

25.04.2020

Dear Students,

Galgotias University has always been and continues to be a student centric and technology driven university. During the Covid-19 pandemic and the need for social distancing, the university has adapted quickly to the digital learning platforms and provided you the best of education during the global crisis through technology.

We are fully prepared for technology driven improvement MTE (through online examination) and demo sessions also were taken by 90% students. However, we have also received some requests via E-mail from students for their difficulty in giving the improvement MTE examinations due to the following issues:

- 1.Unavailability of laptops/smart devices due to lockdown.
- 2.Students are in Low network areas/poor coverage areas.
- 3.Frequent Power-cuts due to use of desktops.
- 4.Due to Lockdown - Unavailability of access to Cybercafés.

Considering all the above aspects raised by our students the university administration has taken a decision in larger interest of our students to postpone the improvement examination scheduled on 26th April -1st may till further orders.

The mode of examination and revised dates shall be communicated soon.

It has also been observed, many students have not operated the university email id and their mobile numbers are not registered/updated in the University ERP. This should be considered urgently and all students must update their mobile numbers on ERP within the next 3 days as new notices/communications/updates shall be sent only on registered mobile numbers.

We do hope you are spending your time in upgrading your skills and knowledge by using the various links of MOOC's provided to you.

Learning should never stop!

Keep safe!
