Description (min 150 to max 800 words) *

Galgotias School of Nursing, Galgotias University, organized an online expert talk on 28th April 2026 on the occasion of World Immunization Week. The theme of the program, "For Every Generation, Vaccines Work," was effectively aligned with the session topic "Lifelong Immunization: From Pediatrics to Geriatrics." The primary objective of the session was to create awareness regarding the importance of immunization across the lifespan and to strengthen the knowledge base of nursing students and faculty in preventive healthcare.

The session was delivered by Dr. Anu Gauba, Dean, Department of Nursing, G.D. Goenka University, Gurgaon, who brought extensive academic and clinical expertise to the discussion. She began the session by emphasizing the concept of immunization as one of the most successful and cost-effective public health interventions. She highlighted how vaccines have played a crucial role in reducing the burden of infectious diseases globally and improving life expectancy.

Dr. Gauba elaborated on the concept of lifelong immunization, stressing that vaccination is not confined to childhood but is essential at every stage of life. She systematically explained the immunization needs of different age groups:

- Pediatric Immunization: Importance of following the national immunization schedule, protection against diseases like measles, polio, diphtheria, and tuberculosis.
- Adolescent Immunization: Role of booster doses and vaccines such as HPV in maintaining immunity.
- Adult Immunization: Awareness about vaccines for hepatitis, influenza, and occupational risks among healthcare workers.
- Geriatric Immunization: Focus on vaccines like pneumococcal and influenza to reduce morbidity and complications in the elderly population.

The speaker also addressed special population groups, including immunocompromised individuals, pregnant women, and those with chronic illnesses, emphasizing tailored vaccination strategies for these groups. An important segment of the session focused on vaccine hesitancy, myths, and misconceptions prevalent in society. Dr. Gauba discussed evidence-based strategies to counter

	misinformation and highlighted the role of nurses in educating patients and communities. She
--	--

	stressed the importance of communication skills, ethical responsibility, and cultural sensitivity while promoting vaccination. The session further covered cold chain maintenance, vaccine storage, and administration techniques, which are critical components of nursing practice. Practical insights into maintaining vaccine efficacy and ensuring safe administration were shared, enhancing the clinical relevance of the session. The program was highly interactive, with participants actively engaging in the discussion by asking questions and sharing their perspectives. The speaker addressed queries related to vaccine safety, side effects, booster requirements, and emerging vaccination trends. The session concluded with a strong message on the role of nurses as frontline health educators and advocates for immunization. Students were encouraged to actively participate in community outreach programs, awareness campaigns, and national immunization initiatives. Overall, the expert talk was highly informative, engaging, and impactful. It not only enhanced theoretical knowledge but also strengthened the practical understanding of students regarding immunization practices. The program successfully achieved its objective of promoting the concept of lifelong immunization and reinforcing the critical role of nursing professionals in public health promotion and disease prevention.
