret the anatomy of the urinary system. |
|-----|--|
| CO2 | Students will be able to interpret the action of antianginal drugs on a patient with angina. |
| CO3 | Students will be able to interpret anatomy and functioning of the central nervous system. |
| CO4 | Students will be able to interpret the basic anatomy and functioning of the reproductive system. |
| CO5 | Students will be able to interpret the anatomy and functioning of the various sensory systems. |

Text Book (s):

1. William Davis, Understanding Human Anatomy and Physiology, McGraw Hill.

- 2. B D Chaursia's, A Text Book of Anatomy.
- 3. Ranganathan, T.S., A Text Book of Human Anatomy.

Reference Book (s):

- 1. Fattana, Human Anatomy, (Description and Applied), Saunder's& C P Prism Publishers, Bangalore.
- 2. Ester. M. Grishcimer, Physiology & Anatomy with Practical Considerations, J.P. LippinCott. Philadelphia
- 3. Grey's Text Book of Anatomy

Unit-1 Introduction

8 hours

Urinary System

Kidney, ureter, urinary bladder, male and female urethra, Histology of kidney, ureter and urinary

bladder.

Unit-2

8 Hours

Endocrine Glands

Names of all endocrine glands in detail on pituitary gland, thyroid gland, parathyroid gland,

suprarenal glad (gross & histology).

Unit-3

8 Hours

8 Hours

Nervous System

Neuron, Classification of NS, Cerebrum, cerebellum, midbrain, pons, medulla oblongata, spinal cord with spinal nerve (gross & histology), Meninges, Ventricles & cerebrospinal fluid, Names of basal nuclei, Cranial nerves, Sympathetic trunk & names of parasympathetic ganglia.

Unit-4

Reproductive System

Parts of male reproductive system, testis, vas deferens, epididymis, prostate (gross & histology),

Parts of female reproductive system, uterus, fallopian tubes, ovary (gross & histology), Mammary gland-gross.

Unit-5 8 Hours

Sensory Organs

Skin: Skin-histology, Appendages of skin, Eye: Parts of eye & lacrimal apparatus, Extra-ocular

Muscles & nerve supply, Ear: parts of ear- external, middle and inner ear and contents.

Continuous Assessment Pattern

| Antirequisite | | | | | |
| | | L | T | P | C |
| | | 3 | 0 | 0 | 3 |

Course Objectives: The basic objective of this course is to get familiar with human physiology.

Course Outcomes

| CO1 | Students will be able to interpret the workings of individual human cell and the impact of the environment on the human body. |
|-----|---|
| CO2 | Students will be able to interpret the functioning of the central nervous system. |
| CO3 | Students will be able to interpret the functioning of gastrointestinal system. |
| CO4 | Students will be able to interpret the basic functioning of the endocrine system and its hormones. |
| CO5 | Students will be able to interpret the functioning of the lymphatic and reproductive systems. |

Text Book (s):

- 1. Essentials of Medical Physiology, Book by K. Sembulingam and Prema Sembulingam.
- 2. Guyton & Hall Textbook of Medical Physiology, by John E. Hall (Author), Mario Vaz (Author), Anura Kurpad (Author), Tony Raj (Author)

Reference Book (s):

- 1. Ganong's Review of Medical Physiology, Book by Heddwen Brooks, Kim E. Barrett, Scott Boitano, and Susan M. Barman.
- 2. Berne & Levy Principles of Physiology, Textbook by Bruce A Stanton, Bruce M Koeppen, and Matthew N. Levy

| Unit-1 Introduction | 8 hours |
|---|-----------|
| General principles of cell physiology, Physiology of skeletal muscle. Environ Physiology Body temperature regulation (including skin Physiology). | nmental |
| Unit-2 | hours |
| Nervous System Neuron, Classification of NS, Cerebrum, cerebellum, midbrain, pons, medulla ob | olongata, |

spinal cord with spinal nerve (gross & histology), Meninges, Ventricles & cerebrospinal fluid, Names of basal nuclei, Blood supply of brain, Cranial nerves, Sympathetic trunk & names of parasympathetic ganglia.

Unit-3 8 Hours

Digestion: General arrangement ,Salivary digestion – functions & regulations Gastric digestion – functions & regulations Pancreatic digestion – functions & regulations Intestinal digestion – functions & regulations Liver & bile Absorption Motility Deglutition Vomiting Defecation Functions of large intestine Neurohumoral regulations of alimentary functions, summary.

Unit-4 8Hours

Endocrines: Hormone mechanism – negative feed backs – tropic action – permissive action – cellular action, hypothalamic regulation Thyroid - hormones, actions, regulations Adrenal cortex - hormones, actions, regulations Adrenal medulla – hormones, actions, regulations Parathyroid - hormones, actions, regulations Islets of pancreas – hormones, actions, regulations Miscellaneous hormones, actions, regulations Common clinical disorders.

Unit-5 8 Hours

Fundamentals of different Organ Systems

- i. Lymphatic System
- ii. Reproductive System

- 3. Pharmacology For Undergraduates, Agarwal S. L.
- 4. Pharmacology: Principles and Practice by Miles Hacker, William S. Messer, Kenneth A. Bachmann

| Unit-1 Introduction 8 hour |
|---|
| General Pharmacology |
| Introduction to pharmacology, dosage forms & routes of administration, mechanism o |
| action, concept of receptors, ADME, Adverse drug reactions. |
| Unit-2 8 Hours |
| Anti-anginal agents: Beta blockers- propranolol, atenolol, metoprolol, bisoprololcarvedilol esmolol; Nitrates-nitroglycerine, isosorbidedinitrate, isosorbidemononitrate, transdermal nitrate patches; Calcium channel blockers- nifedipine, verapamil, dilteazem, Amlodipine. Unit-3 |
| Anti-failure agents: Diuretics-furosemide, torsamide, thiazide diuretics, metolazone spironolactone, combination diuretics; Angiotensin convertying enzyme (ACE) inhibitors captopril Enalapril, ramipril, lisinopril, ACE inhibitors for diabetics and hypertensive rena disease; Digitalis and acute ionotropes— digoxin, doubutamine, dopamine, adrenaline |
| noradrenaline, isoprenaline. |

Anti-hypertensive drugs: Diuretics, beta-blockers, ACE inhibitors, calcium antagonists, direct Vasodilators, centrally acting and peripherally acting vasodilators.

Anti- arrhythmic agents: Amiodarone, adenosine, verapamil, diltiazem, lidocaine,

| mexiletine, Phenytoin, flecainide, bretylium, atropine. | |
|---|---------|
| Unit-5 | 8 Hours |

Antithrombotic agents: Platelet inhibitors: aspirin, clopidogrel; Anticoagulants: heparin, low molecular weight heparin, warfarin; Fibrinolytics: streptokinase, urokinase; Glycoprotein 2b3a antagonists: abciximab, tirofiban, eptifibatide. Lipid lowering and anti-atherosclerotic drugs: statins, exetimibe, niacin, fenofibrate.

Better Spoken English by Prof. Shreesh Chaudhary, Department of Humanities and Social Sciences, IIT Madras. (NPTEL)

Understanding Creativity and Creative Writing by Prof. Neelima Talwar(NPTEL

Unit-1

- Technical Writing: Meaning, Types, Style, Features
- Report: Types, Format, Structure, Citation, Planning and writing, Project report Manual and user guide: general layout, planning and writing

Unit-2

- Proposal: Types, format, structure, planning and writing
- Listening vs Hearing, Steps and Types of listening; Barriers of Listening, Methods to improve listening

Group Discussion

Unit-3

- Spelling and Phonetic Inconsistencies in English
- Basics of Pronunciation, Organs of speech, articulation, Introduction to Sounds (IPA)
- Phonetic/Phonemic Transcription

Presentation Strategies: Purpose, Audience and locale analysis, Non-verbal aspects, voice and pronunciation, effective PowerPoint preparation

Course Objectives: To get familiar with microbiology.

Course Outcomes

| CO1 | To understand, analyze and interpret microrganisms and their characteristics with reference to bacteria. |
|-----|--|
| CO2 | To understand, analyze and interpret viruses and their characteristics |
| CO3 | To understand and interpret techniques of sterilization |
| CO4 | To understand, analyze and interpret fungi and parasites. |
| CO5 | To understand and analyze different methods of cultivation and in identification of microbes. |

Text Book (s):

- 1. Aneja K.R. Experiments in Microbiology, Plant Pathology, Tissue Culture & Mushroom Cultivation, VishwaPrakashan.
- 2. Gunasekaran P, Lab Mannual of Microbiology, New Age Publishers
- 3. Davis, Dulbetco, Eisen Microbiology.
- 4. Stanier R.Y., Ingraham, J.L., Wheelis M.L. & Painter P.R. General Microbiology, Macmillan Press Limited.

- 5. Hugo and Russell, Pharmaceutical Microbiology, Black Well Scientific Publication, Oxford. 6. Prescott L.M., Harley J.P. &Klien D.A. Microbiology, McGraw Hill.
- 7. Sykes, Disinfection and Sterilization.

Reference Book (s):

- 1. Pelczar& Reid, Microbiology, Tata McGraw Hill, Delhi.
- 2. Virella G. Microbiology and Infectious Diseases, William & Wilkins.
- 3. Ananthanarayan R & Paniker CKJ, Textbook of Microbiology, Orient Longman

Unit-1 8 hours

General characters and classification of Bacteria, Growth and Maintenance of Microbes

Bacterial division, Batch Culture, Continuous culture, bacterial growth- total count, viable count, bacterial nutrition, oxygen requirement, CO2 requirement, temperature, pH, light

Characteristics of Bacteria

Morphology - Shape, Capsule, Flagella, Inclusion, Granule, Spore. Bacteria affecting the heart.

Unit-2 8 hours

Virus

General Characteristics of viruses, Cultivation, Nomenclature of viruses, Interaction – virus-host, Bacteriophage, Viruses affecting the heart- adenovirus, CMV, coxsackievirus B,Enteric cytopathic human orphan viruses (ECHO), Human Parvo viorus B19, Rubella

Unit-3 8 hours

Sterilization and Disinfection.

Physical agents- Sunlight, Temperature less than 1000C, Temperature at 1000C, steam at atmospheric pressure and steam under pressure, irradiation, filtration Chemical Agents-Alcohol, aldehyde, Dyes, Halogens, Phenols, Ethylene oxide

Unit-4 8 hours

Mycology & Parasitology:

Mycology: Introduction, classification, Fungus affecting the heart- Candida and Histoplasmacapsulatum, Aspergillus sp., Diagnosis.

Parasitology: Introduction, classification, Diagnosis. It role in heart disease-trypanosome, toxoplasma, trichura, Chaga's disease, echinococcus, amoebiasis.

Unit 5 8 hours

Staining Methods & Culture media

Definition, uses, basic requirements, classification, Agar, Peptone, Transport Media, Sugar

Media, Anaerobic Media, Containers of Media, Forms of Media

Simple, Grams staining, Ziehl-Neelsen staining or AFB staining, Negative Impregnation

Continuous Assessment Pattern

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| 30 | 70 | 100 |

| Name of The Course | Medical electronics, biophysics and computer usage relevant to cardiac technology-I |) |

| Course Code | CVT203 | |
| Prerequisite | | |
| Corequisite | | |
| Antirequisite | | |
| | | () |
| | 3 0 0 3 | 3 |

Course Objectives: To get familiar with microbiology.

Course Outcomes

| CO1 | To undersand and analyze medical physics, and its uses in diagnostic imaging |
|-----|--|
| CO2 | To understand the concept of blood pressure and pressure transduders |
| CO3 | To understand and interpret the concept of defibrillators, cathode ray tubes |
| CO4 | To understand and interpret the concept of Impedence plethysmography |
| CO5 | To understand and interpret the concept of pulse oximetry. |

Text Book (s):

- 1. Dhanjoo N. GhistaNoninvasive Cardiac assessment technology.
- 2. Alberto Benchimol Non-invasive diagnostic techniques in cardiology Williams & Wilkins, 1981
- 3. AtulLuthra ECG Made Easy JP Medical Ltd, 2012.

Reference Book (s):

1. Malcolm S. Thaler The Only EKG Book You'll Ever Need, Volume 365 Lippincott Williams & Wilkins, 2009

| Unit-1 | 8 hours |
|--|---------|
| Introduction to medical physics | |
| Unit-2 | 8 hours |
| Blood pressure recording, Pressure transducers | |
| Unit-3 | 8 hours |
| Defibrillators, Cathode ray tubes and physiological monitors | |
| Unit-4 | 8 hours |
| Impedence plethysmography | |
| Unit-5 | 8 hours |
| Pulse oximetry | |

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| 30 | 70 | 100 |

| Name of The Course | Basic Electrocardiography-I | | | | |
|--------------------|-----------------------------|---|---|---|----------------|
| Course Code | CVT204 | | | | |
| Prerequisite | | | | | |
| Corequisite | | | | | |
| Antirequisite | | | | | |
| | | L | T | P | C |
| | | 3 | 0 | 0 | <mark>3</mark> |

Course Objectives: To get familiar with Basic Electrocardiography.

Course Outcomes

| CO1 | To understand various principles of electrocardiography |
|-----|---|
| CO2 | To understand and apply the principles of electrocardiography |
| CO3 | To understand and interpret Electrocardiographic lead systems |
| CO4 | To understand and interpret hex axial reference frame and electrical axis |
| CO5 | To understand and record adult and paediatric ECGs |

Text Book (s):

- 1. Donald S. Baim Grossman's Cardiac Catheterization, Angiography, and Intervention, Volume 1 Lippincott Williams & Wilkins, 2005
- 2. Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011

Reference Book (s):

1. Patrick Kay, ManelSabate, Marco A. Costa Cardiac Catheterization and Percutaenous Interventions Taylor & Francis, 2004

| Unit-1 | 8 hours |
|---|-----------------------|
| Fundamental principles of electrocardiography: Cardiac electrical fie activation, Cardiac wave fronts | eld generation during |
| Unit-2 | 8 hours |
| Cardiac electrical field generation during ventricular recovery | |
| Unit-3 | 8 hours |
| Electrocardiographic lead systems: Standard limb leads, Precordial lea | ds and the Wisdom |
| Central terminal, Augmented limb leads | |
| Unit-4 | 8 hours |
| The hexaaxial reference frame and electrical axis | |
| Unit-5 | 8 hours |
| Recording adult and pediatric ECGs | |

Continuous Assessment Pattern

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| 10 | 70 | 100 |

| Name of The Course | Computer fundamentals | | | | |
|--------------------|-----------------------|---|---|---|---|
| Course Code | CVT108 | | | | |

| Corequisite | | | | | |
| Antirequisite | | | | | |
| | | L | T | P | C |
| | | 2 | 0 | 0 | 2 |

Course Objectives: The basic objective of this course is to get familiar with computers and programming Language.

Course Outcomes

| CO1 | |
|-----|--|
| CO2 | |
| CO3 | |
| CO4 | |
| CO5 | |

Text Book (s):

- 1. Computer Fundamentals, Anita Goel
- 2. Computer Fundamentals, Rashmi Sharma
- 3. Computer Fundamentals and Programming in C, ReemaThareja
- 4. Computer Fundamentals (Book + CD-Rom), PradeepK.Sinha&PritiSinha

Reference Book (s):

- 1. Computer Fundamentals, Dr. SushilaMadan
- 2. Computer Fundamentals and Information Technology, Ramesh Bangia

Unit-1 8 hours

Definition and Overview of Computer, Computer classification, Computer Organization, Computer code, computer classification of Boolean algebra. Input Devices Output devices, Storage devices. Computer Software, Types of software. Overview of Computer Networks, LAN, MAN, WAN, Internet, Intranet, network topology. Internetworking: Bridges, Repeaters and Routers

Unit-2

Introduction: Operating system and function, Evolution of operating system, Batch, Interactive, Time sharing and Real Time System. Single User Operating System and Multiuser Operating system, Compare MS-DOS vs. UNIX, Various window features. Internal and External commands in MS-DOS

Unit-3

Introduction to MS-OFFICE-2003, word 2003 Document creation, Editing, formatting table handling, mail merge, Excel-2003, Editing, working Retrieval, Important functions, short cut keys used in EXCEL

Unit-4

MS-Power point 2003-Job Profile, Elements of Power point , ways of delivering Presentation, concept of Four P's (Planning , Preparation, Practice and Presentation) ways of handling presentations e.g. creating, saving slides show controls, Adding formatting, animation and multimedia effects.

Unit-5

Computer applications in clinical studies.

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| 30 | 70 | 100 |

| Name of The Course | Microbiology (P) | | | | |

- 2. Practice of Clinical Echocardiography 5th Editionby Catherine M. Otto MD (Author)

Course Content

| CO1 | Unit 1 8 hours |
|-----|---|
| | M- Mode and 2D transthoracic echocardiography, Views used in transthoracic |
| | echocardiography, Doppler echocardiography: pulsed, continuous wave and colour |
| CO2 | Unit 2 8 hours |
| | Measurement of cardiac dimensions Evaluation of systolic and diastolic left |
| | ventricular function, Regional wall motion abnormalities, Stroke volume and |
| | cardiac output assessment, Transvalvular gradients, Orifice area, Continuity |
| | equation |
| CO3 | Unit 3 8 hours |
| | Echocardiography in Valvular heart disease: Mitral stenosis, Mitral regurgitation, |
| | Mitral valve prolapsed, Aortic stenosis, Aortic regurgitation, Infective endocarditis |
| | Prosthetic valve assessment, |
| CO4 | Unit 4 8 hours |
| | Echocardiography in Cardiomyopathies: Dilated, Hypertrophic, Restrictive, |
| | Constrictive pericarditis, pericardial effusion and cardiac tamponade, |
| CO5 | Unit 5 8 hours |
| | Echocardiographic detection of congentital heart desease: Atrial septal defect, |

Ventricular

septal defect, Patent ductus arteriosus, Pulmonary stenosis, Tetralogy of Fallot, Coarctation of aorta, Left atrial thrombus, Left atrial myxoma, Transoesophageal echocardiography.

Continuous Assessment Pattern

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| 30 | 70 | 100 |

| Name of The Course | ADVANCED ELECTRO-CARDIOGRAPHY-II | ľ | | | |
|--------------------|----------------------------------|----------------|---|---|---|
| Course Code | CVT303 | | | | |
| Prerequisite | | | | | |
| Corequisite | | | | | |
| Antirequisite | | | | | |
| | | L | T | P | C |
| | | <mark>3</mark> | 0 | 0 | 3 |

Course Objectives:

To get familiar with advanced electro cardiography

Course Outcomes

| CO1 | To analyze and interpret the changes seen in the cardia after ischaemic damage. |
|-----|---|
| CO2 | To analyze and interpret diseases associated with electrolyte imbalances. |
| CO3 | To analyze and interpret ventricular arrhythmias. |
| CO4 | To analyze and interpret heart blocks. |
| CO5 | To analyze and interpret cardioversions and defibrillators. |

Text Book (s)

- 1. Textbook of Clinical Electrocardiography S N Chugh
- 2. The ECG Made Easy Book by John R Hampton
- 3. Guyton & Hall Text Book of Physiology
- 4. 12-Lead Ecg: The Art Of Interpretation by Casimiro Garcia

Reference Book (s)

- 1. Practical electrocardiography Book by Henry J. L. Marriott
- 2. Clinical Electrocardiography: A Textbook by Antonio Bay's de Luna
- 3. ECG TEXTBOOK: Theory and Practical Fundamentals 2017 by OPRET (Author)
- 4. Ganong Text Book of Physiology

| Unit-1 | 8 hours |
|--|-----------|
| Evolution of electrocardiographic changes, Localization of ischemia or infarction, | |
| Noninfarction,Q waves, Primary and seconday T wave change | |
| Unit-2 | 8 hours |
| Electrolyte and metabolic ECG abnormalities, Cardiac arrhythmias, Ventricular pre | mature |
| beats, Supra-ventricular, tachycardias, Atrial flutter/fibrillation. | |
| Unit-3 | 8 hours |
| Ventricular Tachycardia/Ventricular fibrillation, Atrio Ventricular block, Prolonged | l PR |
| interval. | |
| Unit-4 | 8 hours |
| Mobitz type 1 and 2 block, Complete heart block, Direct Current (DC) shock. | |
| Unit-5 | 8 hours |
| Defibrillator, Monophasic and biphasic shock, Technique of cardioversion, Indica | tions for |
| cardioversion. | |

Continuous Assessment Pattern

| | | 3 | 0 | 0 | 3 |

Course Objectives:

- 1. To help students distinguish between values and skills, and understand the need, basic guidelines, content and process of value education.
- 2. To help students initiate a process of dialog within themselves to know what they 'really want to be' in their life and profession
- 3. To help students understand the meaning of happiness and prosperity for a human being.
- 4. To facilitate the students to understand harmony at all the levels of human living, and live accordingly.
- 5. To facilitate the students in applying the understanding of harmony in existence in their profession and lead an ethical life

Course Outcomes

| CO1 | To help students distinguish between values and skills, and understand the need, |
|-----|---|
| | basic guidelines, content and process of value education. |
| | |
| CO2 | To help students initiate a process of dialog within themselves to know what they |
| | 'really want to be' in their life and profession |
| | |
| CO3 | To help students understand the meaning of happiness and prosperity for a human |
| | being. |
| | |
| CO4 | To facilitate the students to understand harmony at all the levels of human living, |
| | and live accordingly. |
| | |
| CO5 | To facilitate the students in applying the understanding of harmony in existence in |
| | their profession and lead an ethical life |
| | |

Course Content

Unit-1 8 hours

Course Introduction - Need, Basic Guidelines, Content and Process for Value Education

- 1. Understanding the need, basic guidelines, content and process for Value Education
- 2. Self Exploration—what is it? its content and process; 'Natural Acceptance' and Experiential Validation- as the mechanism for self exploration
- 3. Continuous Happiness and Prosperity- A look at basic Human Aspirations
- 4. Right understanding, Relationship and Physical Facilities- the basic requirements for fulfillment of aspirations of every human being with their correct priority
- 5. Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario
- 6. Method to fulfill the above human aspirations: understanding and living in harmony at various levels.

Unit-2 8 hours

Understanding Harmony in the Human Being - Harmony in Myself

- 1. Understanding human being as a co-existence of the sentient 'I' and the material 'Body'
- 2. Understanding the needs of Self ('I') and 'Body' Sukh and Suvidha
- 3. Understanding the Body as an instrument of 'I' (I being the doer, seer and enjoyer)
- 4. Understanding the characteristics and activities of 'I' and harmony in 'I'
- 5. Understanding the harmony of I with the Body: Sanyam and Swasthya; correct appraisal of physical needs, meaning of Prosperity in detail

6. Programs to ensureSanyam and Swasthya

Unit-3 8 hours

Understanding Harmony in the Family and Society- Harmony in Human-Human Relationship -

- 1. Understanding harmony in the Family- the basic unit of human interaction
- 2. Understanding values in human-human relationship; meaning of *Nyaya* and program for its fulfillment to ensure *Ubhay-tripti*;
 - Trust (Vishwas) and Respect (Samman) as the foundational values of relationship
- 3. Understanding the meaning of *Vishwas*; Difference between intention and competence
- 4. Understanding the meaning of *Samman*, Difference between respect and differentiation; the other salient values in relationship
- 5. Understanding the harmony in the society (society being an extension of family): Samadhan, Samridhi, Abhay, Sah-astitva as comprehensive Human Goals
- 6. Visualizing a universal harmonious order in society- Undivided Society (*AkhandSamaj*), Universal Order (*SarvabhaumVyawastha*)- from family to world family!

Unit-4 8 hours

Understanding Harmony in the Nature and Existence - Whole existence as Co -existence -

- 1. Understanding the harmony in the Nature
- 2. Interconnectedness and mutual fulfillment among the four orders of nature-recyclability and self-regulation in nature
- 3. Understanding Existence as Co-existence (*Sah-astitva*) of mutually interacting units in all-pervasive space
- 4. Holistic perception of harmony at all levels of existence

Unit-5 8 hours

Implications of the above Holistic Understanding of Harmony on Professional Ethics

- 1. Natural acceptance of human values
- 2. Definitiveness of Ethical Human Conduct
- 3. Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order.
- 4. Competence in Professional Ethics:
- a) Ability to utilize the professional competence for augmenting universal human order,
 - b) Ability to identify the scope and characteristics of people-friendly and ecofriendly production systems, technologies and management models
- 5. Case studies of typical holistic technologies, management models and production systems
- 6. Strategy for transition from the present state to Universal Human Order:

- a) At the level of individual: as socially and ecologically responsible engineers, technologists and managers
- b) At the level of society: as mutually enriching institutions and organizations

| CO5 | To analyze and interpret ECG, echocardiography and defibrilation. | | | |
| | | | | |
| | | | | |

Text Book (s)

- 1. Parmar N.S., Health Education & Community Pharmacy CBS Publishers, Delhi.
- 2. Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011
- 3. Cardiac Monitor Technician Textbook: Theory and Hands On Approach By: Sultan, et al. Khan (Author), Faisal Khan MD

Reference Book (s)

- 1. Cardiac Monitor Technician Textbook: Theory and Hands On Approach By: Sultan, et al. Khan (Author), Faisal Khan MD
- 2. Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011

Course Content

CO1 Unit I 16 hours

Basic understanding of Healthcare Service Providers (primary, secondary & tertiary), cardiac department in a hospital, Understanding different parts of body, functions to be performed by CCT

- To understand various types of procedures carried out in the cardiac catheterization laboratory and other labs carrying out diagnostic.
- To gain broad understanding regarding Type of Sample
- Sample Handling
- Different equipment useful & correct method for blood sample collection
- Correct procedure of sample transportation.
- To exhibit Ethical Behavior and understanding of administrative functions of CCT
- To understand the need for counseling patient and family before, during and after the procedure (s)

CO2 Unit 2

To develop understanding of the concept of Healthy Living, procedures of Hand Hygiene

- To develop techniques of Grooming, use of PPE
- To ensure vaccination against common Infectious Diseases.

To understand regarding environmental safety and security requirement at a health care unit.

- To develop an understanding for handling the hazardous situation safely.
- Describe basics of first aid to develop understanding and precautions to ensure self safety.
- To understand the role of an CCT in monitoring healthy and safe environment.
- To understand the safety measures for disabled, pediatric & geriatric patients,

impact of medical negligence in clinical management and their different types

- To understand Surgical Site Infection and measures to prevent them, strategies which can be initiated for minimizing risk for patients
- To develop broad understanding regarding role of hospital on the occurrence of a disaster
- To understand fire prevention strategies and electrical safety measures which should be known to health worker

CO3 Unit 3

To gain understanding of importance of proper and safe disposal of bio-medical waste & treatment

- To gain understanding of categories of biomedical waste, disposal of bio-medical waste colour coding, types of containers, transportation of waste, etc.
- To gain broad understanding of standards for bio-medical waste disposal, means of biomedical waste treatment
- To understand the role of an infection control team

To develop an understanding of Cardiovascular System

• Basic understanding regarding size, shape, location and different layers of the heart, SA node and its functional significance, coronary circulation, different sounds produced in the heart and what is its significance.

CO4 Unit 4 16 hours

To understand cardiovascular diseases & risk factors behind occurrence of cardiac abnormalities

- To develop an understanding regarding various diseases of heart
- To understand the significance of coronary circulation, systemic circulation, types of vessels etc.
- To Identify the warning signs and symptoms of heart related disease condition

CO5 Unit 5

To develop understanding regarding ECG & it's procedure, different wave forms in ECG & common interpretation, Tilt Table Testing

• To develop an understanding regarding Echocardiography, position of

transducers, role of CCT while assisting cardiologist during Echocardiography / cardiac ultrasound

To understand the importance of hand washing and its steps

- To understand; Needle Stick Injuries (NSI)
- To gain understanding regarding transmission based precautions and & its types, meaning of ventilation and state it's clinical significance, principles of linen management
- To understand the process of cleaning, sterilization and disinfection of equipment and lab along with its significance
- To understand various occupational hazards for a health worker Sensitization & overview regarding Cardiac Arrest
- To understand regarding fundamentals of early defibrillation
- To understand principles of BLS (Adult chain of survival, CABD's of giving CPR),
- To understand operation of AED
- Principles of Adult BLS/Child BLS/Infant BLS

Continuous Assessment Pattern

| CO2 | Analyze and understand safe medical practices |
| CO3 | Analyze and understand safe waste disposal methods |
| CO4 | Analyze and understand risk factors in cardiac diseases |
| CO5 | To understand CPR/BLS |

Text Book (s)

- 1. Principles and practice of Medicine by Davidson
- 2. Harrisons Text Book of Medicine

Course Content

- Unit-1 Basic understanding of Healthcare Service Providers (primary, secondary & tertiary), cardiac department in a hospital, Understanding different parts of body, functions to be performed by CCT
- To understand various types of procedures carried out in the cardiac catheterization laboratory and other labs carrying out diagnostic.
- To gain broad understanding regarding Type of Sample
- Sample Handling
- Different equipment useful & correct method for blood sample collection
- Correct procedure of sample transportation.
- To exhibit Ethical Behavior and understanding of administrative functions of CCT
- To understand the need for counseling patient and family before, during and after the procedure (s)
- Unit-2 To develop understanding of the concept of Healthy Living, procedures of Hand Hygiene
- To develop techniques of Grooming, use of PPE
- To ensure vaccination against common Infectious Diseases.

To understand regarding environmental safety and security requirement at a health care unit.

- To develop an understanding for handling the hazardous situation safely.
- Describe basics of first aid to develop understanding and precautions to ensure self safety.
- To understand the role of an CCT in monitoring healthy and safe environment.
- To understand the safety measures for disabled, pediatric & geriatric patients, impact of medical negligence in clinical management and their different types
- To understand Surgical Site Infection and measures to prevent them, strategies which can

be initiated for minimizing risk for patients

- To develop broad understanding regarding role of hospital on the occurrence of a disaster
- To understand fire prevention strategies and electrical safety measures which should be known to health worker

Unit-3 To gain understanding of importance of proper and safe disposal of biomedical waste & treatment

- To gain understanding of categories of biomedical waste, disposal of bio-medical waste colour coding, types of containers, transportation of waste, etc.
- To gain broad understanding of standards for bio-medical waste disposal, means of biomedical waste treatment
- To understand the role of an infection control team

To develop an understanding of Cardiovascular System

• Basic understanding regarding size, shape, location and different layers of the heart, SA node and its functional significance, coronary circulation, different sounds produced in the heart and what is its significance

Unit-4 To understand cardiovascular diseases & risk factors behind occurrence of cardiac abnormalities

- To develop an understanding regarding various diseases of heart
- To understand the significance of coronary circulation, systemic circulation, types of vessels etc.
- To Identify the warning signs and symptoms of heart related disease condition

Unit-5 To develop understanding regarding ECG & it's procedure, different wave forms in ECG & common interpretation, Tilt Table Testing

• To develop an understanding regarding Echocardiography, position of transducers, role of CCT while assisting cardiologist during Echocardiography / cardiac ultrasound

To understand the importance of hand washing and its steps

- To understand; Needle Stick Injuries (NSI)
- To gain understanding regarding transmission based precautions and & its types, meaning

of ventilation and state it's clinical significance, principles of linen management

- To understand the process of cleaning, sterilization and disinfection of equipment and lab along with its significance
- To understand various occupational hazards for a health worker Sensitization & overview regarding Cardiac Arrest
- To understand regarding fundamentals of early defibrillation
- To understand principles of BLS (Adult chain of survival, CABD's of giving CPR),
- To understand operation of AED
- Principles of Adult BLS/Child BLS/Infant BLS

| | | 3 | 0 | 0 | 3 |

Course Objectives: To get familiar with Cardiac catheterization laboratory basics.

| CO1 | Students will be able to understand, differentiate and use different types of catheters, equipment used in a cathlab and their sterilization |
|-----|--|
| CO2 | Students will be able to understand how to record intra cardiac pressures and its application. |
| CO3 | Students will be able to understand cardiac output determination methods and shunt detection. |
| CO4 | Students will be able to understand Coronary angiography and its procedure. |

CO5 Students will be able to understand the procedure of Left Ventriculography and right heart catheterization.

Text Book (s):

- 1. Donald S. Baim Grossman's Cardiac Catheterization, Angiography, and Intervention, Volume 1 Lippincott Williams & Wilkins, 2005
- 2. Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011
- 3 .Echocardiography Feigenbaum

Reference Book (s):

- 1. Donald S. Baim Grossman's Cardiac Catheterization, Angiography, and Intervention, Volume 1 Lippincott Williams & Wilkins, 2005.
- 2. Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011

Unit-1 Introduction 8 hours

Catheters & Catheterization- Types of catheters, catheter cleaning and packing, Techniques of sterilization; advantages and

disadvantages of each, setting up the cardiac catheterization laboratory for a diagnostic study,

Table movement, Image intensifier movement, Image play back.

Unit-2 8 hours

Intracardiac Pressures- Intra cardiac pressures, Pressure recording systems, Fluid filled catheters versus catheter tipped

manometers, artifacts, damping, ventricularization, Pressure gradient recording pullback, peak-to peak.

Unit-3 8 hours

Determination of Cardiac output- Cardiac output determination, Thermo dilution method, Oxygen dilution method, Principles of

oximetry, Shunt detection and calculations.

Unit-4 8 Hours

Angiography- Coronary angiography, Coronary angiographic catheters, Use of the manifold, Angiographic

views in coronary angiography, Laboratory preparation for coronary angiography.

Unit-5 8 Hours

Ventriculography - Left Ventriculography - catheters, views, use of the injector, Right heart catheterization and

| Angiography | | |

Course Objectives: To get familiar with cardiac catheterization laboratory advanced.

Course Outcomes

| CO1 | Students will be able to identify and evaluate Fundamental principles of Aortic angiography, Coronary angioplasty, Balloon Mitral valvuloplasty. |
|-----|--|
| CO2 | Students will be able to identify and evaluate Fundamental principles of Coronary angioplasty. |
| CO3 | Students will be able to identify and evaluate Techniques and hardware used in BMV, Setting up the laboratory for a BMV case Technique and equipment used for trans-septal puncture. |
| CO4 | Students will be able to identify and evaluate Thromboembolic disease, Indications and use of venacaval filters, Techniques of thrombolysis. |
| CO5 | Students will be able to identify and evaluate Catheters used in electrophysiology studies, Connection of catheters. |

Text Book (s):

- 1. Donald S. Baim Grossman's Cardiac Catheterization, Angiography, and Intervention, Volume 1 Lippincott Williams & Wilkins, 2005.
- 2. Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011.
- 3. Echocardiography Feigenbaum

Reference Book (s):

- **1.** Donald S. Baim Grossman's Cardiac Catheterization, Angiography, and Intervention, Volume 1 Lippincott Williams & Wilkins, 2005.
- **2.** Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011

Unit-1 Introduction 8 hours

Aortic angiography – aortic root, arch, abdominal aorta, Peripheral angiography and carbondioxide angiography, Catheterization and angiography in children with congenital heart disease, Contrast agents: Ionic and non-ionic, Types of non-ionic agents, Contrast nephropathy, Measures to reduce incidence of contrast nephropathy.

Unit-2 8 Hours

Coronary angioplasty (PTCA), Equipment and harware used in PTCA: Guiding cathetersGuidewires, Balloons, Stents, Setting up the laboratory for a PTCA case Management of complications: Slow flow/no flow, acute stent thrombosis, Dissection, Perforation

Pediatric Interventions: Aortic and pulmonary valvuloplasty, Coarcation angioplasty and stenting, Device closure of PDA, ASD, VSD, Technique and devices used, Sizing of devices, Coil.

Unit-3 8 Hours

Balloon Mitral valvuloplasty (BMV): Techniques and hardware used in BMV, Setting up the laboratory for a BMV case Technique and equipment used for trans-septal puncture, Recording of transmitral pressure gradients, Management of cardiac tamponade, Peripheral interventions, Equipment and techniques used, Endovascular exclusion of aneurysms Self-expanding stents, covered stents and cutting balloons, Intra-aortic balloon pump (IABP) Theory of intra -aortic balloon counter pulsation, Indications for IABP use, setting up the IABP system.

Unit-4 8 Hours

Thromboembolic disease, Indications and use of venacaval filters, Techniques of thrombolysis – drug and catheters used, Thrombus aspirations systems – coronary, peripheral, Cardiac pacing, Temporary pacing – indications, technique, Permanent pacing, Indications, Types of pacemakers and leads, setting up the laboratory for permanent pacing, Pacemaker parameter checking, Follow-up of pacemaker patient.

Unit-5 8 Hours

Cardiac electrophysiology, Catheters used in electrophysiology studies, Connection of catheters during an EP study, Equipment used in arrhythmia induction and mapping Radiofrequency ablation, Image archival systems and compact disc (CD) writing.

Continuous Assessment Pattern

Course Objectives: To get familiar with Cardiac Care Technology.

Course Outcomes

| CO1 | To analyze and interpret the principles of ambulatory ECG, TMT and |
|-----|---|
| | transesophageal echocardiography. |
| CO2 | To analyze and interpret the principles of cardiac pacemakers. |
| CO3 | To understand and analyze equipments used in the cardiac catheterization lab. |
| CO4 | To understand difference between quality control and assurance. |
| CO5 | Understand use and importance of records and consent. Understand abbreviations and symbols. |

Text Book (s):

- 1. Cardiac Monitor Technician Textbook: Theory and Practical Fundamentals.
- 2. Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011.
- 3. Cardiac Monitor Technician Textbook: Theory and Hands On Approach By: Sultan, et al. Khan (Author), Faisal Khan MD.

Reference Book (s):

- 1. 1. Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011.
- 2. Cardiac Monitor Technician Textbook: Theory and Hands On Approach By: Sultan, et al. Khan (Author), Faisal Khan MD

Unit-1 Introduction 16 hours

To understand about ambulatory ECG and it's significance, types of Ambulatory ECG. To understand how to prepare and position the patient for ECG. Understand proper placement of leads on chest wall for ECG. To understand the various complications associated with Exercise ECG

Tread mill test

To develop an understanding regarding treadmill test, different type of Stress TEST, procedure for carrying out stress Echo including the placement of leads during the test. To understand how to prepare the patient for a cardiac stress echo, DSE, etc.

Understand various differences in the findings of a normal and an ischemic heart. To understand the working & procedure of an isotope stress test. To develop broad understanding regarding

necessary precautions which to be taken while performing an isotope stress test.

To understand regarding Trans esophageal echocardiography, it's types, scope, indication for procedure & associated complications. To gain broad understanding regarding findings which is to be expected during the procedure. To understand the safety & privacy aspect of this procedure for the patient. To understand the roles and responsibilities of a technician during the procedure.

To understand to whom to contact in case if there is a need of replenishing supplies. To understand the /guidelines for medical and diagnostic supplies and content of the kit. To develop an understanding regarding need of maintaining record of supplies

Unit-2 16 Hours

Introduction to Pacemaker & Leads

To gain understanding regarding the artificial pacemaker & temporary pacemakers, significance behind the implantation of an artificial pacemaker, cardioverter defibrillator and it's significance. To carry out initial assessment of patient before the implantation of a pace maker.

To understand factors which to be considered when the patient is on a pacemaker. To gain broad understanding regarding warning signs of pacemaker infection.

Role of CCT during Implant Of Temporary Pacemakers

To differentiate between artificial and temporary pacemaker implantation procedure. To understand regarding temporary trans venous pacing. To understand the common problems which may occur during the insertion of pacemaker, pace maker syndrome. To gain understanding regarding complications to be expected during the procedure.

To understand the significance of investigations which should be carried out pre and post implantation. To gain understanding regarding indication for a temporary pace making. To understand the significance of elective pace making. To understand procedure for applying an

External pacemaker, common complication during implantation of temporary pacemaker, emergency measures which is to be taken in case of pacemaker failure

Unit-3

Introduction to Cardiac Related Equipment

To enlist the commonly used cath lab equipment, Use of following equipment C arm & u arm. x ray tube. X ray detecting device.x ray switching and pulse controller. Digital image processor, Fluoroscopic imaging system,• Physiologic recorder, Contrast powder injector ray table. Crash cart and defibrillator. Intubation equipment, Central vein catheter, Cardiac drugs' Sterile equipment and supplies, Liquid cooling system, etc.To develop broad understanding regarding major equipment used in the cath lab setting and its operating methods, technical specification of common equipment in cath lab. Understand the regulatory framework for medical equipment.

To develop an understanding regarding Pericardiocentesis and its types.

To develop an understanding regarding Pericardiocentesis and it's types .To understand procedure for Pericardiocentesis and requisite equipment, indications and complications of needle peri-cardiocentesis, indications and complications of open pericardiocentesis. To understand role of a technician while carrying out the procedure.

Unit-4

Understand the meaning of relations and types of relationship. To understand effective working relationships with the people external to the team, with which the individual works on a regular basis. To understand the effect of boundary violation in technician client relationships.

To understand the code of ethics for cardiac care technicians.

To understand the types of team in health care organization. To understand the elements and principles of team work and team based health care. Understand how to manage the conflict in health care facility management of work so as to meet professional expectations. To understand the significance of keeping the hospital clean. To understand the significance of maintaining confidentiality in work environment, managing stress.

Unit-5

Monitor And Assure Quality.

To understand the significance of quality, perception & its dimension, components of quality system, stages & elements quality system. Understand the process of quality system. To understand the significance of attending CME's for technician.

To develop a broad understanding regarding. (1) Hospital Information System. (2) Quality Improvement Plan. (3) Total Quality Management. To understand difference between quality control and assurance. To understand the factors which influences quality of care.

Consent, Documentation & Records.

Understand guidelines for documentation. Learn various types of records of importance for Cardiac Care Technician. Understand use and importance of records and consent. Understand abbreviations and symbols. Enter, transcribe, record, store, or maintain information in written or electronic/magnetic form.

Continuous Assessment Pattern

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| 30 | 70 | 100 |

| Name of The Course | Cardiac Catheterization Laboratory Basics (Practic | cal |) | | |
|--------------------|--|-----|---|---|---|
| Course Code | CVT353 | | | | |
| Prerequisite | | | | | |
| Corequisite | | | | | |
| Antirequisite | | | | | |
| | I | | T | P | C |
| | | 0 | 0 | 4 | 2 |

Course Objectives:

To get familiar with Cardiac catheterization laboratory basics.

Course Outcomes

| CO1 | Students will be able to evaluate Fundamental principles of Aortic angiography, Coronary angioplasty, Balloon Mitral valvuloplasty etc. |
|-----|---|
| CO2 | Students will be able to evaluate Fundamental principles of Coronary angioplasty. |
| CO3 | Students will be able to evaluate Fundamental principles of Aortic angiography, Balloon Mitral valvuloplasty etc. |

Text Book (s):

- 1. Donald S. Baim Grossman's Cardiac Catheterization, Angiography, and Intervention, Volume 1 Lippincott Williams & Wilkins,
- 2. Morton L. Kern, Morton J. Kern The Cardiac Catheterization Handbook Elsevier Health Sciences, 2011.
- 3. Patrick Kay, Manel Sabate, Marco A. Costa Cardiac Catheterization and Percutaenous Interventions Taylor & Francis, 2004.
- 4. Echocardiography Feigenbaum.

Reference Book (s):

1. Donald S. Baim Grossman's Cardiac Catheterization, Angiography, and Intervention, Volume Lippincott Williams & Wilkins, 2005.

| Unit-1 Introduction |
|--|
| Identify and evaluate the techniques used for cardiac catheterization. |
| Unit-2 |
| Identify and evaluate the techniques used for angiography |
| Unit-3 |
| Identify and evaluate the techniques used for cardiac intervention |

Continuous Assessment Pattern

| Internal | External (ETE) | Total Marks |
|----------|----------------|-------------|
| | | |

| 30 | 70 | 100 |
|----|----|-----|
| | | |

| Name of The Course | Cardiac Catheterization Laboratory Advanced (Practical) | |
|--------------------|---|---|
| Course Code | CVT354 | |
| Prerequisite | | |
| Corequisite | | |
| Antirequisite | | |
| | L T P | C |
| | 0 0 4 | 2 |

Course Objectives: To get familiar with cardiac catheterization laboratory advanced.

Course Outcomes

| CO1 | Students will be able to evaluate Fundamental principles of Aortic angiography, Coronary angioplasty, Balloon Mitral valvuloplasty. |
|-----|---|
| CO2 | Students will be able to evaluate Fundamental principles of Coronary angioplasty. |
| CO3 | Students will be able to evaluate Fundamental principles of Aortic angiography,Balloon Mitral valvuloplasty. |
