**Weekly Schedule of Lab Activities:**

Week	Activity Name	Concept Note (Plan of Action)
1	Spin-a-yarn	This will be an ice breaking session. The students will be given the beginning lines of an imaginary story and will be asked to carry on the same by adding two-three sentences at a time one by one to reach a meaningful end of the story.
2	Drafting Catchphrases	Each student will be individually called and given a random topic regarding any advertisement. They will be asked to draft catchphrases for the same within a short time period (1-2 min.).
3	Picture Interpretation	Students will be asked to review a random picture with the help of denotative meanings and their connotative implications.
4	Active Listening	An audio clip (BBC News) will be played by the teacher in the class. Students will be given an incomplete written draft of the same. They will be asked to carefully listen to the audio clip and fill the blanks.
5	Reading between the lines	A Media Discourse (Public speech by a politician) will be presented to the students. Students will be asked to excavate the hidden messages and prepare a list of what the speech explores.
6	Brief Biography of Female Personalities	Students will be asked to write a brief biography of any female personality highlighting her achievements and notable moments of her life.
7	Word Accent, Rhythm and Intonation	With the help of the software Clear pronunciation, students will be able to overcome Mother Tongue Influence (MTI) by learning various Rhythm patterns and Intonation at sentence level.
8	Public Speaking	To enhance their confidence, students will be given a chance to prepare a topic of their choice and speak in front of the class.

10	Mock Lecture	Students will be asked to Prepare a Mock Lecture so as to make them through with the concepts and ready to face the professional world.
11	Dialogue Writing	The teacher will assign one scene to each group. Students then will be asked to use their imagination to write dialogues.
12	Enacting Scene(s) from Critically appreciated Movie (English)	It will be a group activity and the students will choose a scene from a movie given by the teacher and enact the same.

Pre-requisites					
Co-requisites	--				

### Course Objectives

1. To teach the students to understand the details of STAAD – PRO software package.
2. To enable the students to know the behaviour of RCC structures.
3. To enable the students to design different components of structures

### Course Outcomes

On completion of this course, the students will be able to

1. Understand the details of STAAD – PRO software package.
2. Know the behavior of RCC structures.
3. Know the bending moment diagram drawn in tension face and shear force diagram.
4. Design RCC beams and columns.
5. Analyze and design RCC portal frames.

### Suggested Reading

1. V. N. Vazirani & M. M. Ratwani, (1998), Analysis of Structures, Khanna Publishers.
2. R. L. Jindal, (1996), Indeterminate Structures, Tata McGraw Hill Publishing House.
3. G. S. Pandit & Gupta S. P., (1998), Structural Analysis (A matrix approach), Tata McGraw Hill Publishing Ltd.
4. Wang C. K., (1996), Matrix Method of Structural Analysis, Jon Wiley publications.

Head  
Dept. of Civil Engineering

### List of Experiments

1. Design of (G+2) masonry building.
2. Design of staircase.
3. Design of (G+3) RCC building.
4. Design of (G+4) RCC building.

**Mode of Evaluation:** The subject understanding of students will be evaluated through lab report, lab performance and viva-voce.
